EDUCATION

Graduate Institution:	Georgia Institute of Technology, MS 2015, PhD 2019
Graduate Degrees:	Doctor of Philosophy in Aerospace Engineering, May 2019 (Awarded August 2019) Master of Science in Aerospace Engineering, Awarded May 2015
Graduate GPA:	3.91/4.0
Doctoral Dissertation:	" <i>Magnetohydrodynamic Energy Generation and Flow Control for Planetary Entry Vehicles</i> ," August 2019
Dissertation Advisors:	Professor Robert D. Braun (Advisor) and Professor Mitchell L.R. Walker (Co-Advisor)
Undergraduate Institution:	The University of Alabama, BS 2013, <i>summa cum laude</i>
Undergraduate Degree:	Bachelor of Science in Aerospace Engineering, Awarded May 2013
Undergraduate Minors:	Mathematics, Computer Based Honors
Undergraduate GPA:	4.0/4.0 un-weighted (4.209/4.0 weighted)

RESEARCH OBJECTIVE AND INTERESTS

Research Objective: Investigation of magnetoaerodynamic interaction in aerospace plasmas for hypersonic challenges such as planetary entry
Research Interests: Space Systems and Technology, Magnetohydrodynamics, Planetary Entry, Hypersonics, Plasma Physics, and Mission Design

RESEARCH GRANTS AWARDED

Ali H.K. (PI), "*Design and Integration of Plasma Wind Tunnel Facilities in the Magnetoaerodynamics and Aerospace Plasmas Laboratory*," Alfred P. Sloan Foundation Sloan Scholars Mentoring Network, August 2023 – July 2024, Awarded May 2023. Total funding \$10,000.

Ali H.K. (PI), "*RF/MW Interferometry and Reflectometry Design for an ICP Torch*," Sandia National Labs / DOE FY23 Research Opportunity, November 2022 – September 2023, Awarded November 2022, Total funding \$19,999.

Ali H.K. (Co-PI) and Walker, M. (PI), "*Magnetohydrodynamic Energy Generation and Flow Control for Planetary Entry Systems*," NASA FY19 Unsolicited Proposal, August 2018 – September 2020, Awarded August 2018, Grant Number 80NSSC18K1429. Total funding \$191,000.

Ali H.K. and Braun, R.D., "*Magnetohydrodynamic Energy Generation and In Situ Resource Utilization During Planetary Entry*," NASA Space Technology Research Fellowship, Awarded August 2013 – August 2017, Grant Number NNX13AL82H.

HONORS AND AWARDS

Awards:

Black Engineer of the Year Awards – Modern Day Technology Leader, 2022
 1st Place, 16th International Planetary Probe Workshop Oral Competition, 2019
 2nd Place, 14th International Planetary Probe Workshop Poster Competition, 2017
 2nd Place, 12th International Planetary Probe Workshop Poster Competition, 2015
 1st Place, 11th International Planetary Probe Workshop Poster Competition, 2014
 3rd Place, AIAA Region II Undergraduate Technical Competition, 2013
 3rd Place, AIAA Region II Regional Design Competition, 2013
 AIAA Outstanding Senior Award, The University of Alabama, 2013
 2nd Place, AIAA Region II Undergraduate Technical Competition, 2012
 3rd Place, AIAA Region II Student Open Topic Presentation Competition, 2010

Fellowships and Scholarships:

Jessie and Ralph Pries Endowed Fellowship Award, 2018
 Alfred P. Sloan Foundation Minority PhD Fellow, 2015 – 2018
 NASA Space Technology Research Fellow, 2013 – 2017
 Georgia Institute of Technology Presidential Fellow, 2013 – 2017
 Barry M. Goldwater Scholar, 2012
 Charles L. Seebeck Endowed Scholarship Award, 2012
 Tau Beta Pi Engineering Honor Society Scholarship, 2012
 Alabama Space Grant Consortium Scholarship, 2012
 University of Alabama National Merit Scholarship, 2009 - 2013

TEACHING AND MENTORING EXPERIENCE

Teaching Experience:

Instructor, Thermodynamics and Heat Transfer (ASEN 3113), Spring 2023
Aerospace Engineering Sciences, University of Colorado Boulder

- Instructor of record for lecture course, 125 students total
- Second law of thermodynamics, cycles, and heat transfer mechanisms
- Course includes lectures, numerical homework assignments, and exams

Instructor, Introduction to Hypersonics (ASEN 5519-001), Fall 2022, 2023
Aerospace Engineering Sciences, University of Colorado Boulder

- Instructor of record for two sections, 43 students total
- Hypersonic trajectories, gas dynamics, aerodynamics, and surface heating
- Course includes lectures, coding assignments, and exams

Instructor, Introduction to Aerospace (AE1601), Spring 2020
Aerospace Engineering, Georgia Institute of Technology

- Instructor of record for two sections, 93 students total
- Course included lectures, assignments, and hands-on projects

Mentoring Experience:

Graduate Research Advisor, Spring 2022 – Present

Aerospace Engineering Sciences, University of Colorado Boulder

- Serve as primary advisor to three PhD students in Aerospace Engineering Sciences. Topics include systems and experimental magnetoaerodynamics research projects under my direction.

Undergraduate Research Advisor, Fall 2017 – Spring 2020
Aerospace Engineering, Georgia Institute of Technology

- Mentored undergraduate students as a graduate student (Fall 2017 – Spring 2019), postdoctoral fellow (Summer 2019) and as a research faculty member (Fall 2020 – Spring 2020)
- Outcomes included final reports, research tools, and professional development, such as one student successfully able to secure full-time employment after graduation, and another pursuing graduate education, citing these research experiences

RESEARCH EXPERIENCE

Magnetoaerodynamics and Aerospace Plasmas Laboratory, University of Colorado Boulder (Spring 2022 - Present)

Founder and Director of the University of Colorado Boulder Magnetoaerodynamics and Aerospace Plasmas Laboratory

- Assistant Professor in the Ann and H.J. Smead Department of Aerospace Engineering Sciences at The University of Colorado Boulder
- Laboratory features two rooms, several PhD and MS students, and specializes in experimental studies of hypersonics and aerospace plasmas

Space Systems Design Lab, High Power Electric Propulsion Lab, Georgia Institute of Technology (Fall 2013-Summer 2020)

NASA Space Technology Research Fellowship Topic: Magnetohydrodynamics (MHD) and Planetary entry

- Conducted as a student (Fall 2013 – Spring 2019), Postdoctoral Fellow (Summer 2019), and Research Faculty Member (Fall 2019 – Summer 2020)
- Conducted experimental investigations for MHD and planetary entry with custom continuous, low-density, supersonic plasma wind-tunnel
- Wrote, and served as Co-PI on \$85,000 NASA Sponsored Grant Supporting Work, Awarded August 28th, 2018, Grant Number 80NSSC18K1429
- Successfully proposed and awarded \$106,000 supplement to NASA grant 80NSSC18K1429 to support new experimental work, for total of \$191,000

NASA Jet Propulsion Laboratory Visiting Space Technologist (Summer 2017)

- Worked within the electric propulsion group to further development of magnetohydrodynamic energy generators for planetary entry
- Created an inductively coupled supersonic plasma jet testing facility to facilitate performance characterization for Martian entry conditions
- Drafted and executed inter-agency equipment loan agreement for experiment transfer between NASA and Georgia Tech, Agreement No. 051-18

NASA Innovative Advanced Concepts (NIAC) (Fall 2016 – Spring 2017)

- Collaborated on Phase I NIAC award entitled, “*Mars Molniya Orbit Atmospheric Resource Mining*”
- Performed architecture trade studies involving manufacturing of propellant from the Martian atmosphere using in-situ MHD energy generation.
- Co-author of International Astronautical Conference Paper Entitled, “*Mars Molniya Orbit Atmospheric Resource Mining*”

NASA Jet Propulsion Laboratory Visiting Space Technologist (Summer 2016)

- Collaborated with Dr. James E. Polk of the electric propulsion research group
- Created a supersonic inductively coupled radio frequency plasma to simulate Martian entry plasma conditions

Keck Institute for Space Studies Workshop (August 2015)

- Invited collaborator to workshop entitled, “Three Dimensional (3D) Additive Construction for Space using In-Situ Resources”
- Presented low-gravity technology demonstration mission concept
- Coauthor on Earth and Space 2016 Paper entitled, “*Automated Additive Construction (AAC) for Earth and Space Using In-Situ Resources*”

NASA Langley Research Center Visiting Space Technologist (Summer 2015)

- Worked within Atmospheric Flight and Entry Systems Branch at NASA Langley Research Center (LARC-D205)
- Performed design and modeling work towards flight dynamics influences of magnetohydrodynamic energy generation and flow control

NASA George C. Marshall Space Flight Center Visiting Space Technologist (Summer 2014)

- Collaborated with Dr. Kurt A. Polzin in the high power electric propulsion group at Marshall Space Flight Center (MSFC-ER24)
- Performed design and modeling work towards experimental demonstration of flight capable Magnetohydrodynamic Generator
- First author of NASA TM entitled, “*Proof of Concept Experiments on a Gallium Based Ignitron for Pulsed Power Applications*”

NASA George C. Marshall Space Flight Center

Identification and Testing of Candidate Parts for Rapid Prototyping in Microgravity (Summer 2012)

- Designed candidate parts for rapid prototyping in microgravity. Stress tested rapidly prototyped parts using photoelastic imaging techniques
- Worked to support development towards first 3D printer in space aboard the International Space Station by miniaturizing 3D printer to fit
- Presented final report paper entitled, “*Identifying and Testing Candidate Parts and Tools for Rapid Prototyping in Microgravity*”

Luminescent Imaging Lab, The University of Alabama

Luminescent Photoelastic Coating Measurements in Rapid Prototyping (Fall 2011 – Fall 2012)

- Characterized rapid prototyping material properties (Dimension ABS Plus Thermoplastic)
- Demonstrated applicability of LPC technique to rapid prototypes

Designing and Implementing Instrumentation for Full-Field Dynamic Strain Measurement (Summer 2011)

- Successfully implemented and improved a trigger circuit for dynamic LPC measurement
- Created numerous LabVIEW virtual instruments for data acquisition and instrumentation control
- Captured our first full field dynamic LPC images, prompting AMRDEC to fund us in applying our technique to helicopter blades

Measuring the Dynamic Response of a Luminescent Photoelastic Coating (LPC) (Fall 2010 – Spring 2011)

- Designed and conducted a coating response test for frequency dependence that verified coating response up to dynamic loading of 10 Hz

SERVICE EXPERIENCE

Undergraduate Operations Committee, University of Colorado Boulder Aerospace Engineering Sciences (August 2022 – Present)

- Faculty representative on committee at large and member of subcommittee leading junior aerospace mechanics lab course consolidation

Co-Program Coordinator, Georgia Tech University Center for Exemplary Mentoring (UCEM) (September 2019 – August 2020)

- Goal was to provide resources and professional development targeting under-represented minority graduate students in STEM at Georgia Tech
- Led, planned, and coordinated professional development opportunities, including community development and enrichment seminar programming
- Worked to sustainably integrate and independently fund within Georgia Tech programs currently supported by the Alfred P. Sloan foundation

PROFESSIONAL EXPERIENCE

Assistant Professor, The University of Colorado Boulder, Boulder, CO (July 2022–Present)

- Assistant Professor in the Ann and H.J. Smead Department of Aerospace Engineering Sciences, effective January 2022
- Director of the Magnetoaerodynamics and Aerospace Plasmas Laboratory
- Research expertise in experimental plasma physics, hypersonics, planetary entry, and space systems engineering

Member of Technical Staff (Casual Status), The Aerospace Corporation, Colorado Springs, CO (January 2022–Present)

- Transitioned to casual status Member of Technical Staff in the Space Tactics and Orbit Analysis Section, Astrodynamics Department (consulting)
- Maintain affiliation with The Aerospace Corporation. Provide expertise related to hypersonics, planetary entry, and space systems engineering

Visiting Assistant Professor, The University of Colorado Boulder, Boulder, CO (July 2021–January 2022)

- Incoming Assistant Professor in the Ann and H.J. Smead Department of Aerospace Engineering Sciences, effective January 2022
- Initiated laboratory startup and PhD student recruitment for the Magnetoaerodynamics and Aerospace Plasmas Laboratory
- Provided input and guidance on thermal fluids graduate curriculum in the Ann and H.J. Smead Department of Aerospace Engineering Sciences

Member of Technical Staff, The Aerospace Corporation, Colorado Springs, CO (September 2020–January 2022)

- Member of Technical Staff in the Space Tactics and Orbit Analysis Section, Astrodynamics Department
- Mission design and astrodynamics analyst supporting a variety of missions, modeling efforts, and design tools
- Provide expertise related to hypersonics, planetary entry, and space systems engineering

Research Engineer II, Georgia Institute of Technology, Atlanta, GA (September 2019–August 2020)

- Research Engineer II (Research Faculty Member) in the Daniel Guggenheim School of Aerospace Engineering
- Co-PI of \$191k NASA grant investigating magnetohydrodynamic drag augmentation for planetary entry, NASA Grant No. 80NSSC18K1429
- Co-Program Coordinator for the Georgia Tech University Center of Exemplary Mentoring funded by the Alfred P. Sloan Foundation
- Instructor of record for two sections of AE1601, *Introduction to Aerospace*, in Spring 2020 academic semester

Postdoctoral Fellow, Georgia Institute of Technology, Atlanta, GA (June 2019–August 2019)

- Postdoctoral research fellow in the Daniel Guggenheim School of Aerospace Engineering
- Awarded best overall presentation at the 16th International Planetary Probe Workshop at The University of Oxford, United Kingdom
- Co-PI of NASA grant investigating magnetohydrodynamic energy generation and flow control for planetary entry
- Proposed and awarded \$106,090 extension to NASA grant 80NSSC18K1429 experimentally investigating magnetohydrodynamic drag

Graduate Research Assistant, Georgia Institute of Technology, Atlanta, GA (August 2013–May 2019)

- Thesis advisors: Dr. Robert D. Braun and Dr. Mitchell L.R. Walker in the Daniel Guggenheim School of Aerospace Engineering
- NASA Space Technology Research Fellow from August 2013 – August 2017, leading research in magnetohydrodynamics and planetary entry
- Collaborator on 2016 NIAC Phase I award entitled, “*Mars Molniya Orbit Atmospheric Resource Mining*,” as energy generation specialist
- Wrote, and served as Co-PI on \$85,000 NASA Sponsored Grant Supporting Work, Awarded August 28th, 2018, Grant Number 80NSSC18K1429

Undergraduate Research Assistant, The University of Alabama, Tuscaloosa, AL (August 2012– 2013)

- Worked with Dr. James Paul Hubner in applications of the LPC technique to rapidly prototyped specimens
- Developed an integrated rapid manufacturing approach to create an LPC

NASA George C. Marshall Space Flight Center Intern, Huntsville, AL (Summer 2012)

- Worked with Systems Engineering and the National Center for Advanced Manufacturing to develop an in-space rapid prototyping capability
- Created and tested rapidly prototyped parts for end-use applications

Computer Based Honors Program Lab Manager, The University of Alabama, Tuscaloosa, AL (January 2010 – August 2013)

- Manage the Computer Based Honors Undergraduate Research lab, including software purchasing, server maintenance, and lab development
- Lead 3D Printing Lab Manager: Selected, researched, and acquired a rapid prototyping system currently used in active research

NSF REU Undergraduate Research Assistant, The University of Alabama, Tuscaloosa, AL (Summer 2011)

- Solved problems related to Luminescent Photoelastic Coating Measurements in dynamic loading conditions

Computer Helpdesk Consultant, The University of Alabama, Tuscaloosa, AL (Sep – Dec 2009)

- Serviced student computers and provided support on a variety of issues, ranging from virus removal to website publishing and design

SKILLS AND EXPERTISE

Skills:

Multi-institution Research, Collaboration and Grants
 Engineering Team Leadership and Project Management
 Technical Reports, Problem Solving, and Analysis
 Computer Programming (C++, FORTRAN, MATLAB)
 Experimental Design and Validation
 Computer Hardware Integration, System Administration

Expertise:

Advanced Aerospace Systems Engineering, Optimization
 Computational Fluid Dynamics, Algorithms, Numerical Methods
 Planetary Entry, Descent, and Landing Vehicles
 Hypersonic Aerothermodynamics, Trajectory Design
 Plasma Physics, Magnetohydrodynamics, Electric Propulsion
 Non-Equilibrium Gas Dynamics and Chemical Kinetics

PAPERS AND PRESENTATIONS

Oral Presentations

Ali H.K., “*Intersection of Plasma and Aerospace Engineering: Magnetoaerodynamics and Hypersonics*,” American Physical Society Division of Plasmas Physics Meeting, Denver, CO, October 2023.

Ali H.K., “*Design of an Inductively Coupled Plasma Wind-Tunnel Facility for Magnetohydrodynamics and Planetary Entry*,” International Planetary Probe Workshop, Santa Clara, CA, August 2022.

Ali H.K., “*Engineering Leadership: Perspectives from my education and Career*,” Keynote Lecture, National Society of Black Engineers National Leadership Conference, Boulder, Colorado, June 2022.

Ali H.K., “*Experimental Investigation of Magnetohydrodynamic Energy Generation in Conditions and Configurations Relevant to Planetary Entry Vehicles*,” 16th International Planetary Probe Workshop, Oxford, UK, July 2019.

Ali H.K., “*Magnetohydrodynamics for Planetary Entry Systems*,” 2018 Symposium on Space Innovations, Georgia Institute of Technology, Atlanta, Georgia, November 2018

Ali H.K., “*Magnetohydrodynamic Energy Generation and Flow Control for Planetary Entry Systems*,” Invited Lecture, University of Queensland Centre for Hypersonics, Brisbane, Australia, May 2018

Theses and Dissertations

Ali H.K., “[*Magnetohydrodynamic Energy Generation and Flow Control for Planetary Entry Vehicles*](#),” Doctoral Dissertation, Georgia Tech, 2019

Ali H.K., “[*In Situ Magnetohydrodynamic Energy Generation for Planetary Entry Systems*](#),” Master’s Special Project, Georgia Tech, 2015

Technical Reports

Ali H.K., Hanson V.S., Polzin, K.A., and Pearson, J.B., “[*Proof of Concept Experiments on a Gallium Based Ignitron for Pulsed Power Applications*](#),” NASA TM-2015-218202, April 2015.

White Papers

Dutta, S., et, al (**inc. Ali, H.K.**), “*Aerocapture as an Enhancing Option for Ice Giants Missions*,” White Paper for the Planetary Science Decadal Survey, 2023 – 2032.

Peer-Reviewed Journal Articles

Ali, H.K., Nguyen, D.N., and Braun R.D., “*A Conceptual Modeling Approach for Performance of Magnetohydrodynamic Drag During Planetary Entry*,” AIAA Journal of Spacecraft and Rockets, *In Review August 2023*

Ali H.K., and Braun R.D., “[*Modeling Magnetohydrodynamic Energy Generation and Storage in Planetary Entry System Conceptual Design*](#),” AIAA Journal of Spacecraft and Rockets, Vol. 55, No. 2, pp. 356-364, 2018

Conference Papers

Ali, H.K., “*Magnetoaerodynamics and Hypersonics for Planetary Exploration and National Defense*,” 2024 AIAA SciTech Forum, Orlando, FL, January 2024.

Nugyen, D.N and **Ali, H.K.**, “*Experimental Investigation of Magnetohydrodynamic Flow Interaction for Hypersonics and Planetary Entry*,” 2024 AIAA SciTech Forum, Orlando, FL, January 2024.

Remec, T.J., Flores Govea J.O., and **Ali, H.K.**, “*Design, Modeling, and Implementation of Nozzle and Diffuser Geometry for and Inductively Coupled Plasma Wind Tunnel for Hypersonics and Magnetoaerodynamics*,” 2024 AIAA SciTech Forum, Orlando, FL, January 2024.

Latimer, S., Leong, E., and **Ali, H.K.**, “*Towards an RF/MW Instrumentation Suite Design for an Inductively Coupled Plasma Wind Tunnel*,” 2024 AIAA SciTech Forum, Orlando, FL, January 2024.

Bonnet, K. and **Ali, H.K.**, “*Information-based Guidance and Control for Planetary Entry Systems*,” 2023 AIAA / AAS Astrodynamics Specialist Conference, Big Sky, MT, August 2023.

Nguyen, D.N., Dutta, S., Moses, R.W., **Ali, H.K.**, and Gunter, B.C., “*Feasibility and performance Analysis of Magnetohydrodynamic Control for Aerocapture at Neptune*,” 2022 AIAA / AAS Astrodynamics Specialist Conference, AAS 22-803, Charlotte, NC, August 2022.

Mueller, R.P., Braun, R.D., Sforzo B., Sibille, L., Gonyea, K., and **Ali H. K.**, “[*Mars Molniya Orbit Atmospheric Resource Mining*](#),” in 68th International Astronautical Congress, Adelaide, Australia, September 2017

R Mueller; S Howe; D Kochmann; **H Ali**; et al., “[*Automated Additive Construction \(AAC\) for Earth and Space Using In-situ Resources*](#),” Proc. of the Fifteenth Biennial ASCE Aerospace Division International Conference on Engineering, Science, Construction, and Operations in Challenging Environments (Earth & Space 2016). Orlando, Florida, USA, 11 - 15 Apr 2016. Reston, Virginia, USA: American Society of Civil Engineers.

Ali H.K., and Braun R.D., “[*Effects of Magnetohydrodynamic Energy Generation on Planetary Entry Vehicle Flight Dynamics*](#),” in 2015 AIAA Propulsion and Energy Forum, Orlando, Florida July 2015.

Ali H.K., and Braun R.D., “[*Application of Magnetohydrodynamic Energy Generation to Planetary Entry Vehicles*](#),” in 2014 AIAA Propulsion and Energy Forum, Cleveland, Ohio, July 2014.

Conway, ML, **H Ali**, and JP Hubner, “*Determining the Dynamic Response of a Luminescent Photoelastic Coating*,” SEM XII International Congress & Exposition on Experimental & Applied Mechanics, Paper 110, June 2012.

Gerber, DR, **HK Ali** and JP Hubner, “*Dynamic Strain Measurements with a Luminescent Photoelastic Coating*,” Proceedings of SPIE Sensors and Smart Structures Technologies for Civil, Mechanical, and Aerospace Systems 2011, ed. M Tomizuka, 7981:Paper 214, March 2011.

Poster Presentations

Leong, E., Haw, M., and **Ali, H.K.**, “*Development of Langmuir and Spatially Resolved OES Diagnostics for Arc Jet Shock and Boundary Layer Measurements Relevant to Atmospheric Re-Entry Environments*,” in 2023 American Physical Society Division of Plasmas Physics Meeting, Denver, CO, October 2023.

Latimer, S., Leong, E., and **Ali, H.K.**, “*RF/MW Instrumentation Suite Design for an Inductively Coupled Plasma Wind Tunnel*,” in 2023 American Physical Society Division of Plasmas Physics Meeting, Denver, CO, October 2023.

Nguyen, D.N. and **Ali, H.K.**, “*Experimental Investigation of Magnetohydrodynamic Flow Interaction for Planetary Entry*,” in 2023 International Planetary Probe Workshop, Marseille, France, August 2023.

Remec, T.J. and **Ali, H.K.**, “*Diffuser Design for an Inductively Coupled Plasma Wind Tunnel Facility for Hypersonic Planetary Entry and Magnetoaerodynamic Experiments*,” in 2023 International Planetary Probe Workshop, Marseille, France, August 2023.

Bonnet, K. and **Ali, H.K.**, “*A New Approach to the EDL Trajectory and Atmosphere Reconstruction Process*,” in 2023 International Planetary Probe Workshop, Marseille, France, August 2023.

Govea, J.O. and **Ali, H.K.**, “*Aerothermodynamic Modeling of an Inductively Coupled Plasma Wind Tunnel for Magnetohydrodynamics and Planetary Entry Vehicles*,” in 2023 International Planetary Probe Workshop, Marseille, France, August 2023.

Leong, E., Haw, M., Sahai, A., and **Ali, H.K.**, “*Toward Hall Magnetohydrodynamic Power Generation and Drag Augmentation Using a Coaxial-Electrode Configuration During Hypersonic Entry*,” in 2023 International Planetary Probe Workshop, Marseille, France, August 2023.

Nguyen, D.N., Dutta, S., Moses, R.W., **Ali, H.K.**, and Gunter, B.C., “*Feasibility and Performance Analysis of Magnetohydrodynamic Control for Aerocapture at Neptune*,” in 2022 International Planetary Probe Workshop, Santa Clara, California, August 2022.

Ali H.K., Polk, J.E., and Braun R.D., “[*Experimental Demonstration of Magnetohydrodynamic Energy Generation in Conditions and Configurations Relevant to Planetary Entry Vehicles*](#),” in 14th International Planetary Probe Workshop, The Hague, The Netherlands June 2017.

Gonyea, K.C., Mueller R.P., Sforzo B., Sibille, L., **Ali H.K.**, and Braun R.D., “[*Sustained Mars Exploration Through Mars Atmospheric and Surface Resource Utilization*](#),” in 14th International Planetary Probe Workshop, The Hague, The Netherlands June 2017.

Ali H.K., and Braun R.D., “[*Magnetohydrodynamically Enhanced Deceleration for Planetary Entry Vehicles*](#),” in 13th International Planetary Probe Workshop, Laurel, Maryland, June 2016.

Gonyea, K.C., **Ali H.K.**, and Braun R.D., “[*Magnetohydrodynamic energy Generation and Atmospheric Breathing Supersonic Retropropulsion for Mars Descent*](#),” in 13th International Planetary Probe Workshop, Laurel, Maryland, June 2016.

Ali H.K., and Braun R.D., “[*System Performance Assessment for Magnetohydrodynamic Energy Generation During Planetary Entry*](#),” in 12th International Planetary Probe Workshop, Cologne, Germany, June 2015.

Ali H.K., and Braun R.D., “[*In Situ Magnetohydrodynamic Energy Generation for Planetary Entry Vehicles*](#),” in 11th International Planetary Probe Workshop, Pasadena, California, June 2014.
