

Amir H. Behzadan, Ph.D., M.ASCE, M.ASEE, F.ExCEED

Professor • Department of Civil, Environmental, and Architectural Engineering
Fellow • Institute of Behavioral Science, Natural Hazards Center
Director • CIBER Lab (Connected Informatics and Built Environment Research)
University of Colorado Boulder

Amir Behzadan is a Professor in the Department of Civil, Environmental and Architectural Engineering at the University of Colorado Boulder. He is also a Fellow in the Institute of Behavioral Science (IBS), where the Natural Hazards Center is located. He received his Ph.D. in civil engineering (2008) and his M.S. in construction engineering and management (2005), both from the University of Michigan, Ann Arbor. Prior to joining the University of Colorado Boulder, he was a professor at Texas A&M University and was affiliated with the Hazard Reduction and Recovery Center (HRRC). Behzadan is the director of the Connected Informatics and Built Environment Research (CIBER) Lab, where researchers investigate grand challenges at the intersection of the society and built/natural environments (including disaster resilience, climate change adaptation, jobsite safety, workplace health and ergonomics) through the design, validation, and dissemination of human-centered, responsible and affordable AI/ML solutions. In 2022, he gave a TEDx Talk on how AI can help communities better understand flood risk. His research and scholarly activities are supported by federal and state agencies as well as the private sector. Behzadan serves on the editorial board of the journal of Construction Engineering and Management (ASCE), and is a member of advisory board for the journal of Smart and Sustainable Built Environment (Emerald). He has been an active member of ASCE since 2000, and has served as secretary, vice-chair, and chair of the Visualization, Information Modeling, and Simulation (VIMS) committee under the ASCE Computing Division.
