Education

| | | |
|---|---------------------|---------------------------|
| Brown University, Providence, RI | Applied Mathematics | Ph.D. May 1998 |
| Thesis title: <i>Algorithms for Large-Scale Parallel Simulation of Unsteady Incompressible Flows in Three-Dimensional Complex Geometries.</i> | | |
| Brown University, Providence, RI | Applied Mathematics | M.S. May 1994 |
| University of Vermont, Burlington, VT | Mathematics | M.S. May 1992 |
| (Completed course requirements for B.S and M.S. in Computer Science.) | | |
| Duke University, Durham, NC | Physics | B.S. May 1986 (Cum Laude) |

Professional Experience

| | |
|--------------|---|
| 8/02-present | Professor, Department of Computer Science, University of Colorado at Boulder. |
| 9/04-present | Affiliated Faculty, Department of Applied Mathematics, University of Colorado at Boulder. |
| 8/06-3/13 | Scientist III, Computational and Information Systems Laboratory, NCAR. |
| 9/06-3/12 | Manager, Computer Science Section, Computational and Information Systems Laboratory, NCAR. |
| 9/09-9/10 | Faculty Director, Research Computing, University of Colorado at Boulder. |
| 9/05-9/06 | Manager, Numerical Methods Group, Computational and Information Systems Laboratory, NCAR. |
| 4/04-9/06 | Manager, Computer Science Group, Computational and Information Systems Laboratory, NCAR. |
| 8/02-9/06 | Faculty Guest, MCS Division, Argonne National Laboratory. |
| 8/02-8/06 | Scientist II, Computational and Information Systems Laboratory, NCAR. |
| 9/01-8/02 | Assistant Computer Scientist, MCS Division, Argonne National Laboratory. |
| 9/00-8/02 | Lecturer, Department of Computer Science, University of Chicago. |
| 1/00-8/02 | Fellow, Computation Institute, University of Chicago and Argonne National Laboratory. |
| 6/98-9/01 | Research Associate, Department of Computer Science, University of Chicago (Member of the DOE ASC Center for Astrophysical Thermonuclear Flashes). |

6/98-9/01 Visiting Research Fellow, MCS Division, Argonne National Laboratory.
1/98-6/98 Teaching Fellow, Division of Applied Mathematics, Brown University.
9/94-1/98 Research Assistant, Division of Applied Mathematics, Brown University.
6/93-9/97 Teaching Fellow, Summer Studies Program, Brown University.
9/89-6/92 Teaching Assistant, Dept. of Computer Science and Dept. of Math. and Statistics, U. of Vermont.

Scientific and Technical Accomplishments

- Co-developer of incompressible flow solver NEK5000 and its immersive visualization system.
- Co-developer of the Tufo-Fischer parallel direct solver method (also known as the XXT method).
- Member of the development team for version 1.62 of FLASH, an adaptive mesh refinement reactive flow code.
- Lead designer of a service-oriented architecture for Grid-BGC, an end-to-end solution for terrestrial ecosystem modeling.
- Member of the development team for HOMME, a high-order dynamical core development environment, from which CAM-SE is derived.
- Team leader for the non-hydrostatic and multi-species transport development in HOMME.
- Consortium leader for the acquisition and operation of the IBM Blue Gene/L system Frost.
- Leader of the Research Systems Evaluation Team (ReSET) and technology-tracking program at NCAR.
- Manager of TeraGrid / XSEDE operations at NCAR.
- Project manager and principal architect of the CU Janus supercomputer (#31 on the June 2010 Top500) and its co-designed facility.

Honors and Awards

05/14 Dean's Faculty Fellowship.
05/09 Dean's Faculty Fellowship.
07/06 IBM Faculty Award.
05/06 Dean's Faculty Fellowship.
07/05 IBM Faculty Award.
06/05 Dean's Award for Professional Progress.
11/00 Gordon Bell Prize for FLASH, Special Category (with FLASH team).
11/99 Gordon Bell Prize for NEK5000, Special Category (with Dr. Paul Fischer).

Publications

Thesis

1. H.M. Tufo, "Algorithms for Large-Scale Parallel Simulation of Unsteady Incompressible Flows in Three-Dimensional Complex Geometries", Ph.D. Thesis, Brown University, May 1998.

Presentations

The Long and Winding Road to Exascale, Presented at the AGU Workshop on "Applications of Big Data and High-Performance Computing in Earth Sciences," San Francisco, CA, December 9, 2019. (Invited)

The Long and Winding Road to Exascale, , ScalPerf'19: Scalable Approaches to High Performance and High Productivity Computing, Bertinoro, Italy, September 25, 2019. (Invited)

The Long and Winding Road to Exascale, TACC, U. Texas, Austin, TX, August 1, 2019. (Invited)

The Long and Winding Road to Exascale, Imperial College, London, England, June 24, 2019. (Invited)

Parallel Processing: Challenges for the Next Quarter Century, Panel @ 33th IEEE International Parallel & Distributed Processing Symposium (IPDPS 2019), Rio de Janeiro, Brazil, May 22, 2019. (Invited).

The Long and Winding Road to Exascale, RIKEN-CSS, Kobe, Japan, October 19, 2018. (Invited)

More than a Big Machine: Why We Need Multiple Breakthroughs to Tackle Cloud Resolving Climate, University of Tokyo Kashiwa Campus, Japan, October 18, 2018. (Invited)

The Long and Winding Road to Exascale, University of Tokyo Kashiwa Campus, Japan, October 12, 2018. (Invited)

The Long and Winding Road to Exascale, University of Tokyo Hongo Campus, Japan, October 12, 2018. (Invited)

Janus: A Co-Designed Facility and Supercomputer, University of Tokyo Kashiwa Campus, Japan, October 12, 2018. (Invited)

Janus: A Co-Designed Facility and Supercomputer, University of Tokyo Hongo Campus, Japan, October 12, 2018. (Invited)

The Long and Winding Road to Exascale, Supercomputing Center of the Chinese Academy of Sciences, Beijing, China, August 23, 2018. (Invited)

The Long and Winding Road to Exascale, 2018 International Workshop of Many-Core Solutions of Computing Problems in Science, Engineering, and Big Data (MPSEED'18), Kunming, China, August 19, 2018. (Invited)

Big Data Opportunities in Climate Science, 2017 International Workshop of Many-Core Solutions of Computing Problems in Science, Engineering, and Big Data (MPSEED'17), Guiyang, China, August 23, 2017. (Invited)

Big Data Opportunities in Climate Science, Geller-Fest Workshop, Big Data in Geosciences: From Earthquake Swarms to Consequences of Slab Dynamics, Tokyo, Japan, May 26, 2017. (Invited).

High-Performance Computing Hardware for Big Data, International Conference on Seismic Imaging, Inversion, and Visualization Methods, Hainan, China, Jan 8, 2017. (Invited)

More than a Big Machine: Why We Need Multiple Breakthroughs to Tackle Cloud Resolving Climate, 2016 International Workshop of Many-Core Solutions of Computing Problems in Science, Engineering, and Big Data (MPSEED'16), Chengdu, China, August 14, 2016. (Invited.)

The Road to Exascale, ScalPerf¹⁵: Scalable Approaches to High Performance and High Productivity Computing, Bertinoro, Italy, September 23, 2015. (Invited)

A NonHydrostatic Atmospheric Dynamical Core in CAM-SE, Applied Modelling & Computation Group Seminar Series, Imperial College, London, England, June 5, 2015. (Invited)

Elastic Cluster Computing, Annual Conference on Engineering and Information Technology (ACEAIT), Kyoto, Japan, March 23, 2015.

Computational Science Center Overview, INSPUR HPC Connection Workshop at SC13, Denver, CO, November 20, 2013. (Invited)

Large-Scale Elastic Computing with Virtual Machines, Imperial College, June 21, 2013. (Invited)

Evaluating Intel's Xeon and Xeon Phi for Climate Science, Tsinghua University, May 7, 2013. (Invited)

Large-Scale Elastic Computing with Virtual Machines, INSPUR, May 7, 2013. (Invited)

Evaluating Intel's Xeon and Xeon Phi for Climate Science Graduate University for Chinese Academy of Sciences, May 6, 2013. (Invited)

Large-Scale Elastic Computing with Virtual Machines, Beijing Beilong Super Cloud Computing Co., Ltd., May 6, 2013. (Invited)

Elastic IaaS Cloud Computing for Scientific Workflows, Supercomputing Center for the Chinese Academy of Sciences, May 2, 2013. (Invited)

Analyst Crossfire Panel, 27th National High Performance Computer and Communications Conference, Newport, RI, March 28, 2013. (Invited).

Big Data Panel, 27th National High Performance Computer and Communications Conference, Newport, RI, March 27, 2013. (Invited).

Janus: A Co-Designed Facility and Supercomputer, Shanghai Supercomputing Center, Shanghai, China, May 18, 2012. (Invited)

Building Community Cyberinfrastructure, Mount Sinai School of Medicine, New York, New York, April 2, 2012. (Invited)

NCAR and Intel's Help in Building the Janus System at the University of Colorado, SC'11 Intel Theater, Portland, Oregon, November 15, 2011. (Invited)

Janus: A Co-Designed Facility and Supercomputer, SC'11 Dell Booth Talk, Portland, Oregon, November 15, 2011. (Invited)

More than a Big Machine: Why We Need Multiple Breakthroughs to Tackle Cloud Resolving Climate, ScalPerf'11, Bertinoro, Italy, September 22, 2011. (Invited)

Janus: A Co-Designed Facility and Supercomputer, IDC HPC Users Forum, San Diego, California, September 8, 2011. (Invited)

Janus: A Co-Designed Facility and Supercomputer, Power and Cooling Web Cast, www.ScientificComputing.com, July 27, 2011. (Invited)

Janus: A Co-Designed Facility and Supercomputer, Imperial College, London, England, June 24, 2011. (Invited)

More than a Big Machine: Why We Need Multiple Breakthroughs to Tackle Cloud Resolving Climate, Universiti Brunei Darussalam, Brunei, May 30, 2011. (Invited.)

A Petascale Capable Discontinuous Galerkin Dynamical Core for Climate Simulation, 2011 International Conference on Finite Elements in Flow Problems (FEF 11), Munich, Germany, March 23, 2011.

World's Largest HPC Cluster in a Container, IBM T.J. Watson, Yorktown Heights, New York, January 31, 2011. (Invited)

University of Colorado Partners with Dell to Create World's Largest HPC Cluster in a Container, SC'10 Dell Booth Talk, New Orleans, Louisiana, November 16, 2010. (Invited)

Spanning the Spectrum, University of Tennessee, Knoxville, Tennessee, September 15, 2010. (Invited.)

Spanning the Spectrum, Oak Ridge National Laboratory, Oak Ridge, Tennessee, September 15, 2010. (Invited.)

Developing a Cloud Computing Charging Model for HPC, CIT-10, Bradford, U.K., June 24, 2010.

Building for the Petascale, University of Tokyo, Tokyo, Japan, April 13, 2010. (Invited)

Energy Efficient Data Centers for HPC, How Lean and Green do we need to be?, SC'09 Panel, Portland, Oregon, November 19, 2009. (Invited)

More than a Big Machine: Why We Need Multiple Breakthroughs to Tackle Cloud Resolving Climate, Sun HPC Consortium, Portland, Oregon, November 14, 2009. (Invited.)

Climate Challenges in the Massively Parallel Era, IDC HPC Users Forum, Superior, CO, September 9, 2009. (Invited)

National Center for Atmospheric Research, University of Colorado at Boulder, Sun Partnership, Sun HPC Consortium, Hamburg, Germany, June 22, 2009. (Invited.)

Climate Models for the Massively Parallel Era, Imperial College, London, England, June 9, 2009. (Invited.)

Petascale Atmospheric General Circulation Models for CCSM, CCPP Science Team Meeting, Bethesda, MD, April 8, 2009. (Invited.)

DG-Based Atmospheric General Circulation Models, FEF-09, April 3, 2009.

Climate Models for the Massively Parallel Era, University of Tokyo, Tokyo, Japan, October 3, 2008. (Invited)

Climate Models for the Massively Parallel Era, ScalPerf '08, Bertinoro, Italy, September 11, 2008. (Invited)

Climate Models for the Massively Parallel Era, Hartree Center, Daresbury, England, July 14, 2008. (Invited)

Adapting Grid Services for Urgent Computing Environments, ICSoft 2008, Porto, Portugal, July 6, 2008.

Fortran@50 Application / User Viewpoint, Fortran@50 Panel, SC'07 Panel, Reno, NV, November 15, 2007. (Invited)

Petascale Atmospheric General Circulation Models, Graduate University of the Chinese Academy of Sciences, Beijing, China, October 29, 2007. (Invited)

Petascale Atmospheric General Circulation Models, Supercomputing Center of the Chinese Academy of Sciences, Beijing, China, October 26, 2007. (Invited)

Petascale Atmospheric General Circulation Models, Parallel Computing 2007 Conference, Julich, Germany, September 4, 2007. (Invited)

Blue Gene/L and TeraGrid at NCAR - A Catalyst for Petascale Science, Computing in Atmospheric Sciences Workshop, Annecy, France, September 11, 2007. (Invited)

The Blue Gene/L System at NCAR - A Catalyst for Petascale Science, SP-XXL Summer Meeting, Munich, Germany, July 19, 2007. (Invited)

The Blue Gene/L System at NCAR - A Catalyst for Petascale Science, ScicomP 13, Munich, Germany, July 18, 2007. (Invited)

Enabling High Productivity Climate Science, University of Tokyo, Tokyo, Japan, April 22, 2007. (Invited)

Computational Science - Supporting NCAR's Mission as an Integrator, Supercomputing Center of the Chinese Academy of Sciences, Beijing, China, May 31, 2007. (Invited)

Geoscience Driven Challenges for the Petascale Era, IBM Deep Computing Institute External Advisory Board Meeting, Boulder, CO, November 8, 2006. (Invited)

A Discontinuous Galerkin Dynamical Core for Atmospheric Modeling, Department of Earth, Atmospheric and Planetary Sciences, M.I.T., Boston, MA, April 27, 2006. (Invited)

System Software Issues for the Future, 3rd BG/L Systems Software and Applications Workshop, Tokyo, Japan, April 20, 2006. (Invited)

HOMME: A High-Performance Scalable Atmospheric Modeling Framework, 12th SIAM Conference on Parallel Processing for Scientific Computing, San Francisco, CA, February 23, 2006.

Experiences with Building a Grid Computing Environment for Simulating the Global Carbon Cycle, Earth System Modeling Framework (ESMF) on the Grid Workshop, 4th ESMF Community Meeting, Boston, MA, July 20, 2005. (Invited)

A Scalable Discontinuous Galerkin Atmospheric Model, Third M.I.T. Conference on Computational Fluid and Solid Mechanics, Boston, MA, June 16, 2005.

Cyberinfrastructure Strategic Plan, NCAR Directors' Retreat, Boulder, CO, June 13, 2005. (Invited)

Towards an Efficient and Scalable Discontinuous Galerkin Atmospheric Model, 19th IEEE International Parallel & Distributed Processing Symposium, Denver, Colorado, April 8, 2005.

Early Experiences with the 360TF IBM BlueGene/L Platform, International Workshops on Advances in Computational Mechanics, Tokyo, Japan, November 5, 2004. (Invited)

Improved Transport Processes for CCSM, Climate Change Prediction Program PI Meeting, Seattle, Washington, October 19, 2004. (Invited)

Terascale Spectral Element Algorithms and Implementations, SCI Distinguished Lecture Series, University of Utah, Salt Lake City, Utah, February 21, 2003. (Invited)

Spectral Element Methods for the Shallow Water Equations, SIAM Conference on Computational Science and Engineering (CSE03), San Diego, CA, February 10, 2003. (Invited)

Terascale Spectral Element Algorithms and Implementations, European Center for Research and Advanced Training in Scientific Computation (CERFACS), Toulouse, France, December 12, 2002. (Invited)

High Performance Spectral Element Methods for Simulation of Transition in Vascular Flows, Scaling to New Heights Workshop, Pittsburgh Supercomputing Center, Pittsburgh, PA, May 20, 2002.

Stroke Busters in Turbulent Blood Flow, SC'02, November 20, 2002. (Invited)

Scalable Tools, Solvers, and Performance, Adaptive and High-Order Methods with Applications in Turbulence Workshop, Geophysical Turbulence Program of NCAR, Boulder, Colorado, February 4, 2002. (Invited)

A High Performance Nonconforming Spectral Element Code for Simulating Incompressible Flows on Thousands of Processors, 13th International Conference on Domain Decomposition Methods (DD13), Lyon, France, October 10, 2000. (Invited)

Numerical Study of Hairpin Vortices Induced by a Hemispherical Roughness Element, 20th International Congress of Theoretical and Applied Mechanics, Chicago, Illinois, August 30, 2000.

A Spectral Element Code for Incompressible Hydrodynamics, 1st ASCI Scalability Workshop, Santa Fe, New Mexico, May 11, 2000. (Invited)

A Parallel Direct Solver Package for Coarse-Grid Problems, 6th Copper Mountain Conference on Iterative Methods, Copper, Colorado, April 7, 2000.

Terascale Spectral Element Algorithms and Implementations, SC99, Portland, Oregon, November 18, 1999. (Gordon Bell Talk)

Hairpin Vortex Formation, a Case Study for Unsteady Visualization, 41st Cray Users' Group Conference, Minneapolis, Minnesota, May 27, 1999.

Research Projects

- DOE PSAAP, “Center for Micromorphic Multiphysics Porous and Particulate Materials Simulations within Exascale Computing Workflows”, \$13,600,000, 7/1/2020 – 6/30/2025, Regueiro (PI), Brown, Clarke, Doostan, Tufo. Center co-director.
- NSF OCI, “Stampede 2: Operations and Maintenance for the Next Generation of Petascale Computing”, \$51,500,000, 10/1/17-6/30/23, U. Texas/TACC, Stanzione (PI). \$400,000 subcontract to CU Boulder. \$100,000 supplement bringing total to \$500,000.
- NSF OCI, “Enabling, Enhancing, and Extending Petascale Computing for Science and Engineering”, \$51,500,000, 1/7/13-9/30/17, U. Texas/TACC, Stanzione (PI). \$50,000 subcontract to CU Boulder (supplement).
- NIH NCR, “High-memory Supercomputer for Proteomics, Text Mining and Microbiome Research”, \$1,900,000, Knight (PI), Tufo, Hunter, Old, Ahn, Dowell-Dean, Cohen, Goerg, Clauset. April 2013 – April 2015.
- NSF OCI, “Enabling, Enhancing, and Extending Petascale Computing for Science and Engineering”, \$51,500,000, 3/1/13-2/28/17, U. Texas/TACC, Boisseau (PI). \$400,000 subcontract to CU Boulder.
- DOE BER, “A Petascale Non-Hydrostatic Atmospheric Dynamical Core in the HOMME Framework”, \$1,547,436, 9/1/2011-8/31/2015, H.M. Tufo (PI), Nair, Dennis.
- NSF, “CSR:Medium:Collaborative: Stochastically Robust Resource Allocation for Computing”, 10/1/2009 – 9/30/2012, CSU - \$1,042,470, H.J. Siegel (PI), T. Maciejewski, A. Rosenberg, CU - \$125,024, H Tufo (PI), NCAR - \$31,972 R. Loft (PI).
- NSF MRI, “Acquisition of a Supercomputer by the Front Range Computing Consortium”, \$2,796,500, 8/1/08 – 7/31/12. Tufo (PI), Syvitski, Julien, Loft, Mandel.
- DOE BER, “Toward a Non-Hydrostatic HOMME”, \$580,000, 9/1/2009 - 8/31/2011. Tufo (PI), Nair, Lauritzen.
- DOE SciDAC, “Petascale Atmospheric General Circulation Models for CCSM”, \$1,475,906, 8/15/07 – 8/14/11. Tufo (PI), Nair, Dennis, St-Cyr, and Tribbia.
- IBM Faculty Award, “Developing Scalable Weather and Climate Applications for IBM Linux Power Systems and the Next Generation of IBM Advanced Architectures”, \$20,000. Gifted in July 2006.
- IBM Faculty Award, “Developing Next Generation Weather and Climate Applications for IBM Linux Power and BlueGene Systems”, \$30,000. Gifted in July 2005.
- IBM Shared University Research, “Developing Next Generation Weather and Climate Applications on IBM Linux Power Systems”, \$590,033. Tufo (PI), Loft, and Thomas. Gifted in January 2005. Equipment serves at front end to Frost system and is still in use.
- IBM Shared University Research, “Equipment for Bio-Fluid Flow Investigation”, \$154,808. Tufo (PI), Cai, Manteuffel, McCormick, Loft, Thomas, and Fischer. Gifted in September 2004.
- DOE SciDAC, “Improved Transport Processes for CCSM”, \$683,100, 9/15/04 – 9/14/07. Tufo (PI), Nair, and Rasch.

- NSF MRI, “Collaborative Research: Acquisition of an IBM BG/L Supercomputer”, \$1,053,558, 7/1/04 – 6/30/07. CU Boulder - Tufo (PI), Cai, Farhat, Manteuffel, and McCormick; NCAR – Loft (PI), Coen, Grabowski, and Thomas; CU Denver - Mandel (PI) and Knyazev.
- NSF ITR, “Collaborative Research: An Integrated Simulation Environment for High-Resolution Computational Methods in Electromagnetics with Biomedical Applications”, \$1,000,000, 1/15/04 - 1/14/08. UNM - Warburton (PI) and Hagstrom; Arizona - Gelb (PI), Brio, and Renaut; CU Boulder - Tufo (PI); Brown - Hesthaven (PI).
- NASA AIST, “Implementing an Efficient Supercomputer-Based Grid Compute Engine for a High-Resolution, High-Volume Terrestrial Carbon Cycle Model”, \$1,272,116, 8/1/03 - 7/31/06. Thornton (PI) and Tufo.
- NSF CMG, “An Adaptive Mesh, Spectral Element Formulation of the Well-Posed Primitive Equations for Climate and Weather Simulations”, \$501,006, 10/1/02 - 9/30/05. Thomas (PI) and Tufo.
- DOE/Sandia, “LDRD: Massively Parallel Scalable Atmosphere Model”, \$650,000, 10/1/03 - 9/30/06. Spatz (PI), Taylor, Boslough, Thomas, and Tufo.
- NSF NRAC, “Simulation of Transition in Vascular Flows”, 850,000 SUs cumulative on the TCS system at the Pittsburgh Supercomputing Center, 4/1/02 - 3/31/05. Tufo (PI), Fischer, Loth, and Bassiouny.
- UCAR, Faculty Support, \$54,000, 9/1/02 - 5/31/04.
- UCAR, Student Fellowship, \$4,336, 2/19/03 - 9/31/03.
- CU, Dean's Award for Professional Progress, \$5,000. 2005.
- Received \$61,000 from NCAR and \$181,000 from Oliver McBryan’s NSF ARI grant to purchase the 132-processor Linux cluster, Hemisphere, 2003.
- Received \$3,000 in equipment from Intel Corporation to expand the Hemisphere cluster, 2004.

Professional Service

Department, College, and University

- Member of CEAS Research Proposal Review Committee, 2020-present.
- Dean’s First Level Review Committee, August 2014 – June 2017.
- Faculty Research Panel for the Engineering Honors Program, February 27, 2014.
- Allocation Committee for the Janus Supercomputer, January 2011 – December 2014.
- Boulder Campus Cyberinfrastructure Board, September 2010 – September 2014.
- Research Computing/Cyberinfrastructure Committee, January – June 2010.
- Reviewer for the 2008, 2009, and 2010 CU Boulder Campus Innovative Seed Grant Program.
- Interdisciplinary Computational Science and Engineering Initiative Steering Committee, January – December 2008.
- Founder of the Computational Science Center (<http://csc.cs.colorado.edu/>).
- CS Department’s Numerical Analysis Ph.D. Preliminary Examination Committee, September 2002 – 2008.
- CS Department’s Graduate Committee, September 2002 – August 2006 and September 2007 – May 2011.
- Task Force Member, Colorado Initiative in Molecular Biotechnology, January 2004 – July 2008.
- CS Department’s Computer Operations Committee, September 2004 – May 2005.

- CS Department's Computer Science Education Lab (CSEL) steering committee, September 2003 – May 2004.
- CS Department's faculty search committee in the area of Bioinformatics, spring 2004.
- Organizer of the CS Department's 2004, 2005, 2006, 2009, and 2010 Ph.D. Recruitment Weekends. Co-organizer, Doug Sicker (2004, 2005), Rick Han (2009), and Evan Chang (2010).
- Wrote successful student fee proposal to support the CSEL. Proposal included infrastructure plan for evolving the CSEL into a casual and welcoming workspace with wireless access as well as computing, storage, and printing services.

Community

- External Advisory Board, Emerging Analytics Center, University of Arkansas at Little Rock, February 2013 – whenever formally dissolved.
- HPC500 advisory group, January 2013 – present.
- XSEDE Resource Allocation Committee (XRAC), January 2010 – present. (Formerly TRAC – TeraGrid RAC)
- Steering Committee, IEEE Cluster XY Conference Series. (2013-2018)
- NSF GEO Big Data Review Panel, July 2015.
- NIH/CU S10 Allocations Committee, January 2014 – January 2015.
- UCAR/NCAR/UCP Distinguished Achievement and Outstanding Accomplishment Awards Jury, September 2010 – present. (Three-year appointment.) (Jury Chair 2011) (Scientific Publications Chair 2012)
- Organizer of the NCAR CISL Seminar Series, August 2006 – March 2012.
- Microsoft Technical Computing Executive Advisory Council, January 2010 – December 2011.
- Golden Energy Computing Organization (GECO) advisory committee. January 2008 – December 2010.
- NCAR Data Center Project Executive Committee, September 2005 – July 2007.
- NCAR SCD Lightning (Linux Cluster) Procurement Technical Committee, December 2003 – April 2004.
- NCAR Advanced Study Program reviewer.
- Member of NCAR's Geophysical Turbulence Program. (Disbanded 2012).
- Program Committee Chair, Applications Area, Technical Papers, SC15, 2015. (With Gabrielle Allen, UIUC)
- Best Student Paper Committee, SC15, 2015.
- Student Mentor, SC15, 2015-2019.
- Program Committee, Grids and Clouds Area, Technical Papers, SC13, 2013.
- Program Committee, 30th IEEE International Parallel & Distributed Processing Symposium, 2015.
- Program Committee, 29th IEEE International Parallel & Distributed Processing Symposium, 2015.
- Program Committee, 28th IEEE International Parallel & Distributed Processing Symposium, 2014.
- Program Committee, ICSEA 15, 2015. (<http://www.iaria.org/conferences2015/ICSEA15.html>)
- Program Committee, ICSEA 14, 2014. (<http://www.iaria.org/conferences2014/ICSEA14.html>)
- Program Committee, CTA2014, 2014. (<http://www.cta2014.org>)

- Co-organizer, “Applications of Big Data and High-Performance Computing in Earth Sciences,” AGU Fall Meeting Workshop, San Francisco, CA, December 9, 2019. With Dave Yuen and Gabriele Morra.
- “Optimization of High BPF Applications for Hierarchical Parallel Architectures”, Minisymposium, 14th U.S. National Congress on Computational Mechanics, with Hiroshi Okuda. (2019)
- Co-organizer, “Software Design and Implementation for Hierarchical Parallel Architectures”, Minisymposium, 15th World Conference on Computational Mechanics, with David Littlewood and Hiroshi Okuda. (2020)
- Program Committee, 15th World Conference on Computational Mechanics, with David Littlewood and Hiroshi Okuda. (2020)
- Chair, 5th International Workshop on Advances in High-Performance Computational Earth Sciences: Applications and Frameworks (IHPCES) in conjunction with the 15th International Conference on Computational Science. (2015) (With Xing Cai, SDSC)
- Program Committee, 4th International Workshop on Advances in High-Performance Computational Earth Sciences: Applications and Frameworks (IHPCES) in conjunction with the 14th International Conference on Computational Science. (2014)
- Program Committee, 3rd International Workshop on Advances in High-Performance Computational Earth Sciences: Applications and Frameworks (IHPCES) in conjunction with the 13th International Conference on Computational Science. (2013)
- Chair, 2nd International Workshop on Advances in High-Performance Computational Earth Sciences: Applications and Frameworks (IHPCES) in conjunction with the 12th International Conference on Computational Science. (2012) (With Yifeng Cui, SDSC)
- Program Committee, 1st International Workshop on Advances in High-Performance Computational Earth Sciences: Applications and Frameworks (IHPCES) in conjunction with the 11th International Conference on Computational Science. (2011)
- Program Committee, 13th IEEE/ACM International Symposium on Cluster, Cloud and Grid Computing (CCGrid). (2013)
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2020) ***CANCELED***
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2019)
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2018)
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2017)
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2016)
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2015)
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2014)
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2013)
- Program Committee, SIAM International Conference on Computational Science (ICCS). (2012)
- Program Committee, 19th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-20). (2020)
- Program Committee, 18th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-19). (2019)
- Program Committee, 17th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-18). (2018)

- Program Committee, 16th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-17). (2017)
- Program Committee, 15th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-16). (2016)
- Program Committee, 14th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-15). (2015)
- Program Committee, 13th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-14). (2014)
-
- Program Committee, 12th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-13). (2013)
- Program Committee, 11th IEEE International Conference on Trust, Security and Privacy in Computing and Communications (TrustCom-12). (2012)
- Program Committee, ACM 26th International Conference on Supercomputing (ICS). (2012)
- Program Committee, TACC-Intel Highly Parallel Computing Symposium. (2012)
- Technical Program Chair, IEEE Cluster 2013. (2013)
- Tutorial Chair, IEEE Cluster 2011. (2011)
- Technical Program Committee, IET International Conference on Frontier Computing – Theory, Technologies and Applications. (2012)
- Technical Program Committee, IET International Conference on Frontier Computing – Theory, Technologies and Applications. (2010)
- Steering Committee, 11th LCI International Conference on Linux Clusters. (2010)
- Program Committee, IEEE 10th International Conference on Computer and Information Technology. (2010)
- Program Committee, IEEE 12th International Conference on Computational Science and Engineering. (2009)
- Conference Chair and Steering committee, 10th LCI International Conference on Linux Clusters. (2009)
- Program Committee, IEEE 11th International Conference on Computational Science and Engineering. (2008)
- Technical Program Chair and Steering Committee, 9th LCI International Conference on Linux Clusters. (2008)
- Program Committee, 9th IEEE International Conference on Computational Science and Engineering. (2008)
- Program Committee, 8th LCI International Conference on Linux Clusters. (2007)
- Poster Chair and Program Committee, 2007 IEEE International Conference on Cluster Computing. (2007).
- Program Committee, 7th LCI International Conference on Linux Clusters. (2006)
- Program Committee, 6th LCI International Conference on Linux Clusters. (2005)
- Organized a mini-symposium entitled, “Iterative Solvers for Geoscience Applications”, for the Eighth Copper Mountain Conference on Iterative Methods. Co-organizer, Steve Thomas. (2004)
- Reviewer for QNRF 7th and 8th Cycles.
- Reviewer for SIAM Review.
- Reviewer for SIAM Journal on Scientific Computing.
- Reviewer for AIAA Journal.

- Reviewer for the Journal of Computational Physics.
- Reviewer for the Sixth IEEE Symposium on Parallel and Distributed Systems.
- Reviewer for the 6th, 7th, and 8th LCI International Conference on Linux Clusters.
- Reviewer for the SIAM International Conference on Computational Science (ICCS) 2005.
- Science Fair Judge, Sacred Heart of Jesus. (2008, 2012-15)

Teaching

- Since I had already developed a hands-on graduate HPC course for the department (CSCI 5576) and revamped its undergraduate counterpart (CSCI 4576), I developed new courses to complement 4576/5576. The result is CSCI 4830 and 7000, which are seminar courses exploring the past, present and future of high-performance computing through readings, presentations, and lively discussions. First taught Spring 2021.
- CSCI 2400, Fall 2019.
- Asked to develop second semester High-Performance Scientific Computing course.
- Proposed CSCI 5576, the graduate version of CSCI 4576, High-Performance Scientific Computing. Designed to satisfy CS breadth requirements and serve as a core course for various computational science programs created in recent years (e.g., in Applied Mathematics). Obtained Department and College approval in 2003. Final Graduate School approval given in January 2004 and first taught in spring 2004.
- Revised CSCI 4576/5576, High-Performance Scientific Computing, to include detailed MPI tutorial, parallel algorithms and architectures lectures, Grid computing, TeraGrid resources, and the Computational Science Center's computing facilities.
- Developed a course entitled Introduction to Scientific Computing, which I subsequently taught for 4 years at Brown University.
- Developed a course entitled Introduction to Parallel Computing and a course entitled Fundamentals of Computer Programming II (C++) that I taught at the University of Chicago.
- Holder of a teaching certificate from Brown University's Sheridan Center for the Advancement of College Teaching.

Professional Research Associates

- David Hall, Ph.D. in Physics, University of Colorado at Boulder, 2010. August 2012 – February 2015. Currently at Nvidia.
- Robert Klöforn, Ph.D. in Applied Mathematics, University of Freiburg, 2009. October 2012 – June 2014. Currently at NORCE.
- Michael Oberg, CU Boulder Research Faculty, March 2013 – May 2014. (with Rob Knight)
- Christoph Erath, Ph.D. in Numerical Mathematics, University of Ulm, Ulm, Germany, 2010. August 2010 – July 2013. Currently at Darmstadt University.
- Saroj Mishra, Ph.D. in Atmospheric Science, Indian Institute of Science, Bangalore, India, 2009. December 2008 – November 2011. (Currently a Professor in the Department of Earth and Space Sciences at the Indian Institute of Space Science and Technology.)
- Hae-Won Choi, Ph.D. in Mechanical Engineering, University of Toronto, Toronto, Canada, 2005. June 2005 – May 2008. (Currently at SEMES.)
- Jack Chen, Ph.D. in Atmospheric Sciences, University of Washington, 2005. September 2005 – May 2008. (Currently at NCAR.)

- Vani Cheruvu, Ph.D. in Mathematics, Indian Institute of Technology, Madras, India, 2000. October 2004 – October 2005. (Currently at University of Toledo.)
- Sean McCreary, M.S. degrees in Computer Science and Astrophysical, Planetary, and Atmospheric Sciences, University of Colorado at Boulder, 1995/1994. November 2004 – September 2007. (Currently at Cryptolect.)
- Adam Boggs, B.S. degree in Computer Science, University of Colorado at Boulder, February 2006 – October 2007. (Currently at Cardinal Peak.)

Graduate Students

- Arash Mehraban, Ph.D. candidate in Computer Science. (Advisor) ***Conditionally passes final exam so ABD***
- Lei Bao, Ph.D. in Applied Mathematics. (Advisor – Currently at Google)
- Guy Cobb, Ph.D. candidate in Computer Science. (Former Advisor Ph.D. Program – Currently at Google)
- Dmitry Duplyakin, M.S. in Computer Science. (Former Advisor Ph.D. Program – Currently at University of Utah)
- Pate Motter, M.S. in Computer Science. (Former Advisor Ph.D. Program – Currently at Amazon)
- Theron Voran, M.S. in Computer Science. (Advisor - Currently at Rackspace)
- Paul Marshall, Ph.D. candidate in Computer Science. (Advisor - Currently at Stardog Union)
- Matthew Woitaszek, Ph.D. in Computer Science. (Advisor - Currently at Google)
- Jason Cope, Ph.D. in Computer Science. (Advisor - Currently at DataDirect Networks.)
- Michael Levy, Ph.D. in Applied Mathematics. (Advisor - Currently at NCAR.)
- Ben Kadlec, Ph.D. in Computer Science. (Advisor - Currently at Uber.)
- Jon Hurst, M.S. in Computer Science. (M.S. Thesis Advisor)
- Elizabeth Fischer, M.S. in Computer Science. February 2005 – June 2006. (Research Assistant)
- Dilmohan Narula, M.S. in Telecommunications, June 2009 – May 2010. (Research Assistant)
- Venkatachalapati Rayipati, M.S. in Telecommunications, May 2010 – July 2010. (Research Assistant)
- Jon Lusk, M.S. candidate in Computer Science, Aug 2010 – June 2011. (Research Assistant)
- Daniel McDonald, Ph.D. in Computer Science. (Thesis Committee)
- John Dennis, Ph.D. in Computer Science. (Thesis Committee)
- Ernesto Prudencio, Ph.D. in Computer Science. (Thesis Committee)
- Hassa Alsukhni, Ph.D. in Electrical and Computer Engineering. (Thesis Committee)
- Stefan Muzala, Ph.D. in Electrical and Computer Engineering. (Thesis Committee)
- Alex Settle, Ph.D. in Electrical and Computer Engineering. (Thesis Committee)
- Joshua Kihm, Ph.D. in Electrical and Computer Engineering. (Thesis Committee)
- Serguei Ovtchinnikov, Ph.D. in Computer Science. (Thesis Committee)
- Micah Hamady, Ph.D. in Computer Science. (Thesis Committee)
- Josh Nolting, Ph.D. in Applied Mathematics. (Thesis Committee)
- Alireza Nejadmala, Ph.D. candidate in Mechanical Engineering. (Thesis Committee)
- Wei Xu, Ph.D. in Computer Science. (Thesis Committee)
- Alireza Nejadmala, Ph.D. in Mechanical Engineering. (Thesis Committee)
- Antonio Gonzalez Pena, Ph.D. in Computer Science. (Thesis Committee)

Undergraduate Students

- Alejandro Cantarero, B.S. in Applied Mathematics. August 2004 – May 2005. (Senior Thesis Advisor)
- Sarah Macumber, B.S. in Applied Mathematics. August 2004 – May 2005. (Senior Thesis Advisor)
- Markus Eret, B.S. candidate in Computer Science. (Senior Thesis Committee)
- Michael Oberg, B.S. candidate in Electrical and Computer Engineering. August 2003 – July 2007. (REU Student)
- Wes Hofman, B.S. in Computer Science. October 2004 - April 2005. (REU Student)
- Brandon Werdel, B.A. in Mechanical Engineering. June 2005 – May 2007. (REU Student)
- Ezra Waterland, B.S. in Computer Science. August 2004 – May 2007. (REU Student)
- Eliot Armstrong, B.S. in Astronomy. June 2004 - January 2005. (REU Student)
- Bobby House, B.S. in Computer Science, January 2006 – May 2007. (REU Student)
- Eric Schoeller, B.S. in Computer Science, January 2006 – May 2007. (REU Student)
- Ben Fell, B.S. in Computer Science, January 2008 – May 2009. (Earn-Learn Student)
- Ian Shorrocks, B.S. in Studio Arts, August 2007 – May 2011. (REU Student)
- Dustin Leverman, B.A. in Economics, August 2007 – May 2008. (NCAR Student)
- Sirisha Akkala, B.S. in Computer Science, August 2008 – December 2008. (REU Student)
- Brad Walker, non-degree student in Computer Science, June 2009 – November 2009. (Research Assistant)
- Eric Baer, B.S. in Computer Science, September 2010 – December 2010. (Earn-Learn Student)
- Bradley Henke, B.S./M.S. candidate in Computer Science, September 2011 – May 2012. (Earn-Learn Student)
- Yuan Sui, B.S. candidate in Computer Science, September 2012 – May 2013. (Earn-Learn Student)
- Michael Ton, B.S. candidate in Computer Science, September 2013 – May 2014. (Earn-Learn Student)
- Richard Green, B.S. candidate in Computer Science, September 2013 – May 2014. (Earn-Learn Student)
- Vitali Dzekhtsiarevich, B.S. candidate in Computer Science, September 2013 – December 2015.
- Matthew Haney, B.S. candidate in Computer Science, September 2014 – May 2015. (Earn-Learn Student)

Software

- XXT and XYT parallel direct solver packages for coarse-grid problems on 10,000s of processors. Currently included in the latest distribution of PETSc.
- GS gather-scatter communication package performs nearest-neighbor communication operations (e.g., direct stiffness summation). Has built-in support for numerous commutative and associative binary operations as well user-defined operations.
- NEK5000 flow code simulates unsteady incompressible flows. Handles general two- and three-dimensional flow configurations, supports a broad range of boundary conditions, and provides multiple-species transport. Winning 1999 Gordon Bell entry.

- High-Order Methods Modeling Environment (HOMME). Atmospheric dynamical core for climate modeling. Included in CCSM4 release.
- FLASH, an adaptive mesh refinement reactive flow code used to study astrophysical thermonuclear explosions.
- HOMME, a high-order dynamical core development environment for building atmospheric general circulation models. Forms basis for various CAM dynamical cores (e.g., CAM-SE).
