DESIGN WORK

Co-labored with and supervised 17 students and their 3,113 hours of work designing and building "steampunk" design tables, work tables, work benches, "Victorian" tool wall and cabinets for the *Idea Forge* and the *Idea Forge MakerSpace*. I was the primary designer and along with Professor Diane Sieber and *MakerSpace* Engineer Josh Colyer.

The Andrews Grand Orrery, commissioned and worked with 11 students to design and fabricate a mechanical model of the solar system for Andrews Hall (see <https://www.colorado.edu/today/2013/02/04/cu-boulder-engineering-students-unveil-grand-orrery-feb-11>)

The Andrews Victorian Reading Room, commissioned, co-designed and worked with two teams of engineering students to transform a study room in Andrews Hall into a Victorian Reading Room with fabricated paneled walls, built-in bookshelves, tin ceiling, etc. This project is currently in progress and temporally suspended due to COVID.

Herbst Program Seminar Table, designed and made a 14-person wood seminar table with a 907 pound stone in its center. It is designed so that no more than two people are in the same seating plane and therefore have direct eye contact without leaning forwards or backwards with all 14 people at the table.

WORKS IN PROGRESS

In-Between the Event: Paul, Dostoevsky and the Christian Now (expected to be approximately 240 pages and completed in 2021/22).

Beneath the Stain (a 51,863 word novel exploring Platonic, Kierkegaardian, Heideggerian and Ricoeurian psychology/philosophy within the context of what I call a “hermeneutics of abuse.” Currently submitted to a literary agent and under review.

The New Isaac and Ishmael: Pauline, Rabbinic and Augustinian Constructions of Narrative Identity (expected to be approximately 120 pages).
