Department of Computer Science
University of Colorado Boulder
1111 Engineering Dr, 430 UCB
Boulder, CO 80309-0430 USA

EDUCATION

- PhD **University of California, Berkeley**, Computer Science 2008
Advisor: Prof. George C. Necula
Thesis: *End-User Program Analysis*
Dissertation Committee: Prof. George C. Necula (chair), Prof. Koushik Sen, and Prof. Jack Silver
- MS **University of California, Berkeley**, Computer Science 2005
Advisor: Prof. George C. Necula
Thesis: *Type-Based Verification of Assembly Language*
- BS **Carnegie Mellon University**, Computer Science, 4.0 GPA 2002
University and College Honors
Minors: Biological Science and Mathematical Science
Advisors: Prof. Robert Harper and Prof. Frank Pfenning
Thesis: *Iktara in ConCert: Realizing a Certified Grid Computing Framework from a Programmer's Perspective*

ACADEMIC APPOINTMENTS

- University of Colorado Boulder July 2017–present
Associate Professor, Department of Computer Science
Associate Professor, Department of Electrical, Computer, and Energy Engineering (by courtesy).
- Amazon May 2019–present
Amazon Scholar
- University of Colorado Boulder January 2009–June 2017
Assistant Professor, Department of Computer Science
Assistant Professor, Department of Electrical, Computer, and Energy Engineering (by courtesy).
- University of Maryland, College Park September 2008–November 2008
Postdoctoral Researcher, Department of Computer Science
Advisor: Prof. Jeffrey S. Foster

RESEARCH INTERESTS

Algorithms, tools, and techniques for building, understanding, and ensuring reliable computational systems.

Keywords: software quality, programmer productivity, program analysis, automated reasoning, programming languages, semantics, logic, formal methods.

AWARDS AND HONORS

Professional

National Science Foundation CAREER Award December 2010

Award Papers

SAS 2021: Radhia Cousot Young Researcher Best Paper Award October 2021
Selectively-Amortized Resource Bounding

SANER 2018: IEEE TCSE Distinguished Paper Award March 2018
Mining Framework Usage Graphs from App Corpora

ECOOP 2013: Distinguished Artifact Award July 2013
QUIC Graphs: Relational Invariant Generation for Containers

TACAS 2012: Journal Special Issue Invitation October 2012
A Bit Too Precise? Bounded Verification of Quantized Digital Filters

Professional Service

Distinguished Reviewer for PLDI 2017 June 2017

Advisee Awards

Tianhan Lu, Radhia Cousot Young Researcher Best Paper Award October 2021
Static Analysis Symposium (SAS 2021)

Benno Stein, Ralph J. Slutz Student Excellence Award September 2021
University of Colorado Boulder

Benno Stein, Outstanding Research Award April 2021
Department of Computer Science, University of Colorado Boulder

Peilun Zhang, Undergraduate Student Research Competition Winner June 2017
Conference on Programming Language Design and Implementation (PLDI 2017).

Sam Blackshear, Ralph J. Slutz Student Excellence Award January 2015
University of Colorado Boulder

Sam Blackshear, Outstanding Research Award April 2014
Department of Computer Science, University of Colorado Boulder

Graduate

College of Engineering Graduate Student Prize December 2008
University of California, Berkeley

Siebel Scholar, offered but declined because of graduation August 2008
University of California, Berkeley

National Science Foundation Graduate Research Fellowship 2004–2007

California Microelectronics Fellowship 2002–2003

Undergraduate

| | |
|---|----------------|
| Phi Kappa Phi Honor Society , inducted | May 2002 |
| Andrew Carnegie Society Presidential Scholar , selected | December 2001 |
| Phi Beta Kappa Honor Society , inducted | October 2001 |
| Lambda Sigma Honor Society , inducted | September 1999 |
| Carnegie Mellon University Presidential and Institutional Scholarships | 1998–2002 |

GRANTS

I have been a PI or co-PI on sponsored research totaling in awards of approximately \$11.3M of which \$3.4M have been led by me as PI. My portion of these awards has totaled approximately \$4.0M. A summary of these figures is given below:

| | |
|-----------------------------------|--------------|
| Total Awarded: | \$11,265,025 |
| Awarded for CU Boulder: | \$7,652,047 |
| Awarded, my portion, approximate: | \$3,959,936 |
| Awarded as PI for CU Boulder: | \$3,401,808 |

NSF CCF-2223825, “Collaborative Research: SHF: Small: A General Framework for Responsive Static Analysis,” \$600,000 with \$300,000 for CU Boulder, 10/01/2022–09/30/2025, Bor-Yuh Evan Chang (PI); Manu Sridharan (PI at University of California, Riverside).

NSF CCF-2008369, “SHF: Small: Programming with Semantic Revision Requests,” \$499,234, 06/01/2020–05/31/2023, Bor-Yuh Evan Chang (PI).

NSF CNS-1941898, “IUCRC Proposal Phase I University of Colorado Boulder: Center for Pervasive Personalized Intelligence (PPI),” \$750,000, 06/01/2020–05/31/2025, Danny Dig (PI); Bor-Yuh Evan Chang and Shivakant Mishra (co-PIs).

NSF CNS-1822135, “IUCRC Planning University of Colorado Boulder: Center for Pervasive Personalized Intelligence (PPI),” \$15,000, 08/01/2018–07/31/2019, Bor-Yuh Evan Chang (PI); Shivakant Mishra (co-PI).

DARPA FA8750-14-2-0263, “Engineering Change Proposal: Technology Transfer: BigGroum Protocol Pattern Mining and Repair for MUSE: Mining and Understanding Bug Fixes to Address Application-Framework Protocol Defects,” \$278,647, 10/01/2018–12/31/2019, Bor-Yuh Evan Chang (PI); Sriram Sankaranarayanan (co-PI).

NSF CCF-1619282, “SHF: Small: Collaborative Research: Online Verification-Validation,” \$449,999 with \$309,990 for CU Boulder, 09/01/2016–08/31/2020, Matthew Hammer (PI); Bor-Yuh Evan Chang (co-PI); David Van Horn (PI at University of Maryland, College Park).

DARPA FA8750-15-2-0096, “STAC: Audit: Securing Space/Time Defenses in Java Bytecode,” \$5,797,751 with \$2,891,227 for CU Boulder, 04/22/2015–04/11/2020, Pavol Cerny (PI); John Black, Bor-Yuh Evan Chang, and Sriram Sankaranarayanan (co-PIs); Isil Dillig (PI at the University of Texas at Austin); Marijn Heule (co-PI); Henny Sipma (PI at Kestrel Technology).

DARPA FA8750-14-2-0263, “MUSE: Mining and Understanding Bug Fixes to Address Application-Framework Protocol Defects,” \$1,599,343, 09/24/2014–12/31/2019, Bor-Yuh Evan Chang (PI); Kenneth M. Anderson, Pavol Cerny, Sriram Sankaranarayanan, and Tom Yeh (co-PIs).

DARPA via Maryland Z8140001, “APAC: Specialized Binary Analysis for Vetting Android Apps Using GUI Logic,” \$733,734 with \$202,774 for CU Boulder, 09/01/2013–10/31/2015 subcontract from University of Maryland, College Park, Atif Memon (PI at University of Maryland, College Park); Tom Yeh (PI at CU Boulder) and Bor-Yuh Evan Chang (co-PI).

NSF CCF-1218208, “SHF: Small: Modular Reflection,” \$250,000, 10/01/2012–09/30/2015, Bor-Yuh Evan Chang (PI); Jeremy G. Siek (co-PI).

NSF CCF-1055066, “CAREER: Cooperative Program Analysis: Bridging the Gap Between User and Tool Reasoning,” \$459,584, 06/01/2011–05/31/2018, Bor-Yuh Evan Chang (PI).

Joint Institute for Strategic Energy Analysis (JISEA) UGA-0-41026-04, “Verifiable Decision-Making Algorithms for Reconfiguration of Electric Microgrids,” \$49,985 with \$14,500 for CU Boulder, 07/01/2010–06/30/2011, Siddharth Suryanarayanan (PI at Colorado State University); Sriram Sankaranarayanan (PI at CU Boulder); Bor-Yuh Evan Chang and Dirk Grunwald (co-PIs). JISEA is affiliated with the National Renewable Energy Laboratory (NREL).

NSF CCF-0939991, “EAGER: Exploratory Research on Gradual Programming,” \$81,748, 08/01/2009–07/31/2010, Jeremy G. Siek (PI); Bor-Yuh Evan Chang and Amer Diwan (co-PIs).

ADVISING

Graduated PhD Dissertation Advisees

1. Tianhan Lu, co-advised with Pavol Cerny and Ashutosh Trivedi, Fall 2015–Spring 2023, defended May 22, 2023. *Selectively-Amortized Resource Bounding*. Computer Science. University of Colorado Boulder.
2. Benno Stein, Fall 2015–Spring 2022, defended March 30, 2022. *Demanding Abstract Interpretation*. Computer Science. University of Colorado Boulder.
3. Sam Blackshear, Fall 2010–Spring 2015, defended May 27, 2015. *Flexible Goal-Directed Abstraction*. Computer Science. University of Colorado Boulder.
4. Devin Coughlin, Fall 2008–Spring 2015, defended January 7, 2015. *Type-Intertwined Separation Logic*. Computer Science. University of Colorado Boulder.
5. Arlen Cox, co-advised with Xavier Rival (ENS Paris) and Sriram Sankaranarayanan, Fall 2008–Fall 2014, defended November 17, 2014. *Parametric Heap Abstraction for Dynamic Language Libraries*. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

Graduated Senior Thesis Advisees

1. Evan Roncevic (BS 2016). Senior Thesis, Fall 2015–Spring 2016, defended May 6, 2016. Discovery Learning Apprentice, Fall 2014–Spring 2015. Computer Science. University of Colorado Boulder.
2. Ross Holland (BS/MS 2016). Senior Thesis, Fall 2014–Spring 2015, defended April 30, 2015. Computer Science. University of Colorado Boulder.
3. Nick Vanderweit (BS 2014). Senior Thesis, Fall 2013–Spring 2014, defended May 7, 2014. Computer Science. University of Colorado Boulder.
4. Alexander Beal (BS 2013). Senior Thesis, Fall 2012–Spring 2013, defended May 9, 2013. Computer Science. University of Colorado Boulder.

Past Research Scientists

1. Edmund S.L. Lam, Summer 2016–Summer 2017. Computer Science. University of Colorado Boulder.

Past Postdoctoral Advisees

1. Sergio Mover, Fall 2015–Summer 2018. Computer Science. University of Colorado Boulder.

Current PhD Dissertation Advisees

1. Christian Fontenot, co-advised with Gowtham Kaki, Fall 2022–present. Computer Science. University of Colorado Boulder.
2. Shawn Meier, Fall 2014–present. Computer Science. University of Colorado Boulder.

Past Research Advisees

I have advised or co-advised independent studies or semester research projects for the following students.

1. Yann Herklotz Grave (PhD), co-mentored with Sandro Stucki, Spring 2023, Applied Scientist Intern, Amazon. Computer Science. Imperial College London, advised by John Wickerson.
2. Denis Mazzucato (PhD), co-mentored with Ilina Stoikovska, Summer 2022, Applied Scientist Intern, Amazon. Computer Science. École Normale Supérieure, advised by Caterina Urban.
3. Dongjun Youn (PhD), co-mentored with Daniel Schoepe, Spring 2022, Applied Scientist Intern, Amazon. Computer Science. Korea Advanced Institute of Science and Technology, Korea, advised by Sukyoung Ryu.
4. David Seekatz (MS), co-mentored with Daniel Schoepe, Fall 2021, Applied Scientist Intern, Amazon. Computer Science. University of Alberta, advised by Karim Ali.
5. David Flores, co-advised with Ashutosh Trivedi, Fall 2021–Spring 2023. Computer Science. University of Colorado Boulder.
6. Đorđe Žikelić (PhD), co-mentored with Pauline Bolignano, Fall 2020, Applied Scientist Intern, Amazon; co-mentored with Franco Raimondi, Fall 2023, Applied Scientist Intern, Amazon. Institute of Science and Technology, Austria, advised by Krishnendu Chatterjee.
7. Jack Martin (PhD), co-advised with Ashutosh Trivedi, Fall 2020. Computer Science. University of Colorado Boulder.
8. Phillip Wells (PhD), co-advised with Ashutosh Trivedi, Fall 2019. Computer Science. University of Colorado Boulder.
9. Thanh-Toan Nguyen (PhD), co-mentored with Pavle Subotic, Fall 2019, Applied Scientist Intern, Amazon. Computing. National University of Singapore, advised by Wei-Ngan Chin.
10. Andrew Guttman (PhD), Fall 2017–Spring 2019. Computer Science. University of Colorado Boulder.
11. Jared Wright (PhD), co-advised with Matthew A. Hammer, Fall 2016–Spring 2019. Computer Science. University of Colorado Boulder.
12. Chi Chen (MS), co-advised with Tom Yeh, Fall 2017–Spring 2018. Computer Science. University of Colorado Boulder.
13. Chance Roberts (BS), Summer 2017–Fall 2018. Discovery Learning Apprentice, Fall 2017–Spring 2018. Computer Science. University of Colorado Boulder.
14. Peilun Zhang (BS 2017), Fall 2016–Spring 2018. Discovery Learning Apprentice, Fall 2016–Spring 2017. Computer Science. University of Colorado Boulder.
15. Saeid Tizpaz-Niari (PhD), co-advised with Pavol Cerny and Ashutosh Trivedi, Fall 2015–Spring 2018. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.
16. Aleksandar Chakarov (PhD 2017), advised by Sriram Sankaranarayanan, Summer 2010, Summer 2016. Computer Science. University of Colorado Boulder.
17. Alexandra Gendreau (PhD), advised by Tammy Sumner, Fall 2014–Spring 2015. Computer Science. University of Colorado Boulder.

18. Christoph Reichenbach (PhD 2009), advised by Amer Diwan, Spring 2009–Fall 2009. Computer Science. University of Colorado Boulder.
19. Nicholas Dronen (PhD 2016). Independent Study, Fall 2009. Computer Science. University of Colorado Boulder.
20. Athithyaa Panchapakesan Rajeswari (MS), Summer 2016. Computer Science. University of Colorado Boulder.
21. Aniket Lata (MS 2016), co-advised with Ashutosh Trivedi, Spring 2015–Spring 2016. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.
22. Krishna Chaitanya Sripada (MS 2016), co-advised with Pavol Cerny, Summer 2015–Spring 2016. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.
23. Yi-Fan Tsai (MS 2013), Fall 2011–Spring 2014. Computer Science. University of Colorado Boulder.
24. Robert Frohardt (MS), co-advised with Sriram Sankaranarayanan, Fall 2009–Fall 2010. Computer Science. University of Colorado Boulder.
25. Daniel Stutzman (MS 2010), Spring 2010–Fall 2010. Computer Science. University of Colorado Boulder.
26. Kyle Howell (BS/MS 2016), Fall 2014–Spring 2016. Discovery Learning Apprentice, Fall 2014–Spring 2015. Computer Science. University of Colorado Boulder.
27. Maxwell Russek (BS), Fall 2014–Spring 2017. Computer Science. University of Colorado Boulder.
28. Rhys Braginton Pettee Olsen (BS 2017), co-advised with Sriram Sankaranarayanan, Spring 2016–Spring 2017. Computer Science. University of Colorado Boulder.
29. Dakota Fisher (BS 2016), co-advised with Sriram Sankaranarayanan, Summer 2015. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.
30. Parker Evans (BS 2016), co-advised with Pavol Cerny. Discovery Learning Apprentice, Fall 2013–Spring 2014. Computer Science. University of Colorado Boulder.
31. Kira Quan (BS/MS 2014), Fall 2012–Spring 2013. Computer Science. University of Colorado Boulder.
32. Chris Bubernak (BS 2013). Discovery Learning Apprentice, Fall 2011–Spring 2012. Computer Science. University of Colorado Boulder.
33. James Holley (BS 2012). Discovery Learning Apprentice, Fall 2009–Spring 2010. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

Current Research Advisees

1. Spencer Wilson (MS), Fall 2023–present. Computer Science. University of Colorado Boulder.

CURRENT RESEARCH PROJECTS

University of Colorado Boulder

2022–

A General Framework for Responsive Static Analysis

Society increasingly relies on the reliability and security of software. Abstract interpretation is a well-established methodology for proving that software is free of certain classes of bugs. However, for industrial-scale software, standard abstract interpretation techniques may take hours to complete, making them difficult to integrate into modern software development practices. This project develops a framework for responsive static analysis, which retains the power of abstract interpretation while running much more quickly for common use cases. The

project's novelties are new algorithms for running abstract interpretation responsively, corresponding mathematical proofs that these algorithms produce the desired, correct results, and working implementations of the algorithms. The project's impacts are greater performance and applicability of powerful abstract interpretation techniques for verifying software correctness, which in turn will yield more reliable and secure software. With Benno Stein and Manu Sridharan.

University of Colorado Boulder

2020–

Programming with Semantic Revision Requests

Software development today is a social process, and the workflow of programmers is increasingly centered around discussing program revisions - that is, artifacts that document small, incremental program changes. Meanwhile, traditional research on testing, debugging, and analyzing programs focuses on one program version at a time, ignoring any preceding or succeeding versions of the same software artifact. The project's novelties are a foundational examination of program revisions and the investigation of automated techniques that cooperatively assist software-engineering teams with reasoning about them. The project's impacts are to enhance the way engineering teams collaboratively evolve their software and thus enable them to more effectively create secure and reliable software on which society depends. The project's core contribution is defining the notion of a "semantic revision request" that enables treating program revisions as first-class entities for debugging and analysis tools. A semantic view of program revisions enables programmers to run or analyze the program revision (both before and after a change simultaneously), not merely each of the two program versions, as supported by today's conventional tools. By focusing on debugging and analyzing program revisions - not their individual program versions - the resulting tools come closer to capturing the intent of the programmer as they develop and commit program changes. The intended broader impact from a technical perspective is that these executable and analyzable specifications will supplement, or even replace, informal descriptions about how software systems evolve, by providing an unambiguous way to communicate high-level programmer intent.

SELECTED PAST RESEARCH PROJECTS

University of Colorado Boulder

2016–2020

Ovv: Online Verification-Validation

Today's programmers essentially face a choice between creating software that is extensible and software that is verifiable. Languages either emphasize open extensibility or closed enforcement of abstractions. In this project, we explore language and virtual machine design techniques to offer verification in an extensible world by permitting analyses that freely interpose abstract interpretation with concrete execution in an incremental runtime system. With Matthew A. Hammer and David Van Horn.

University of Colorado Boulder

2015–2020

Audit: Securing Space/Time Defenses in Java Bytecode

Recent work has highlighted vulnerabilities in server applications using resource usage attacks that can cause denial of service and/or leakage of secret information. In this project, we investigate analysis techniques that enable a security analyst to more effectively secure an application to such attacks. Our premise is that such a technique must carefully orchestrate components that detect, refine, and witness possible resource usage-based exploits. With Tianhan Lu, Saeid Tizpaz-Niari, Pavol Černý, Sriram Sankaranarayanan, Ashutosh Trivedi, Işıl Dillig, Marijn Heule, and Henny Sipma.

University of Colorado Boulder

2015–2019

Static Analysis with Demand-Driven Refinement for Dynamic Languages

Static analysis tools for dynamic languages must strike a delicate balance, achieving the level of precision required by the most complex features of target programs without incurring prohibitively high analysis time. But even a minor precision loss at critical program locations can result in a proliferation of spurious dataflow that renders the analysis results useless. In this project, we investigate demand-driven mechanisms that mitigate issues with insufficient up-front analysis precision. With Benno Stein and Anders Møller.

University of Colorado Boulder

2014–2019

Fixr: Mining and Understanding Bug Fixes to Address Application-Framework Protocol Defects

With modern software frameworks like Android, there are millions of client applications (apps) that must carefully follow the complex and implicit protocols prescribed by the framework. And thus the same bug patterns occur over and over in apps. In this project, we search for algorithmic techniques for finding and generalizing bug fixes latent in source code repositories of some apps that can be automatically transferred to other apps. With Shawn Meier, Rhys Braginton Pettee Olsen, Peilun Zhang, Serio Mover, Edmund S.L. Lam, Pavol Černý, Sriram Sankaranarayanan, Kenneth M. Anderson, and Tom Yeh.

University of Colorado Boulder

2011–2015

Thresher: Refutations via Goal-Directed Abstract Interpretation

Sound static analyzers over-approximate the concretely possible behaviors of programs. This statements means that they are certain when a given program satisfies a property of interest, but the trade-off they make is that they may raise false bug alarms. From a user's perspective, the presence of false alarms undermines the trustworthiness of the analyzer. In this project, we approach the false alarm problem by empowering the user with tools for alarm triage. Rather than focusing on guessing up-front what precision is necessary in the analyzer, we investigate approaches by which a user can direct further analysis of suspicious alarms to quickly filter out false ones. We have effectively applied this approach to prove heap reachability properties and event-order safety properties of Android applications. With Sam Blackshear and Manu Sridharan.

University of Colorado Boulder

2012–2014

Fissile Type Analysis: Modular Checking of Almost Everywhere Invariants

Reflection is a language feature that reduces boilerplate and affords flexible and powerful frameworks. In current languages, however, the safety of reflection is checked only at run-time. In this project, we examine a modular, dependent type analysis that ensures compile-time reflection safety by checking refinement predicates relating mutable storage locations. With Devin Coughlin.

University of Colorado Boulder

2012–2014

Jsana: Abstract Domain Combinators for Dynamic Languages

A hallmark of dynamic languages is the presence of libraries that emulate other language features using underlying dynamic features (e.g., class systems using JavaScript's open objects). In this project, we investigate abstract domain combinators to enable modular reasoning of the dynamic language features, such as open, dynamically-extendable objects, indirect property lookup, and property iteration. With Arlen Cox and Xavier Rival.

University of Colorado Boulder

2011–2012

Measuring Enforcements for Data-Driven Static Analysis Design

Static analysis design is incredibly expensive, as many long iterations are required to determine whether or not a design is sufficient. We say that a static analysis design is sufficient if it can prove the property of interest with an acceptable number of false alarms. Ultimately, the only way to confirm that an analysis design is sufficient is to implement it and run it on real-world programs. If the evaluation shows that the design is insufficient, the designer must return to the drawing board and repeat the process. In this project, we observe that developers embed information in the form of enforcements that are both important to static analysis design and measurable with dynamic instrumentation. With Devin Coughlin, Jeremy G. Siek, and Amer Diwan.

University of Maryland, College Park

2008–2011

Mix: Mixing Program Analyses

Program analysis design is an exercise in tradeoffs. A precise analysis verifies deeper properties but may become prohibitively expensive to use, while a coarse analysis is efficient but suffers from high false alarm rates. In this project, we examine how to mix radically different analysis algorithms of varying precision that enables the analysis user (rather than the analysis designer) to make such tradeoffs. As a case study, we investigate the mixing of type inference (efficient) and symbolic evaluation (precise). With Khoo Yit Phang and Jeffrey S. Foster.

University of California, Berkeley

2006–2010

Xisa: Extensible Inductive Shape Analysis

Shape analyses are unique in that they can capture detailed aliasing and structural information that is typically beyond the ability of other static program analyses. To do so, they rely on specialized data structure descriptions to build and decompose summaries of memory regions. Unfortunately, existing approaches suffer from usability and scalability issues that make them impractical to apply broadly. Typically, they either are insufficiently

extensible or require low-level, expert interaction. Instead, our project focuses first on practicality by designing an extensible shape analysis based around high-level, program developer-oriented specifications. In particular, we observe that data structure checking code (e.g., used in testing or dynamic analysis) provides shape information that can also be used effectively in static analysis. With Xavier Rival and George Necula.

REFEREED PUBLICATIONS IN PROCEEDINGS

In many areas of Computer Science, including Programming Languages, the first and primary publication venues are full length papers in the proceedings of selective conferences. Many conferences have extensive two-phase review processes with author responses. The two main outlets are proceedings published by ACM (Association for Computing Machinery) and the Lecture Notes in Computer Science (LNCS) series published by Springer. The DBLP service (<http://dblp.uni-trier.de/db/>) maintains an up-to-date index of Computer Science literature. In the following, the † mark indicates students or post-doctoral reseachers that I formally advise, and the ‡ mark indicates other student co-authors.

Shawn Meier[†], Sergio Mover[†], Gowtham Kaki, and **Bor-Yuh Evan Chang**. 2023. Historia: Refuting Callback Reachability with Message-History Logics. In *ACM SIGPLAN Conference on Object Oriented Programming Systems Languages and Applications (OOPSLA)*, volume 7, number OOPSLA2 of *PACMPL*, 7(OOPSLA2), pages 1905-1934, October 2023. Acceptance: 37.4%.

Daniel Schoepe, David Seekatz[‡], Iliana Stoilkovska, Sandro Stucki, Daniel Tattersall, Pauline Bolignano, Franco Raimondi, and **Bor-Yuh Evan Chang**. 2023. Lifting On-Demand Analysis to Higher-Order Languages. In *International Static Analysis Symposium (SAS)*, volume 14284 of *Lect Notes Comput Sc*, 14284, pages 460-484, October 2023. Acceptance: 50.0%.

Dorđe Žikelić[‡], **Bor-Yuh Evan Chang**, Pauline Bolignano, and Franco Raimondi. 2022. Differential Cost Analysis with Simultaneous Potentials and Anti-potentials. PRESENTATIONS

| | |
|---|------------------|
| Keynote - Goal-Directed Abstract Interpretation and Event-Driven Frameworks. Thirtieth International Static Analysis Symposium (SAS'23). Cascais, Portugal. | October 22, 2023 |
| Interactive Abstract Interpretation. Dagstuhl Seminar 23281: Theoretical Advances and Emerging Applications in Abstract Interpretation. Wadern, Germany. | July 11, 2023 |
| Interactive Abstract Interpretation. IFIP WG 2.4 Software Implementation Technology. York Harbor, Maine, USA. | April 24, 2023 |
| Keynote - Automated Reasoning for Prime Video. Amazon Formal Reasoning Enthusiasts Workshop (FReE). | October 19, 2022 |
| Selectively-Amortized Resource Bounding. IFIP WG 2.4 Software Implementation Technology. | May 10, 2021 |
| Goal-Directed Static Analysis and Software Frameworks. Automated Reasoning Tech Talks. Amazon. | October 22, 2020 |
| Automated Reasoning at Prime Video. Amazon Scholar and Faculty Summit. | October 19, 2020 |
| Demanding Abstract Interpretation. IFIP WG 2.4 Software Implementation Technology. | October 16, 2020 |

| | |
|---|--------------------|
| Talking with a Static Analysis Bot. Amazon Formal Reasoning Enthusiasts Workshop (FReE). | October 16, 2020 |
| ChimpCheck: Property-Based Randomized Test Generation for Interactive Apps. Amazon. | August 26, 2020 |
| Goal-Directed Static Analysis and Software Frameworks. Invited Talk: Working Conference on Verified Software: Theories, Tools, and Experiments (VSTTE). | July 20, 2020 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. Amazon. London, UK. | July 23, 2019 |
| Type-Directed Bounding of Unbounded Programs. Amazon. London, UK. | July 2, 2019 |
| Event-Driven Protocols and Callback Control Flow. Amazon. London, UK. | June 18, 2019 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. Galois. Portland, Oregon, USA. | April 16, 2019 |
| Type-Directed Bounding of Unbounded Programs. IFIP WG 2.4 Software Implementation Technology. Paihia, New Zealand. | April 4, 2019 |
| Intelligent Assistants for PPI-Application Developers. Center on Pervasive Personalized Intelligence Planning Workshop. Boulder, Colorado, USA. | November 9, 2018 |
| Intelligent Assistants for PPI-Application Developers. Center on Pervasive Personalized Intelligence Planning Workshop. Portland, Oregon, USA. | October 11, 2018 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. DARPA MUSE Demonstration Workshop. Arlington, Virginia, USA. | September 11, 2018 |
| Event-Driven Protocols and Callback Control Flow. IFIP WG 2.4 Software Implementation Technology. Dijon, France. | July 24, 2018 |
| Cooperative Program Analysis. Analysis and Dynamics Seminar. University of Denver. Denver, Colorado, USA. | April 27, 2018 |
| Towards Semantic Revision Requests. APLAS New Ideas and Emerging Results Workshop. Suzhou, China. | November 30, 2017 |
| Verivita: Lifestate Verification of Event-Driven Apps. Shonan Seminar 108. Memory Abstraction, Emerging Techniques and Applications. Hayama Miura-gun, Kanagawa, Japan. | September 11, 2017 |
| Abstracting Event-Driven Systems for Reliable Mobile Applications. IDA/CCS. Bowie, Maryland, USA. | July 28, 2017 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. DARPA MUSE Demonstration Workshop. Arlington, Virginia, USA. | May 9, 2017 |
| Analyzing, Abstracting, and Mining Event-Driven Systems. ETH Zürich. Zürich, Switzerland. | April 7, 2017 |

| | |
|--|--------------------|
| Analyzing, Abstracting, and Mining Event-Driven Protocols. Invited Talk: Workshop on the Next 40 Years of Abstract Interpretation (N40AI). Co-located with the Symposium on Principles of Programming Languages (POPL). Paris, France. | January 21, 2017 |
| Analyzing, Abstracting, and Mining Event-Driven Systems. Invited Talk: Workshop on Software Correctness and Reliability. ETH Zürich. Zürich, Switzerland. | October 8, 2016 |
| Secure and Reliable Software Systems with Cooperative Program Analysis. Computer Science Colloquium. University of Colorado Boulder. Boulder, Colorado, USA. | September 29, 2016 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. DARPA MUSE PI Meeting. Santa Cruz, California, USA. | September 8, 2016 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. DARPA MUSE Site Visit. University of Colorado Boulder. Boulder, Colorado, USA. | May 3, 2016 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. DARPA MUSE Demonstration Workshop. Arlington, Virginia, USA. | February 1, 2016 |
| Goal-Directed Program Analysis with Jumping. Max Planck Institute for Software Systems. Kaiserslautern, Germany. | October 3, 2015 |
| Goal-Directed Program Analysis with Jumping. École Normale Supérieure. Paris, France. | October 1, 2015 |
| Goal-Directed Program Analysis with Jumping. Google. Mountain View, California, USA. | July 24, 2015 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. DARPA MUSE PI Meeting. SRI International. Menlo Park, California, USA. | July 22, 2015 |
| Type-Intertwined Heap Analysis. Aarhus University. Aarhus, Denmark. | May 18, 2015 |
| Fixr: Mining and Understanding Bug Fixes for App-Framework Protocol Defects. DARPA MUSE Site Visit. University of Colorado Boulder. Boulder, Colorado, USA. | February 25, 2015 |
| Cooperative Program Analysis. Computer Science Colloquium. Colorado State University. Fort Collins, Colorado, USA. | September 22, 2014 |
| Fissile Type Analysis: Modular Checking of Almost Everywhere Invariants. Japan Advanced Institute of Science and Technology. Nomi, Japan. | August 6, 2014 |
| Cooperative Program Analysis. National Taiwan University. Taipei, Taiwan. | August 5, 2014 |
| Fissile Type Analysis: Modular Checking of Almost Everywhere Invariants. National Taiwan University. Taipei, Taiwan. | August 1, 2014 |
| Refuting Heap Reachability. National Chiao Tung University. Hsinchu, Taiwan. | July 31, 2014 |
| Fissile Type Analysis: Modular Checking of Almost Everywhere Invariants. Academia Sinica. Taipei, Taiwan. | July 30, 2014 |

| | |
|---|-------------------|
| Fissile Type Analysis: Modular Checking of Almost Everywhere Invariants. Carnegie Mellon University. Pittsburgh, Pennsylvania, USA. | April 23, 2014 |
| Fissile Type Analysis: Modular Checking of Almost Everywhere Invariants. University of Maryland, College Park. College Park, Maryland, USA. | February 26, 2014 |
| Refuting Heap Reachability. Invited Keynote: Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI). San Diego, California, USA. | January 20, 2014 |
| Cooperative Program Analysis. Computer Science Colloquium. University of Colorado Boulder. Boulder, Colorado, USA. | October 3, 2013 |
| Precise Heap Reachability by Refutation Analysis. Université Paris Diderot. Paris, France. | July 22, 2013 |
| Precise Heap Reachability by Refutation Analysis. École Normale Supérieure. Paris, France. | July 19, 2013 |
| Precise Heap Reachability by Refutation Analysis. Dagstuhl Seminar 13162: Pointer Analysis. Wadern, Germany. | April 16, 2013 |
| Witnessing Heap Reachability for Resource Leaks in Android. Google. Mountain View, California, USA. | August 29, 2012 |
| Measuring Enforcement Windows with Symbolic Trace Interpretation: What Well-Behaved Programs Say. Danish Static Analysis Symposium (DANSAS). Odense, Denmark. | August 24, 2012 |
| Xisa: Extensible Inductive Shape Analysis. Aarhus University. Aarhus, Denmark. | August 23, 2012 |
| Modular Reflection Checking using Relationship Refinements. Aarhus University. Aarhus, Denmark. | August 20, 2012 |
| The Flow-Insensitive Precision of Andersen's Analysis in Practice. University of California, Berkeley. Berkeley, California, USA. | June 10, 2011 |
| Xisa: Extensible Inductive Shape Analysis. Carnegie Mellon University. Pittsburgh, Pennsylvania, USA. | March 16, 2011 |
| Calling Context Abstraction with Shapes National Taiwan University. Taipei, Taiwan. | December 17, 2010 |
| Mixing Type Checking and Symbolic Execution. Front Range Architecture, Compilers, Tools, and Languages Workshop (FRACTAL). Boulder, Colorado, USA. | December 5, 2009 |
| End-User Program Analysis for Data Structures. National Taiwan University. Taipei, Taiwan. | August 12, 2009 |
| Using Checkers for End-User Shape Analysis. National Taiwan University. Taipei, Taiwan. | August 11, 2009 |
| End-User Shape Analysis. National Taiwan University. Taipei, Taiwan. | August 11, 2009 |

| | |
|---|---------------------|
| Reduction in End-User Shape Analysis. Dagstuhl Seminar 09301: Typing, Analysis, and Verification of Heap-Manipulating Programs. Wadern, Germany. | July 24, 2009 |
| Gradual Programming: Bridging the Semantic Gap. Fun Ideas and Thoughts Session (FIT) at the 2009 Conference on Programming Language Design and Implementation (PLDI'09). Dublin, Ireland. | June 16, 2009 |
| End-User Program Analysis for Data Structures. Computer Science Department Colloquium. University of Virginia. Charlottesville, Virginia, USA. | November 24, 2008 |
| End-User Program Analysis. Dissertation Talk. University of California, Berkeley. Berkeley, California, USA. | August 28, 2008 |
| Extensible Shape Analysis by Designing with the User in Mind. Open Source Quality Project Retreat. Santa Cruz, California, USA. | May 16, 2008 |
| Precise Program Analysis with Data Structures. Job Talk. | February–April 2008 |
| Relational Inductive Shape Analysis. Thirty-Fifth International Symposium on Principles of Programming Languages (POPL'08). San Francisco, California, USA. | January 11, 2008 |

| Shape Analysis with Structural Invariant Checkers. Fourteenth International Static Analysis Symposium (SAS'07). Kongens Lyngby, Denmark. | August 24, 2007 |
| Shape Analysis with Structural Invariant Checkers. Open Source Quality Project Retreat. Santa Cruz, California, USA. | May 10, 2007 |
| Analysis of Low-Level Code Using Cooperating Decompilers. Thirteenth International Static Analysis Symposium (SAS'06). Seoul, Korea. | August 31, 2006 |
| Inferring Object Invariants. First International Workshop on Abstract Interpretation of Object-Oriented Languages (AIOOL'05). Paris, France. | January 21, 2005 |
| Abstract Interpretation with Alien Expressions and Heap Structures. Sixth International Conference on Verification, Model Checking and Abstract Interpretation (VMCAI'05). Paris, France. | January 18, 2005 |
| Type-Based Verification of Assembly Language for Compiler Debugging. Second International Workshop on Types in Language Design and Implementation (TLDI'05). Long Beach, California, USA. | January 10, 2005 |
| Extensible Verification of Untrusted Code. Open Source Quality Project Retreat. Santa Cruz, California, USA. | May 13, 2004 |
| PML: Toward a High-Level Formal Language for Biological Systems. First Workshop on Concurrent Models in Molecular Biology (BioConcur'03). Marseille, France. | September 6, 2003 |
| Human-Readable Machine-Verifiable Proofs for Teaching Constructive Logic. Workshop on Proof Transformations, Proof Presentations and Complexity of Proofs (PTP'01). Siena, Italy. | June 19, 2001 |

TEACHING EXPERIENCE

University of Colorado Boulder Fall 2023, Spring 2020, Spring 2018, Fall 2013, Spring 2010, and Spring 2009
Fundamentals of Programming Languages, CSCI 5535, *Instructor*
Core graduate-level course on the fundamental ideas behind modern programming language design and analysis.

University of Colorado Boulder Fall 2022, Fall 2016, Fall 2015, Spring 2014, Fall 2012, Spring 2012, and Fall 2009
Principles of Programming Languages, CSCI 3155, *Instructor*
Undergraduate-level course on the concepts of programming languages. In Spring 2012, I revised course using project-based principles.

University of Colorado Boulder Fall 2017, Spring 2015, and Fall 2011
Compiler Construction, CSCI 4555/5525, ECEN 4553/5523, *Instructor*
Combined undergraduate and graduate-level course on an introduction to compiler construction concepts and techniques.

University of Colorado Boulder Spring 2017 and Spring 2011
Program Analysis Practicum, CSCI 7135, *Instructor*
Graduate practicum on program analysis design and implementation.

University of Colorado Boulder Spring 2016, Fall 2014, Spring 2013, and Fall 2010
Program Analysis: Theory and Practice, CSCI 7135, *Instructor*
Graduate seminar on the theoretical foundations and practical implementations of program analysis.

University of Colorado Boulder Spring 2012
Readings in Programming Languages, CSCI 7900, *Instructor*
Advanced graduate reading seminar on current research topics. Discussions are primarily led by advanced graduate students.

University of California, Berkeley Spring 2004
Programming Languages and Compilers, CS164, *Graduate Student Instructor*
Upper division course on programming language principles and compiler design, assisting Prof. George Necula. Also, applied research ideas to develop Coolaid, an assembly-level type-checking tool, to help students with compiler development and understanding.

Carnegie Mellon University Fall 2000
Principles of Programming, 15-212, *Teaching Assistant*
Lower division course on abstraction and reasoning about programs and functional programming (taught in Standard ML), assisting Prof. Karl Crary and Prof. John Lafferty.

Carnegie Mellon University Spring 1999
Fundamentals of Computer Science I, 15-211, *Teaching Assistant*
Lower division course on data structures and algorithms in C++, assisting Prof. Klaus Sutner.

Carnegie Mellon University Fall 1999
Mathematical Foundations of Computer Science, 15-151, *Teaching Assistant*
Lower division course on fundamental concepts of discrete mathematics using Mathematica, assisting Prof. Edmund Clarke and Prof. Klaus Sutner.

PROFESSIONAL ACTIVITIES

General Chair

The 2026 Conference on Programming Language Design and Implementation (PLDI'26)

Program Chair

2024 International Conference on Object-Oriented Programming, Systems, Languages, and Applications (OOPSLA'24), Review Committee Co-Chair

Twenty-Sixth International Static Analysis Symposium (SAS'19)

Fifteenth Asian Symposium on Programming Languages and Systems (APLAS'17)

Fourth International Workshop on Tools for Automatic Program Analysis (TAPAS'13)

Program Committees

Thirty-Sixth International Conference on Computer-Aided Verification (CAV'24)

Thirty-Fifth International Conference on Computer-Aided Verification (CAV'23)

Twenty-Fourth International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI'23)

Thirty-Fourth International Conference on Computer-Aided Verification (CAV'22)

The 2022 Conference on Programming Language Design and Implementation (PLDI'22)

Thirty-Third International Conference on Computer-Aided Verification (CAV'21)

The 2021 Conference on Programming Language Design and Implementation (PLDI'21)

Twenty-Seventh International Static Analysis Symposium (SAS'20)

Forty-Seventh Symposium on Principles of Programming Languages (POPL'20)

2019 International Conference on Object-Oriented Programming, Systems, Languages, and Applications (OOPSLA'19)

Twenty-Eighth International Symposium on Software Testing and Analysis (ISSTA'19)

Twenty-Fifth International Static Analysis Symposium (SAS'18)

Sixth International Workshop on State of the Art in Program Analysis (SOAP'17)

Twenty-Ninth International Conference on Computer-Aided Verification (CAV'17)

Thirty-First European Conference on Object-Oriented Programming (ECOOP'17)

The 2017 Conference on Programming Language Design and Implementation (PLDI'17)

Fourteenth Asian Symposium on Programming Languages and Systems (APLAS'16)

Twenty-Third International Static Analysis Symposium (SAS'16)

Seventeenth International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI'16)

Forty-Third Symposium on Principles of Programming Languages (POPL'16)

Seventh IFIP Working Conference on Verified Software: Theories, Tools, and Experiments (VSTTE'15)

Third International Workshop on Tools for Automatic Program Analysis (TAPAS'12)

Thirteenth International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI'12)

Tenth Workshop on Program Analysis for Software Tools and Engineering (PASTE'11)

Twenty-Fourth International Workshop on Languages and Compilers for Parallel Computing (LCPC'11)

Third International Workshop on Numerical and Symbolic Abstract Domains (NSAD'11)

First Workshop on Abstract Interpretation of Object-Oriented Languages (AIOOL'05)

Steering Committees

Conference on Programming Language Design and Implementation (PLDI), 2023–present

Conference on Systems, Programming, Languages and Applications: Software for Humanity (SPLASH), 2023–present

Static Analysis Symposium, 2018–present. Chair, 2023–present.

Asian Symposium on Programming Languages and Systems (APLAS), 2017–present
International Workshop on Tools for Automatic Program Analysis (TAPAS), 2015–present

Organizing Committees

Programming Languages Mentoring Workshop at the 2023 Conference on Programming Language Design and Implementation (PLMW@PLDI'23)
Shonan Seminar 108: Memory Abstraction, Emerging Techniques and Applications. September 11–14, 2017.

External Review Committees

The 2020 Conference on Programming Language Design and Implementation (PLDI'20)
Twenty-Third Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS'18)
The 2015 Conference on Programming Language Design and Implementation (PLDI'15)
Forty-Second Symposium on Principles of Programming Languages (POPL'15)
The 2012 Conference on Programming Language Design and Implementation (PLDI'12)
Thirty-Ninth Symposium on Principles of Programming Languages (POPL'12)
The 2009 Conference on Programming Language Design and Implementation (PLDI'09)

External Reviews

Transactions on Programming Languages and Systems (2023)
Transactions on Programming Languages and Systems (2018-2019)
Science of Computer Programming (2016-2017)
Transactions on Programming Languages and Systems (2016)
Theoretical Computer Science (2015)
Computing Surveys (2015)
Transactions on Programming Languages and Systems (2014)
Computing Surveys (2014)
Acta Informatica (2014)
Journal of Automated Reasoning (2014)
The 2014 Conference on Programming Language Design and Implementation (PLDI'14)
Twenty-Fourth European Symposium on Programming (ESOP'14)
Forty-First Symposium on Principles of Programming Languages (POPL'14)
Eleventh Asian Symposium on Programming Languages and Systems (APLAS'13)
Semantics, Abstract Interpretation, and Reasoning about Programs: Essays Dedicated to David A. Schmidt on the Occasion of his Sixtieth Birthday (SAIRP'13)
Transactions on Programming Languages and Systems (2013)
Twenty-Third European Symposium on Programming (ESOP'13)
Fortieth Symposium on Principles of Programming Languages (POPL'13)
Second International Conference on Certified Programs and Proofs (CPP'12)
Transactions on Programming Languages and Systems (2012)
Transactions on Programming Languages and Systems (2011)
Twenty-Second European Symposium on Programming (ESOP'12)
Ninth Asian Symposium on Programming Languages and Systems (APLAS'11)
Eighteenth International Static Analysis Symposium (SAS'11)

Twelfth Conference on Verification, Model Checking and Abstract Interpretation (VMCAI'11)
Thirty-Eighth Symposium on Principles of Programming Languages (POPL'11)
Nineteenth European Symposium on Programming (ESOP'10)
Thirteenth Conference on Foundations of Software Science and Computation Structures (FoSSaCS'10)
Thirty-Seventh Symposium on Principles of Programming Languages (POPL'10)
Eighteenth European Symposium on Programming (ESOP'09)
Fourteenth Static Analysis Symposium (SAS'07)
Twenty-First Symposium on Logic in Computer Science (LICS'06)
The 2006 Conference on Programming Language Design and Implementation (PLDI'06)
The 2006 Symposium on Security and Privacy (Oakland'06)
Thirty-Third Symposium on Principles of Programming Languages (POPL'06)
Thirty-Second Symposium on Principles of Programming Languages (POPL'05)
Ninth Conference on Functional Programming (ICFP'04)

Professional Service

Sponsorship Co-Chair, the 2023 Conference on Systems, Programming, Languages, and Applications: Software for Humanity (SPLASH'23)
Sponsorship Co-Chair, the 2022 Conference on Systems, Programming, Languages, and Applications: Software for Humanity (SPLASH'22)
Sponsorship Chair, Thirty-Third International Conference on Computer-Aided Verification (CAV'21)
Selection Committee, Student Research Competition, Fifteenth Asian Symposium on Programming Languages and Systems (APLAS'17)
Selection Committee, Student Research Competition, the 2015 Conference on Object Systems, Programming, Languages and Applications: Software for Humanity (SPLASH'15)
Selection Committee, Student Research Competition, the 2015 Conference on Programming Language Design and Implementation (PLDI'15)
Co-Treasurer, Forty-First Symposium on Principles of Programming Languages (POPL'14)
Treasurer, Fortieth Symposium on Principles of Programming Languages (POPL'13)
Treasurer, Thirty-Ninth Symposium on Principles of Programming Languages (POPL'12)
Treasurer, Thirty-Eighth Symposium on Principles of Programming Languages (POPL'11)
Co-Treasurer, Thirty-Seventh Symposium on Principles of Programming Languages (POPL'10)
Organizer, Front Range Architecture, Compilers, Tools, and Languages Workshop (FRACTAL), Fall 2009.

Student Committees

PhD Dissertation Committee

David Delmas (PhD 2022), advised by Antoine Miné, rapporteur. Laboratoire d'informatique. Sorbonne Université.
Chou Yi (PhD 2021), advised by Sriram Sankaranarayanan. Department of Computer Science. University of Colorado Boulder.
Jedidiah McClurg (PhD 2018), advised by Pavol Cerny. Department of Computer Science. University of Colorado Boulder.
Hadi Ravanbakhsh (PhD 2018), advised by Sriram Sankaranarayanan. Department of Computer Science. University of Colorado Boulder.
Aditya Zutshi (PhD 2016), advised by Sriram Sankaranarayanan. Department of Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

Magnus Madsen (PhD 2015), advised by Anders Møller. Department of Computer Science. Aarhus University, Denmark.

Weiyu Miao (PhD 2013), advised by Jeremy G. Siek. Department of Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

Graham Price (PhD 2011), advised by Manish Vachharajani. Department of Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

Christoph Reichenbach (PhD 2009), advised by Amer Diwan. Department of Computer Science. University of Colorado Boulder.

PhD Proposal/PhD Comprehensive Examination Committee

Malinda Dilhara (passed April 11, 2022), advised by Danny Dig. Computer Science. University of Colorado Boulder.

Chou Yi (passed November 17, 2020), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.

Saeid Tizpaz-Niari (passed May 30, 2019), advised by Pavol Cerny and Ashutosh Trivedi. Computer Science. University of Colorado Boulder.

Jedidiah McClurg (passed May 5, 2017), advised by Pavol Cerny. Computer Science. University of Colorado Boulder.

Hadi Ravanbakhsh (passed May 12, 2016), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.

Aditya Zutshi (passed December 16, 2015), advised by Sriram Sankaranarayanan. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

Aleksandar Chakarov (passed February 16, 2015), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.

Graham Price (passed 2010), advised by Manish Vachharajani. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

Joseph Blomstedt (passed December 9, 2009), advised by Dirk Grunwald and Jeremy Siek. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

PhD Preliminary Examination Committee

Shu-Hung You, advised by Robby Findler and Christos Dimoulas. Computer Science. Northwestern University. Qualifier Examination. September 9, 2019.

Chou Yi, advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder. April 22, 2019.

Hadi Ravanbakhsh, advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.

Aleksandar Chakarov, advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.

Chris Wailes, advised by Dirk Grunwald and Jeremy Siek. Computer Science. University of Colorado Boulder.

Weiyu Miao, advised by Jeremy Siek. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

MS Thesis Committee

Erin Duggan (MS 2015), advised by Tom Yeh. Computer Science. University of Colorado Boulder.

Shashank Bharadwaj (MS 2012), advised by Jeremy Siek. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.

Erik Silksen (MS 2012), advised by Jeremy Siek. Computer Science. University of Colorado Boulder.

Huxley Bennett (MS 2012), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.

Moss Prescott (MS 2010), advised by Jeremy Siek. Computer Science. University of Colorado Boulder.

Scott Mackey (MS 2009), advised by Ken Anderson. Computer Science. University of Colorado Boulder.

ME Report Committee

Jesse Bowes (ME 2016), advised by Ken Anderson. Computer Science. University of Colorado Boulder.

Mark Grebe (ME 2013), advised by Ken Anderson. Computer Science. University of Colorado Boulder.

Russell Winkler (ME 2012), advised by Ken Anderson. Computer Science. University of Colorado Boulder.

BS Thesis Committee

Pranav Subramanian (BS 2023), advised by Gowtham Kaki. Computer Science. University of Colorado Boulder.

Trystan Binkley-Jones (BS 2015), advised by Ken Anderson. Computer Science. University of Colorado Boulder.

Emily Bertelson (BS 2015), advised by Tom Yeh. Computer Science. University of Colorado Boulder.

Eric Horacek (BS 2013), advised by Ken Anderson. Computer Science. University of Colorado Boulder.

Pavol Zelinsky (BS 2012), advised by Elizabeth R. Jessup. Computer Science. University of Colorado Boulder.

Erik Silksen (BS 2011), advised by Jeremy Siek. Computer Science. University of Colorado Boulder.

Robert Stimpfling (BS 2010), advised by Ken Anderson. Computer Science. University of Colorado Boulder.

Departmental Service

Department of Computer Science. University of Colorado Boulder

Co-Associate Chair for Graduate Education: 7/2023–present

Primary Unit Evaluation Committee for Comprehensive Review of Bo Waggoner: 8/2023-5/2024

Teaching Circle Review for Divya Vernerey: Fall 2023

Graduate Committee: 8/2022–5/2023

Teaching Faculty Search Committee: 8/2021–5/2022

Primary Unit Evaluation Committee for Tenure Review of Lijun Chen: 8/2021-5/2022

Primary Unit Evaluation Committee Chair for Comprehensive Review of Ashutosh Trivedi: 8/2020–5/2021

Faculty Search Committee: 8/2019–5/2020

Co-Chair of the Computing Committee: 7/2017–6/2018

Chair of the Faculty Search Committee: 8/2016–6/2017

Executive Committee: 8/2015–6/2017

Faculty Search Committee: 8/2014–5/2016

Colloquium Chair: 6/2012–7/2016

Graduate Committee: 1/2009–8/2011

PhD Recruiting Weekend: co-organized 2009, 2011

Organizes PhD Preliminary Exam in Programming Languages: 2010–present

Department of Electrical, Computer, and Energy Engineering. University of Colorado Boulder

Faculty Search Committee: 8/2011–5/2012

Computer Science Division. University of California, Berkeley.

Computer Science Graduate Student Association (CSGSA) Faculty Candidate Committee: 2007 (chair), 2006, and 2005

College Service

Mentor for Goldshirt S-STEM Program: Fall 2017–Fall 2018.

Transfer Credit Evaluator for Computer Science courses on behalf of the College of Engineering and Applied Sciences: 4/2015–12/2016.

University Service

Site Co-Director of the NSF Industry-University Collaborative Research Center on Pervasive Personalized Intelligence (PPI): 6/2020–present

Innovative Seed Grant Proposal Reviews: 2011

Professional Affiliations

Association for Computing Machinery (ACM)

Special Interest Group on Programming Languages (SIGPLAN)

Special Interest Group on Software Engineering (SIGSOFT)

Special Interest Group on Logic and Computation (SIGLOG)

CURRENT COLLABORATORS

CU: Profs. Gowtham Kaki, Sriram Sankaranarayanan and Ashutosh Trivedi (Computer Science).

National: Prof. Manu Sridharan (UC Riverside).

International: Prof. Sergio Mover (École Polytechnique, France); Dr. Xavier Rival (INRIA/ENS/CNRS, France).
