⁴ Computer Science has a unique publication structure in that conference proceedings papers are a widely accepted publication venue. Conference proceedings papers are typically subdivided into long papers (4000-8000 words), short papers (2500-4000 words), poster papers, workshop papers, and extended abstracts (varying length). The conference papers are all stringently peer-reviewed, usually by at-least three reviewers and frequently by a meta-reviewer. There is considerable debate as to the value of a conference vs. journal publication, so I publish in both venues. When available, Acceptance rates (ARs) are given for conference papers published since 2012.
