Associate Professor

Department of Computer Science

University of Colorado Boulder

1111 Engineering Dr, 430 UCB

Boulder, CO 80309-0430 USA

(303) 735-6628

303-492-2844

A. EDUCATIONAL BACKGROUND

PhD	University of Warwick, UK, Computer Science Advisor: Prof. Marcin Jurdziński Thesis: Competitive Optimization on Timed Automata Committee: Profs. Marcin Jurdziński (chair), Ranko Lazic, and Joël Ouaknine	2009
M.Tech	Indian Institute of Technology Bombay, India, Electrical Engineering Advisor: Prof. Supratik Chakraborty Thesis: Techniques in Symbolic Model Checking	2003
B.Eng	Visvesvaraya National Institute of Technology Nagpur, India, Computer Science	2000

B. ACADEMIC APPOINTMENTS

University of Colorado Boulder, USA

Associate Professor, Department of Computer Science

August 2023–present

Assistant Professor, Department of Computer Science

August 2017–August 2023

Research Assistant Professor, Department of Computer Science

August 2016–July 2017

Research Associate, Department of Computer Science

August 2015–July 2016

Indian Institute of Technology Bombay, India

Assistant Professor, Department of Computer Science

December 2012–August 2015

University of Pennsylvania, USA

Postdoctoral Researcher (Advisor: Rajeev Alur)

January 2011–December 2012

University of Oxford, UK

Postdoctoral Researcher (Advisor: Marta Kwiatkowska)

August 2009–December 2010

University of Tübingen, Germany

Research Intern (Advisor: Thomas Kropf)

May 2004–January 2005

Istituto per la Ricerca Scientifica e Tecnologica (IRST), Italy

Research Intern (Advisor: Alessandro Cimatti)

June 2003–October 2003

C. RESEARCH INTERESTS

Research Program. AI-assisted software solutions have made substantial inroads into critical aspects of modern existence, where they routinely make safety-critical, socio-critical, and legal-critical decisions with certainty and speed. Instances of such AI-assisted decisions include self-driving cars deciding to stop, implantable pacemakers deciding to pace, or recidivism prediction software determining whether individuals are prone to reoffend. These AI-assisted software systems are data-driven, adapting their behavior based on experiences in the form of data. This data can come from expertly curated sources in supervised learning, uncovering surprising patterns hidden in raw data in unsupervised learning, or learning from experiential data guided by expertly designed reward signals in reinforcement learning.

*The focus of my research is on enabling rigorous system engineering, specifically through formal methods, for data-driven systems to enhance **safety, security, fairness and accountability**.*

While formal methods have provided principles, processes, and practices for traditional systems development, data-driven systems, with their statistical, inductive, and adaptive nature, require a paradigm shift. My research aims to understand and redefine the role of formal methods in data-driven system development. I continue to leverage my expertise in ensuring functional requirements, including safety and privacy, while developing formal methods for non-traditional domains such as socio-economic or legal-critical systems.

Keywords. This research program is supported by concentrated effort in developing *principled methodologies* and *powerful tools* along the following major thrusts.

- ▶ **Formal Methods** for Verification and Synthesis of *Safety-Critical (Cyber-Physical) Systems*
- ▶ Automata-Theoretic Foundations of Safety-Critical **Reinforcement Learning**
- ▶ Software and Cyber-Physical Systems **Security**
- ▶ Software **Fairness and Accountability**

D. AWARDS/HONORS

Professional/Fellowships

National Science Foundation CAREER Award	2022
Reinforcement Learning for Recursive MDPs and Beyond	
Air Force Research Laboratory VFRP Fellowship	2020-21
Asymptotically-Constrained Reinforcement Learning	
Top 25% of Program Committee Members (AAAI 2021)	2021
Sigma Xi-Full Membership	2020
Research & Innovation Seed Grant Winner	2019
Learning to Control Safety-Critical Systems	
Liverpool India Fellowship	2014
Stochastic Control of Cyber-Physical Systems	
UK EPSRC Research Studentship, University of Warwick	2005-09
Ministry of Education Postgraduate Fellowship, IIT Bombay	2001-03
Undergraduate Merit Scholarship, Visveswaraya NIT Nagpur	1997

Award Papers

Static Analysis Symposium (SAS): Radhia Cousot Best Young Researcher Paper Award	2021
To student coauthor Tianhan Lu for our paper “Selectively-Amortized Resource Bounding”	
Static Analysis Symposium (SAS): Journal Special Issue Invitation	2021
Selectively-Amortized Resource Bounding	
International Symposium on Formal Methods (FM): Journal Special Issue Invitation	2021
Model-Free Reinforcement Learning for Lexicographic Omega-Regular Objectives	
Language and Automata Theory and Applications (LATA): Journal Special Issue Invitation	2016
A Logical Characterization for Dense-Time Visibly Pushdown Automata	
Hybrid Systems Computation and Control (HSCC): Best Paper Award	2012
Optimal Scheduling for Constant-Rate Multi-Mode Systems	

E. FUNDING

I have been a PI or co-PI on sponsored research totaling in awards of approximately \$8.5M of which \$1.45M have been led by me as PI. My portion of these awards has totaled approximately \$1.78M. A summary of these figures is given below:

Total Awarded:	\$8,484,551
Awarded for CU Boulder	\$4,909,860
Awarded, my portion, approximate:	\$1,783,812
Awarded as PI for CU Boulder:	\$1,451,000

Current Funding (4)

- 1. NSF-DASS-2317207: Assessing Accountability of Tax Preparation Software Systems**
 - Total amount: \$750,000; for CU Boulder: \$220,000
 - Period: 12/01/2023 —11/30/2026
 - Investigators: Ashutosh Trivedi (PI, CU Boulder) and Saeid Tizpaz-Niari (PI, UT El Paso)
 - Funding Agency: NSF DASS (Designing Accountable Software Systems) Program
- 2. NSF-CCF-2146563, CAREER: Reinforcement Learning for Recursive MDPs and Beyond**
 - Total amount: \$596,000
 - Period: 05/01/2022 — 04/30/2027
 - Investigators: Ashutosh Trivedi (PI)
 - Funding Agency: NSF (Computer and Information Science and Engineering: Core Programs)
- 3. NSF EPCN-2015403, Secure-by-Construction Controller Synthesis for Cyber-Physical Systems**
 - Total Amount: \$387,640
 - Period: 08/15/2020 —07/31/2023
 - Investigators: Ashutosh Trivedi (co-PI) and Majid Zamani (PI)
 - Funding Agency: NSF (Energy, Power, Control, and Networks Program)

4. NSF CCF-2009022, *SHF: Small: Omega-Regular Objectives for Model-Free Reinforcement Learning*

- Total amount: \$500,000
- Period: 06/15/2020 — 05/31/2023
- Investigators: Fabio Somenzi (co-PI) and Ashutosh Trivedi (PI)
- Funding Agency: NSF (Computer and Information Science and Engineering: Core Programs)

Past Funding (7)

1. EE-AIL IRT Seed Grant FY20-21, *Developing AI to Support Teaching in Large Programming Classes*

- Total amount: \$20,000
- Period: March-June 2022
- Investigators: Gowtham Kaki (co-PI), Fabio Somenzi (co-PI), and Ashutosh Trivedi (PI)
- Funding Agency: Engineering Education and AI-Augmented Learning IRT, CU Boulder

2. RISGP FY20, *Learning to Control Safety-Critical Systems*

- Total amount: \$50,000
- Period: 2019–2020
- Investigators: Emilinao Dallanese (co-PI), Fabio Somenzi (co-PI), and Ashutosh Trivedi (PI)
- Funding Agency: Research & Innovation Seed Grant Program, CU Boulder

3. SPARC 2018-2019, *Developing Safe and Secure Autonomous Cyber-Physical Systems*

- Total amount: \$93K (Travel Grant)
- Period: 2019–2021
- Investigators: Jyotirmoy Deshmukh (USC, Co-PI), Indranil Saha (IIT Kanpur, PI), Pramod Subramanyan (IIT Kanpur, Co-PI), and Ashutosh Trivedi (CU Boulder, Co-PI)
- Funding Agency: Ministry of Human Resource Development, Government of India (Scheme for Promotion of Academic and Research Collaboration [SPARC])

4. EE-AIL IRT Seed Grant FY20-21, *Human-AI Collaborative Programming : Integrating Reinforcement Learning and Formal Requirements in Programming Curriculum*

- Total amount: \$20,000
- Period: 2020–2021
- Investigators: Fabio Somenzi (co-PI), and Ashutosh Trivedi (PI)
- Funding Agency: Engineering Education and AI-Augmented Learning IRT, CU Boulder

5. ASIRT Seed Grant, *Towards Scalable Synthesis of Large-Scale Cyber-Physical Systems*

- Total amount: \$46,800
- Period: March 2019–June 2020
- Investigators: Majid Zamani (PI), Ashutosh Trivedi (co-PI), Morteza Lahijanian (co-PI), Fabio Somenzi (co-PI), Sriram Sankaranarayanan (co-PI)
- Funding Agency: Autonomous Systems Interdisciplinary Research Theme, College of Engineering and Applied Science, CU Boulder.

6. ASIRT Seed Grant, *Temporal-logic based Reinforcement Learning*

- Total amount: \$15,000
- Period: February 2018–December 2018
- Investigators: Ashutosh Trivedi (PI), Pavol Cerny (co-PI), and Fabio Somenzi (co-PI)
- Funding Agency: Autonomous Systems Interdisciplinary Research Theme, College of Engineering and Applied Science, CU Boulder.

7. DARPA FA8750-15-2-0096, *Auditr: Securing Space/Time Defenses in Java Bytecode*

- Total amount: \$5,797,751 with \$2,822,810, for CU Boulder,
- Period: 2015–2019 with a no-cost extension until May 2020.
- Investigators: Pavol Cerny (PI); John Black, Bor-Yuh Evan Chang, Sriram Sankaranarayanan, Ashutosh Trivedi (co-PIs); Isil Dillig (PI at the University of Texas at Austin); Marijn Heule (co-PI); Henny Sipma (PI at Kestrel Technology).
- Funding Agency: DARPA (Space/Time Analysis for Cybersecurity program)

E. ADVISING

Graduated PhD Dissertation Advisees (CU Boulder and IIT Bombay):

Saeid Tizpaz-Niari (jointly supervised with Prof. Pavol Cerny)	Fall 2015 – Fall 2020
<i>Affiliation:</i> Electrical, Computer, and Energy Engineering. CU Boulder.	
<i>Thesis:</i> <i>Differential Performance Debugging</i>	
<i>First Employment:</i> Assistant Professor, University of Texas at El Paso.	
Devendra Bhawe (jointly supervised with Prof. Krishna S.)	Fall 2014 – Fall 2020
<i>Affiliation:</i> Computer Science. IIT Bombay.	
<i>Thesis:</i> <i>Perfect Subclasses of Real-time Recursive Systems</i>	
<i>First Employment:</i> Senior Software Engineer, Mathworks.	
Tianhan Lu (jointly supervised with Prof. Bor-Yuh Evan Chang)	Fall 2015 – May 2023
<i>Affiliation:</i> Computer Science. CU Boulder.	
<i>Thesis:</i> Selectively-Amortized Resource Bounding	
<i>First Employment:</i> Meta Platforms, Inc.	

Current PhD Dissertation Advisees (CU Boulder)

Taylor Dohmen	August 2018 – Now
Topic: Regular Reinforcement Learning	
Status: <i>Passed Comprehensive Exam (April 2023)</i>	
John Komp	August 2018 – Now
Topic: Reinforcement Learning for Implantable Medical Devices	
Status: <i>Passed Comprehensive Exam (May 2023)</i>	
Mateo Perez (jointly supervised with Prof. Fabio Somenzi)	August 2020 – Now
Topic: Omega-Regular Rewards in Reinforcement Learning	
Status: <i>Passed Comprehensive Exam (December 2023)</i>	
Vishnu Murali (jointly supervised with Prof. Majid Zamani)	August 2020 – Now
Topic: Restructural Induction for Stochastic Control Systems	
Status: <i>Passed Comprehensive Exam (September 2023)</i>	

Shadi Tasdighi Kalat (jointly supervised with Prof. Sriram S.) Interests: Oblivious Stochastic Games Status: <i>Passed Preliminary Exam (November 2023)</i>	Fall 2022
David Baines Topic: Reinforcement Learning for Financial Planning Status: <i>Joined in Fall 2022</i>	Fall 2022 –Now
Alireza Nadali Interests: Transfer Learning for Control Status: <i>Joined in Fall 2022</i>	Fall 2022–Now
Amin Falah Interests: Reinforcement Learning for Continuous-Time MDPs Status: <i>Joined in Spring 2023</i>	Spring 2023
Lekai Chen Interests: Large Language Models and Reinforcement Learning Status: <i>Joined in Spring 2023</i>	Fall 2023

MS/BS Thesis Advisees (CU Boulder)

1. Saksham Srivastava on “LLMs and Program Synthesis”.
2. Jordan Perr-Sauer (MS) on “Verification of Neural Networks”, Summer 2022–Fall 2022, Computer Science, CU Boulder
3. Zachary Mckevitt (BS) on “Recurrent Neural Networks for Automatic Transient Execution Attack Detection”, co-advised with Tamara Lehman, Fall 2020–Spring 2022, Electrical, Computer, and Energy Engineering, CU Boulder
4. Vishnu Murali (MS, switched to PhD) on “Optimal Repair for Omega-Regular Properties”, 2019-2020, Computer Science, CU Boulder.

MS/BS Research Advisees (CU Boulder)

1. Ali Almutawa, Jr. (BS), co-advised with Fabio Somenzi, Summer 2022, Computer Science, CU Boulder
2. Adam Adl (BS), co-advised with Fabio Somenzi, Summer 2022, Computer Science, CU Boulder
3. Ian Mckibben (BS), co-advised with Fabio Somenzi, Summer 2021, Computer Science, CU Boulder
4. Emily Millican (BS), Spring 2020, Computer Science, CU Boulder. Emily is now an associate Embedded Software Engineer with Ball Aerospace.
5. John Paul Martin (MS), 2018-2020. Co-advised with Prof. Evan Chang, Computer Science, CU Boulder.
6. Juraj Culak (MS), 2017-2019, Computer Science, CU Boulder.
7. Mateo Perez (BS), co-advised with Fabio Somenzi, Summer 2018-Spring 2020, Electrical, Computer, and Energy Engineering, CU Boulder. Mateo is now a PhD student in my group.
8. Shemal Somil Lalaji (MS), Independent Study Project, Fall 2019. Shemal is now a Senior Software Engineer working at Visa.
9. Electrical, Computer, and Energy Engineering (ECEE) Capstone Team Love Bugs (Developing a Self-Driving Car): Mohammed Al Hasani, George Matthew Helmick, Rodolfo Gonzalez Hill V, Myungshin Im, Michael Shea Oliver, and Mateo Perez, co-advised with Fabio Somenzi.

10. Aniruddha Phatak (MS/PhD), co-advised with Pavol Cerny, 2019-2020, Electrical, Computer, and Energy Engineering. CU Boulder.
11. Aniket Lata (MS), co-advised with Evan Chang, Spring 2015–Spring 2016. Electrical, Computer, and Energy Engineering. CU Boulder. Aniket is now a Software Engineer at Qualcomm.
12. Ram Das Diwakaran (MS), co-advised with Sriram Sankaranarayanan, Fall 2016–Spring 2017. Computer Science, CU Boulder. Ram is a Software Development Engineer at Generac.

External Research Advisees

1. Sankalp Gambhir (BS, IIT Bombay) and Mohd. Afzal (PhD candidate, IIT Bombay), co-advised with Krishna S. on “LTL-Based Non-Markovian Inverse Reinforcement Learning” , 2021-2022.
2. Amin Falah (MS, Chennai Mathematical Institute), co-advised with Shibashis Guha on “Omega-Regular Reinforcement Learning for Continuous-Time MDPs”, 2021-2022. Amin Falah is joining CU Boulder as a PhD student in Fall 2022.
3. Vrunda Dave (PhD, IIT Bombay), advised by Prof. Krishna S. (IIT Bombay), 2015–2021. Vrunda Dave’s dissertation won honorable mention in the ACM India 2021-2022 Doctoral Dissertation Award.
4. Kalyani Dole (PhD, IIT Bombay), advised by Prof. Krishna S. (IIT Bombay), 2020–Now.
5. Lakshmi Manasa (PhD, IIT Bombay), advised by Prof. Krishna S. (IIT Bombay), 2013–2015.
6. Aviral Kumar (BS, IIT Bombay), co-advised with Prof. Krishna S. on “The Reach-Avoid Problem for Constant-Rate Multi-mode Systems”, 2016-2017. Aviral is now a PhD student at UC Berkley.
7. M. S. Krishna Deepak (BS, IIT Bombay) on “Incentive Stackelberg Mean-Payoff Games”, 2014-2015. Krishna Deepak is now a PhD student at Cornell Tech.
8. Sagar Jha (BS, IIT Bombay) on “Bounded-rate multi-mode systems based motion planning”, 2014-2015. Sagar Jha is now a PhD student at Cornell.
9. Ankush Das (BS, IIT Bombay) on “On Pure Nash Equilibria in Stochastic Games”, 2014–2015. Ankush Das is a final year PhD student at CMU.
10. Umang Mathur (BS, IIT Bombay) on “Weak Singular Hybrid Automata”, 2014-2015. Umang Mathur completed his PhD at UIUC and he is now an assistant professor at the National University of Singapore.

RESEARCH PRODUCTS

In many areas of Computer Science, including theoretical computer science, the first and primary publication venues are full length papers in the proceedings of selective conferences. Many conferences have extensive two-phase review processes with author responses. The two main outlets are proceedings published by ACM (Association for Computing Machinery) and the Lecture Notes in Computer Science (LNCS) series published by Springer. The DBLP service (<http://dblp.uni-trier.de/db/>) maintains an up-to-date index of Computer Science literature. In the following, the † mark indicates students or post-doctoral researchers that I formally advise, and the ‡ mark indicates other student co-authors. Also, in theoretical computer science publications, author ordering is typically by alphabetical order—most of my paper follow this norm.

G. PEER-REVIEWED CONFERENCE PAPERS

1. **SpecCheck: A Tool for Systematic Identification of Vulnerable Transient Execution in gem5** by Zack McKevitt, Ashutosh Trivedi, Tamara Silbergleit Lehman · PACT 2023 · Pages 265-278
2. **Reinforcement Learning for Omega-Regular Specifications on Continuous-Time MDP** by Amin Falah, Shibashis Guha, Ashutosh Trivedi · ICAPS 2023 · 578-586
3. **Policy Synthesis and Reinforcement Learning for Discounted LTL** by Rajeev Alur, Osbert Bastani, Kishor Jothimurugan, Mateo Perez, Fabio Somenzi, Ashutosh Trivedi · CAV 2023 · Pages 415-435
4. **Transfer Learning for Barrier Certificates** by Alireza Nadali, Ashutosh Trivedi, Majid Zamani · CDC 2023 · Pages 8000-8005
5. **Omega-Regular Reward Machines** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · ECAI 2023 · Pages 972-979 · (Acceptance Rate: 24%)
6. **Information-Theoretic Testing and Debugging of Fairness** by Varya Monjezi[‡], **A. Trivedi**, Gang Tan, Saeid Tizpaz-Niari · International Conference on Software Engineering (ICSE) 2023 · (Acceptance Rate: 26%).
7. **Metamorphic Testing and Debugging of Tax Preparation Software** by Saeid Tizpaz-Niari, Morgan Wagner[‡], Shiva Darian[‡], Krystia Reed, and **A. Trivedi** · International Conference on Software Engineering (ICSE) – Software Engineering in Society (SEIS) –2023 · (Acceptance Rate: 18%)
8. **Mungojerrie: Reinforcement Learning of Linear-Time Objectives** by Ernst M. Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · TACAS 2023 · Pages 527-545 · (Acceptance Rate: 36%)
9. **LTL-Based Non-Markovian Inverse Reinforcement Learning** by Mohd. Afzal[‡], Sankalp Gambhir[‡], Ashutosh Gupta, Krishna S, **A. Trivedi**, and Alvaro Velasquez · AAMAS 2023 · Pages 2857-2859
10. **Reinforcement Learning with Depreciating Assets** by Taylor Dohmen[†] and **A. Trivedi** · AAMAS 2023 · Pages 2628-2630
11. **The Octatope Abstract Domain for Verification of Neural Networks** by Taylor Dohmen[†], **A. Trivedi**, Alvaro Velasquez, K Subramani, Piotr Wojciechowski and Stanley Bak · Formal Methods 2023 · Pages 454-472 · (Acceptance Rate: 29%)
12. **Correct-by-Construction Reinforcement Learning of Cardiac Pacemakers from Duration Calculus Requirements** by Kalyani Dole[‡], Ashutosh Gupta, John Komp[†], Krishna S., and **A. Trivedi** · AAAI 2023 · 14792-14800 · (Acceptance Rate: 19.6%)
13. **Recursive Reinforcement Learning** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · Thirty-sixth Conference on Neural Information Processing Systems (NeurIPS'22) · 9 pages · <https://arxiv.org/abs/2206.11430> · (Acceptance Rate: 25.6%)
14. **An Impossibility Result in Automata-Theoretic Reinforcement Learning** Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · Symposium on Automated Technology for Verification and Analysis (ATVA) 2022 · 16 pages · (Acceptance Rate: 30%)
15. **Optimal Repair For Omega-regular Properties** by Vrunda Dave[‡], Shankara Narayanan Krishna, Vishnu Murali[†] and **A. Trivedi** · Symposium on Automated Technology for Verification and Analysis (ATVA) 2022 · 16 pages · (Acceptance Rate: 30%)
16. **Alternating GFM Automata** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · Symposium on Automated Technology for Verification and Analysis (ATVA) 2022 · 16 pages · (Acceptance Rate: 30%)

17. **k-Inductive Barrier Certificates for Stochastic Systems** by Mahathi Anand[†], Vishnu Murali[†], **A. Trivedi**, Majid Zamani · Conference on Hybrid Systems :Computation and Control (HSCC) 2022 · Pages 12:1-12:11 · (Acceptance Rate: 36%)
18. **Inferring Probabilistic Reward Machines from Non-Markovian Reward Signals for Reinforcement Learning** by Taylor Dohmen[†], Noah Topper[‡], George Atia, Andre Beckus, **A. Trivedi** and Alvaro Velasquez · Proceedings of the International Conference on Automated Planning and Scheduling (ICAPS) 2022, 32(1) · Pages 574–582 · (Acceptance Rate: 30%)
19. **Active Grammatical Inference for Non-Markovian Planning** by Noah Topper[‡], George Atia, **A. Trivedi** and Alvaro Velasquez · Proceedings of the International Conference on Automated Planning and Scheduling (ICAPS) 2022, 32(1) · Pages 647–651 · (Acceptance Rate: 30%)
20. **Controller Synthesis for Omega-Regular and Steady-State Specifications** by Alvaro Velasquez, Ismail Alkhouri[‡], Andre Beckus, **A. Trivedi**, and George Atia · International Conference on Autonomous Agents and Multiagent Systems (AAMAS) 2022 · Pages 1310–1318 · (Acceptance Rate: 27%)
21. **Translating Omega-Regular Specifications to Average Objectives for Model-Free Reinforcement Learning** by Milad Kazemi[‡], Mateo Perez[†], Fabio Somenzi, Sadegh Soudjani, **A. Trivedi**, and Alvaro Velasquez · International Conference on Autonomous Agents and Multiagent Systems (AAMAS) 2022 · Pages 732–741 · (Acceptance Rate: 27%)
22. **Fairness-aware Configuration of Machine Learning Libraries** by Saeid Tizpaz-Niari, Ashish Kumar, Gang Tan, and **A. Trivedi**, · International Conference on Software Engineering (ICSE) 2022 · Pages 909–920 · (Acceptance rate: 28.5%)
23. **Event-Triggered and Time-Triggered Duration Calculus for Model-Free Reinforcement Learning** by Kalyani Dole[‡], John Komp[†], Ashutosh Gupta, Shankara Narayanan Krishna, **A. Trivedi** · Real-Time System Symposium (RTSS) 2021 · Pages 240-252 · (Acceptance Rate: 29%)
24. **Regular Model Checking with Regular Relations** by Vrunda Dave[‡], Taylor Dohmen[†], Shankara Narayanan Krishna, **A. Trivedi** · Fundamentals of Computation Theory (FCT) 2021 · Pages 190-203 · (Acceptance Rate: 31%)
25. **Model-Free Reinforcement Learning for Branching Markov Decision Processes** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · Computer Aided Verification (CAV) 2021 · Pages 651–673 · (Acceptance Rate: 27%)
26. **Model-Free Reinforcement Learning for Lexicographic Omega-Regular Objectives** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · Symposium on Formal Methods (FM) 2021 · Pages 142–159 · (Acceptance Rate: 26%)
- Recipient of Journal Special Issue Invitation.**
27. **Selectively-Amortized Resource Bounding** by Tianhan Lu[†], Bor-Yuh Evan Chang, **A. Trivedi** · Static Analysis Symposium (SAS) 2021 · Pages 286–307 · (Acceptance rate: 55%)
- Winner of the Radhia Cousot Student Best Paper Award**
Recipient of Journal Special Issue Invitation
28. **Faithful and Effective Reward Schemes for Model-Free Reinforcement Learning of Omega-Regular Objectives** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · Symposium on Automated Technology for Verification and Analysis (ATVA) 2020 · 16 pages · (Acceptance Rate: 40%)
29. **Model-Free Reinforcement Learning for Stochastic Parity Games** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, and Dominik Wojtczak · 31st International Conference on Concurrency Theory (CONCUR) 2020 · Pages 21:1–21:16 · (Acceptance Rate: 40%)

30. **Weighted Transducers for Robustness Verification** by Emmanuel Filiot, Nicolas Mazzocchi[‡], Jean-François Raskin, Sriram Sankaranarayanan and **A. Trivedi** · 31st International Conference on Concurrency Theory (CONCUR) 2020 · Pages 17:1–17:21 · (Acceptance Rate: 40%)
31. **Detecting and Understanding Real-World Differential Performance Bugs in Machine Learning Libraries** by Saeid Tizpaz-Niari[†], Pavol Cerny, and **A. Trivedi** · ACM SIGSOFT International Symposium on Software Testing and Analysis (ISSTA) 2020 · Pages 189–199 · (Acceptance Rate: 26.5%)
32. **Data-Driven Debugging for Functional Side Channels** by Saeid Tizpaz-Niari[†], Pavol Cerny, and **A. Trivedi** · Network and Distributed System Security Symposium (NDSS) 2020 · 17 Pages · (Acceptance Rate: 17.4%)
33. **Good-for-MDPs Automata for Probabilistic Analysis and Reinforcement Learning** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · International Conference on Tools and Algorithms for the Construction and Analysis of Systems (TACAS) 2020 · Pages 306–323 · (Acceptance Rate: 30%)
34. **Formal Controller Synthesis for Unknown Continuous-Space MDPs via Reinforcement Learning** by Abolfazl Lavaei[‡], Fabio Somenzi, Sadegh Soudjani, **A. Trivedi** and Majid Zamani · International Conference on Cyber-Physical Systems (ICCPs) 2020 · Pages 98–107 · (Acceptance Rate: 23%)
35. **Quantitative Mitigation of Timing Side Channels** by Saeid Tizpaz-Niari[†], Pavol Cerny, and **A. Trivedi** · Computer Aided Verification (CAV) 2019 · Pages 140-160 · (Acceptance Rate: 26%)
36. **Expected Reachability-Price Games** by Shibashis Guha[‡] and **A. Trivedi** · Formal Modeling and Analysis of Timed Systems (FORMATS) 2019 · Pages 282-300 · (Acceptance Rate: 35%)
37. **Efficient Detection and Quantification of Timing Leaks with Neural Networks** by Saeid Tizpaz-Niari[†], Pavol Cerny, Sriram Sankaranarayanan, and **A. Trivedi**, · Runtime Verification (RV) 2019 · Pages 329-348 · (Acceptance Rate: 65%) · **Recipient of Journal Special Issue Invitation.**
38. **Omega-Regular Objectives in Model-Free Reinforcement Learning** by Ernst Moritz Hahn, Mateo Perez[†], Sven Schewe, Fabio Somenzi, **A. Trivedi**, Dominik Wojtczak · International Conference on Tools and Algorithms for the Construction and Analysis of Systems (TACAS) 2019 · Pages 395-412 · (Acceptance Rate: 31.4%)
39. **Type-directed Bounding of Collections in Reactive Programs** by Tianhan Lu[†], Pavol Cerny, Bor-Yuh Evan Chang, **A. Trivedi** · International Conference on Verification, Model Checking, and Abstract Interpretation (VMCAI) 2019 · Pages 275-296 · (Acceptance Rate: 43%)
40. **Differential Performance Debugging With Discriminant Regression Trees** by Saeid Tizpaz-Niari[†], Pavol Cerny, Bor-Yuh Evan Chang, **A. Trivedi** · AAAI Conference on Artificial Intelligence (AAAI) 2018 · Pages 2468-2475 · (Acceptance Rate: 24%)

L. TEACHING EXPERIENCE

Theory of Computation, CSCI 3434, Instructor Fall 2016

An introductory course to CS theory targetted at the UG students that introduces key results on Automata Theory (expressiveness and limitations of formal models from Finite Automata and Pushdown automata to Turing machines), Computability Theory (Decidability, Undecidability, reductions), and Complexity Theory (Intractability, Completeness, Reductions).

Design and Analysis of Algorithms, CSCI 5454, Instructor Fall 2017

A core graduate-level course introducing basic algorithms at a finer level of detail and more advanced algorithms and data structures.

Theory of Computation, CSCI 5444, Instructor Spring 2017, Fall 2018, Fall 2020, Fall 2021

Similar to CSCI 3434, but it assumes some mathematical maturity and is fast-paced. It covers foundational results on Automata Theory (expressiveness and limitations of formal models from Finite Automata and Pushdown automata to Turing machines), Computability Theory (Decidability, Undecidability, reductions), and Complexity Theory (Intractability, Completeness, Reductions). In Fall'21, I revised the course by integrating the computational learning theory into the curriculum.

Foundations of Cyber-Physical Systems, CSCI 5854, Instructor Spring 2018

A graduate-level course introducing the principles of design and verification of safety-critical cyber-physical systems. This course introduced formal modeling, specification formalisms, and verification approaches for discrete, continuous, and hybrid dynamical systems.

Data Structures, CSCI 2270, Instructor Spring 2019, Spring 2020, Spring 2021, Spring 2022

A core Undergraduate-level course that introduces students to the theoretical foundations and practical considerations in the design and implementation of basic and advanced data structures.

Automata for Verification, Synthesis, and Learning, CSCI 7000, Instructor Fall 2019

This was a new Graduate seminar course on Automata on Infinite Words (Omega Automata) and their applications in Verification, Synthesis, and Learning. While the need for Omega automata in verification and synthesis is well established, the applications to machine learning, in particular reinforcement learning, is informed by my research program at CU Boulder.

M. PROFESSIONAL ACTIVITIES

Grant Review Panels

- National Science Foundations Panelist: 2018, 2019, 2020, 2021, 2022
- Project Proposal Review for the Dutch Research Council (2021)
- Project Proposal Review for the French National Research Agency (2021)
- Project Proposal for the Air Force Office of Scientific Research (2019, 2020, 2021)
- CU Boulder Research & Innovation Office Seed Grant Review: Engineering & Applied Sciences (2020)

Program Chair

- Eighth International Workshop on Symbolic-Numeric Methods for reachability Analysis (SNR'22)
- First Workshop on Verification and Validation of Cyber-Physical Systems (VVCPS'16)
- 2nd Workshop on Algorithmic Verification of Real-Time Systems (AVeRTS'17)
- 1st Workshop on Algorithmic Verification of Real-Time Systems (AVeRTS'16)

Program Committees

- 50th EATCS International Colloquium on Automata, Languages and Programming (ICALP'23)
- 42nd Conference on Foundations of Soft. Technology and Theoretical Computer Science (FSTTCS'22)
- 27th International Conference on Formal Methods for Industrial Critical Systems (FMICS'22)
- 20th International Symposium on Formal Methods and Models for System Design (MEMOCODE'22)
- 25th ACM International Conference on Hybrid Systems: Computation and Control (HSCC'22)
- 12th International Symposium on Games, Automata, Logics, and Formal Verification (GandALF'22)
- 19th International Conference on Formal Methods and Models for System Design (MEMOCODE'21)
- 32nd International Conference on Concurrency Theory (CONCUR'21)
- 24th ACM International Conference on Hybrid Systems: Computation and Control (HSCC'21)
- 12th International Conference on Cyber-Physical Systems (ICCPS'21)
- 35th AAAI Conference on Artificial Intelligence (AAAI'21) . **Top 25% PC Members**
- 33rd International Conference on Computer-Aided Verification (CAV'21)
- 32nd International Conference on Computer Aided Verification (CAV'20)
- 7th International Workshop on Strategic Reasoning (SR'19)
- 19th International Conference on Application of Concurrency to System Design (ACSD'19)
- 12th International Workshop on Numerical Software Verification (NSV'19)
- 22nd ACM International Conference on Hybrid Systems: Computation and Control (HSCC'19)
- 15th ACM SIGBED International Conference on Embedded Software (EMSOFT'19)

- 16th Asian Symposium on Programming Languages and Systems (APLAS'18)
- 6th International Workshop on Strategic Reasoning (SR'18)
- 16th International Conference on Formal Modelling and Analysis of Timed Systems (FORMATS'18)
- 21st International Conference on Hybrid Systems: Computation and Control (HSCC'18)
- 19th International Conference on Application of Concurrency to System Design (ACSD'18)
- ACM/IEEE 9th International Conference on Cyber-Physical Systems (ICCPS'18)
- 1st International Workshop on Multi-objective Reasoning in Verification and Synthesis (MORE'18)
- Workshop on Development aspects of Intelligent Adaptive Systems at ISEC (DIAS'17)
- 18th International Conference on Application of Concurrency to System Design (ACSD'17)
- 19th International Conference on Hybrid Systems: Computation and Control (HSCC'16)
- 27th International Conference on Concurrency Theory (CONCUR'16)
- 13th International Conference on Formal Modelling and Analysis of Timed Systems (FORMATS'15)
- 18th International Conference on Hybrid Systems: Computation and Control (HSCC'15)
- 34th Conference on Foundations of Software Technology and Theoretical Computer Science (FSTTCS'14)
- 12th International Conference on Formal Modeling and Analysis of Timed Systems (FORMATS'14)
- 17th International Conference on Hybrid Systems: Computation and Control (HSCC'14)
- 11th International Conference on Formal Modeling and Analysis of Timed Systems (FORMATS'13)

External Reviews (Conferences)

- **Others.** Artificial Intelligence (1), ACM Transactions on Embedded Computing Systems (1)

Conference Organizing Committee

- 14th Asian Logic Conference (ALC'15)
- 6th Indian Conference on Logic and its Applications (ICLA'15)
- 15th IEEE International Conference on Engineering of Complex Computer Systems (ICECCS'10)

Student Committees

PhD Dissertation Committee

- Hansol Yoon (PhD 2022), advised by Sriram Sankaranarayanan. Computer Science. CU Boulder.
- Vruna Dave (PhD 2021), advised by Krishna S. Computer Science. IIT Bombay.
- Chou Yi (PhD 2021), advised by Sriram Sankaranarayanan. Computer Science. CU Boulder.
- Taisa Kushner (PhD 2020), advised by Sriram Sankaranarayanan. Computer Science. CU Boulder.

PhD Proposal/PhD Comprehensive Examination Committee

- Shawn Meier (passed March 18, 2022), advised by Bor-Yuh Evan Chang. Computer Science. CU Boulder.

- Hansol Yoon (passed Nov 12, 2021), advised by Sriram Sankaranarayanan. Computer Science. CU Boulder.
- Chou Yi (passed Nov 16, 2020), advised by Sriram Sankaranarayanan. Computer Science. CU Boulder.
- Taisa Kushner (passed Nov 11, 2019), advised by Sriram Sankaranarayanan. Computer Science. CU Boulder.

PhD Preliminary Examination Committee

- Monal Narasimhamurthy (passed November 30, 2021), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.
- Kandai Watanabe (passed June 21, 2021), advised by Sriram Sankaranarayanan and Morteza Lahijanian. Aerospace Engineering. University of Colorado Boulder.
- Hansol Yoon (passed Nov. 30, 2020), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.
- Chou Yi (passed April 26, 2019), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.
- Taisa Kushner (passed April 1, 2019), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.
- Shawn Meier (passed May 08, 2018), advised by Bor-Yuh Evan Chang. Computer Science. University of Colorado Boulder.

MS/BS Thesis Committee

- Amin Falah (MS 2022), advised by Shibashis Guha. Computer Science. Chennai Mathematical Institute.
- Zack Mckevitt (BS 2022), advised by Tamara Lehman. Electrical, Computer, and Energy Engineering. University of Colorado Boulder.
- Michael Dresser (BS 2020), advised by Sriram Sankaranarayanan. Computer Science. University of Colorado Boulder.

Department Service

Department of Computer Science. University of Colorado Boulder

- Diversity, Equity, and Inclusion (DEI) committee (and Broadening Participation Plan (BPP) Subcommittee) · Role: **Member**, 2022-Now
- Department-level Search Committee for Open-Discipline Faculty Positions in Engineering and Applied Science · Role: **Member**, 2021-2022
- Department-level Search Committee for Open-Discipline Faculty Positions in Engineering and Applied Science · Role: **Member**, 2022-2023
- Computer Science Instructor Search Committee · Role: **Member**, 2020-2022
- Trustworthy-Software Search Committee · Role: **Chair**, 2019-2020
- Undergraduate Curriculum Committee: Summer 2020-Now
- Graduate Committee: Fall 2017-Spring 2019)

Department of Electrical, Computer, and Energy Engineering. University of Colorado Boulder

- Computer Engineering (ECEE) Search Committee · Role: **Member**, 2018-2019

College Service

- CAREER proposal review committee (2022)
- College-level Search-Committee for Open-Discipline Faculty Positions in Engineering and Applied Science · Role: **Member**, 2023-2024.
- College-level Search-Committee for Open-Discipline Faculty Positions in Engineering and Applied Science · Role: **Member**, 2022-2023.
- College-level Search-Committee for Open-Discipline Faculty Positions in Engineering and Applied Science · Role: **Member**, 2021-2022.
- Mentor for the CURC du Colorado initiative to get more women and non- binary undergraduates involved in computing research. This program was supported by Google exploreCSR program and the CU BOLD Center. (2019–2020)

University Service

- Grant Review Panelist for the Research & Innovation (RIO) Seed Grant proposals for the “Engineering & Applied Sciences” category. (Fall 2020)
- DEI advocate representing CU Boulder in the NSF-CMD-IT LEAP (diversifying future **LEAdership** in the computing **Prof**essoriate) initiative (cmd-it.org/program/current/leap-alliance/)

Community Service

- Equity Committee for Peak to Peak Charter School (Since Spring 2023)

N. RESEARCH SOFTWARE (OPEN SOURCE)

- **Mungojerrie**. Mungojerrie (<https://plv.colorado.edu/mungojerrie/>) is a reinforcement learning tool primarily designed for testing reward schemes for omega-regular objectives, of which Linear Temporal Logic (LTL) is a special case. Mungojerrie contains multiple reinforcement learning algorithms and a probabilistic model checker. Mungojerrie supports models specified in PRISM and ω -automata specified in HOA.
- **Parfait-ML**. Parfait-ML (<https://github.com/Tizpaz/Parfait-ML>) is an open-source tool to detect fairness bugs in the hyperparameter space of ML libraries. Using Parfait-ML, software developers can also exploit the configuration space of ML libraries to improve fairness.
- **DPFuzz and DPDebugger**. DPFuzz (<https://github.com/Tizpaz/DPFuzz>) is an open-source tool for fuzzing and debugging differential performance bugs. DIt is build around DPDebugger (<https://github.com/cuplv/DPDEBUGGER>) that enables *Differential Performance Debugging* to explain unexpected performance differences of a program tested on different inputs.
- **Schmit**. Schmit (<https://github.com/cuplv/Schmit>) is an open-source tool that aims to mitigate side-channel vulnerabilities based on entropy measure (such as Shannon Entropy) with considering the performance overheads.
