TEACHING

New Course Development

Fall, 2014, AREN 4506, Pre-construction Estimating and Scheduling, Undergraduate Elective, 3 credit hours. Developed a course for students that teaches pre-construction project planning, estimating and scheduling. Students are introduced and complete estimating and scheduling assignments, complete multiple labs for software, including RS Means and P6, and schedule and estimate a project.

Spring, 2012, CVEN 5206 Design Development, Graduate Course, 3 credit hours. Redeveloped a course for students that analyzes the financial feasibility of projects through net operating income (NOI) statements and design decisions that influence financial feasibility. Describes the interdisciplinary process of design decisions, managing the design process, and feasibility considerations with the local municipalities. Culminates in a response to a Request for Proposal (RFP) with the design, conceptual estimate, conceptual schedule, and financial statements for a project.

Spring, 2011, CVEN 5836 Managing Projects and Organizations, Graduate Course, 3 credit hours. Created a new course for students, combining 3 lectures from prior course on Engineering Organizations, 7 lectures from Global Projects and Organizations, newly developed the remaining lectures to include case studies, readings and discussion on strategy, resource management, organizational structure, stratification, and managing groups and teams.

Spring, 2010, CVEN 5836 Global Projects and Organizations, Graduate Elective, 3 credit hours. Created a new course for students focusing on global projects and organizations. This course examines institutional differences between project participants and looks at current literature regarding the challenges of global projects- social movements, project governance, etc.
