## Professional Experience

**Senior Instructor and Research Associate, Department of Geological Sciences**

2016-present                      University of Colorado                      Boulder, CO

Teach courses in field geology, scientific writing, earth materials, physical geology, geology of Colorado, field geology of South Australia. Supervise teaching assistants who instruct the introductory geology lab course. Conduct research into the geologic evolution of the Colorado Rockies, Colorado Plateau, and Queensland, Australia.

**Senior Instructor, Undergraduate Advisor, and Research Associate, Department of Geological Sciences**

2007-2016                      University of Colorado                      Boulder, CO

Taught courses in field geology, historical geology, physical geology, critical thinking, scientific writing, sedimentology, global climate change, geology of Colorado. Supervise teaching assistants who instruct the introductory geology lab course. Serve as advisor to 280 undergraduate geology majors and 50 minors. Conduct research into the geologic evolution of the Colorado Rockies, Colorado Plateau, and Queensland, Australia.

**Visiting Research Fellow, School of Earth and Environmental Sciences**

2014 Jan-June                      University of Wollongong                      Wollongong, NSW, Australia

Collaborated with University of Wollongong faculty to research the tectonic history of eastern Australia as it transitioned from long-lived convergent margin to active rift zone to passive margin.

**Associate Chair for Undergraduate Studies, Dept. of Geological Sciences**

2010-2013                      University of Colorado                      Boulder, CO

Assisted the chair to coordinate the department's undergraduate teaching activities. Duties included chairing the curriculum committee and student appeals committee and coordinating issues related to undergraduate courses.

**Writing Instructor**

Summer 2012                      UNAVCO                      Boulder, CO

Taught writing course for UNAVCO Research Experiences in Solid Earth Science for Students (RESESS) summer interns. The program is dedicated to increasing the diversity of students entering the geosciences.

**Faculty Member, Science Department**

2006 – 2007                      Red Rocks Community College                      Lakewood, CO

Taught Physical Geology and Historical Geology courses. Coordinated the geology program, with responsibility for budgets, hiring and supervision of all adjunct instructors, and maintenance of cooperative agreements with local high schools and Colorado School of Mines.

**Faculty Member, Environmental Studies Program**

1997-2006                      Prescott College                      Prescott, AZ

Taught introductory and upper-level undergraduate courses in physical geology, historical geology, geomorphology, oceanography, environmental geology, field methods, religion and science, and rock climbing and geology. Faculty serve without rank; I held a 5-year contract, the longest granted by the college.

**Interim Associate Dean for Academic Affairs**

2004-2005                      Prescott College                      Prescott, AZ

Responsible for all student academic issues including conducting academic workshops, monitoring satisfactory academic progress, investigating grievances, and determining disciplinary actions. Served on various committees, including enrollment management to improve student retention, the academic exceptions committee, and the committee that initiated curricular development and changes.

**Faculty, Semester at Sea**

Spring 2003                      University of Pittsburgh                      Pittsburgh, PA

Taught experiential introductory courses in Oceanography and Earth System Science and an upper-division class entitled Environmental Science, Ethics, and Public Policy. Course content was tailored to be relevant to the ports of call of the *S.S. Universe Explorer* as it circumnavigated the globe, with an emphasis on an interdisciplinary examination of the issue of global climate change.

**Post-Doctoral Research Associate, Earth Science Department**

1993-1995                      University of California                      Santa Cruz, CA

Determined the rate of surface uplift for the Finisterre Mountains of Papua New Guinea. Work entailed collection of stratigraphic and geomorphic data sets, including biostratigraphy, magnetostratigraphy, strontium isotope stratigraphy, physical rock properties, and digital elevation models.

**Lecturer, Earth Science Department**

1994 University of California Santa Cruz, CA

Taught a graduate-level course in sedimentary basin analysis.

**Seismic Processing Intern**

1991 Amoco Production Company Denver, CO

Processed marine seismic lines and modeled gravity and magnetic data.

**Field Operations Manager**

1986-1988 Sorex, Inc. Salt Lake City, UT

Collected and processed aeromagnetic data. Job responsibilities included managing a crew of three to ten at field sites across the United States and in Ghana, West Africa. Managed operations budgets in excess of \$100,000 annually. Authored several of the company's data processing software programs.

**Education**

**Ph.D., Earth Sciences**

1993 University of California Santa Cruz, CA

Thesis title: Structural and sedimentologic history of a progressive arc-continent collision: The Finisterre Range, northern Papua New Guinea.

**B.Sc., Geophysics/Geology double major**

1986 University of Utah Salt Lake City, UT

Graduated *magna cum laude*.

**Professional Service**

- 1989-present Guest speaker for numerous community groups
- 1995-present Peer reviewer of manuscripts for professional journals, including: *Geological Society of America Bulletin*, *Tectonophysics*, *Geosphere*, *Marine Geology*, *Sedimentary Geology*, *Tectonics*, *Journal of Southeast Asian Earth Science*, *Lithosphere* as well as for NSF proposals, books, GSA field trip guides, and for research proposals submitted to Grand Canyon National Park
- 2013 Desktop Reviewer for UNESCO World Heritage Site applications
- 2013 Chair-Field Trip Committee for the 2013 Geological Society America annual meeting
- 2009, 2011 Member, Environmental Studies Advisor search committees, CU
- 2007 Member, Physics and Astronomy faculty search committee, Red Rocks Community College
- 2005-2006 Reviewer of standardized test questions to assess K-4 student achievement relative to NRC National Science Education Standard
- 1998-2002 Faculty Chair, Prescott College

2000 Member, Prescott College Presidential Search Committee  
 1999 Member, University of California, Santa Cruz Ph.D. Qualifying Exam Committee for candidate Laura Wallace  
 1998 Chair, Prescott College Academic Dean Search Committee  
 1998 Member, Prescott College Env't Policy Faculty Search Committee

**Awards**

2017 Rocky Mountain Association of Geologists' Geoscience in the Media Award-*Geology Underfoot Along Colorado's Front Range*  
 1992-1993 ARCS Foundation Fellowship  
 1989-1992 National Science Foundation Graduate Fellowship  
 1991 Best Paper Award – GEM Conference of the Australasian Institute of Mining and Metallurgy  
 1991-1992 SEPM Promising Young Geoscientist Award  
 1989-1993 Soc. Exploration Geophysicists Education Foundation Scholarship  
 1988-1989 University of California Regents Fellowship  
 1983-1986 Exxon Undergraduate Scholarship in Geophysics  
 1983 AMAX Field Geology Scholarship

**Graduate Students Advised**

2017-present Dual CU-University of Wollongong PhD candidate Jamie Glass is using cosmogenic radionuclide dating and (U-Th)/He geochronology to trace the evolution of eastern Australia's Great Escarpment. Co-advisors are CU's Rebecca Flowers and University of Wollongong's Alexandru Codilian and Tim Cohen.

**Professional Memberships**

American Geophysical Union; Geological Society of America

**Grants Received**

**Rocky Mountain Biological Laboratory (RMBL) Research Award**

2017-2019 University of Colorado Boulder, CO

Lead PI for \$4960 award to conduct a thermochronology and geomorphology project at RMBL that will form Noah McCorkel's Undergraduate Honors Thesis.

**Chancellor's Award for Excellence in STEM Education**

2016-2018 University of Colorado Boulder, CO

Lead PI for two grants totaling \$16,750 to create a collaborative undergraduate geoscience research community within the Department of Geological Sciences.

**Rocky Mountain Biological Laboratory (RMBL) Travel Award**

2016 University of Colorado Boulder, CO

Lead PI for \$850 award to conduct a pilot thermochronology project at RMBL that formed Coleman Hiatt's Undergraduate Honors Thesis (*summa cum laude*).

- 2005-2007 Partner in the Arizona leg of the EarthScope project. Participated in the siting of USArray broadband seismometers. In collaboration with Arizona State University's Matt Fouch, conducting seismic receiver function analysis of USArray data to determine crustal composition and thickness of the southern Colorado Plateau.
- 1998 Member of Global Positioning System crustal motion study in the Papua New Guinea collision zone. Managed a three-person crew at several data collection sites.
- 1994 Member of Alvin submersible diving program studying fluid flow exiting the Costa Rica accretionary prism. Participated in two dives that located and examined chemosynthetic biological communities.
- 1992 Member of seismic, side-scan sonar, and potential field data collection research cruise in the Solomon Sea.
