As director of LISA, I supervised graduate students, faculty & staff in fulfilling LISA's mission to train statisticians to become interdisciplinary collaborators, provide research infrastructure to enable and accelerate high impact research, and engage with the community in outreach

activities to improve statistical skills and literacy. I trained 225 statisticians to become interdisciplinary statistical collaborators and have personally collaborated on more than 450 projects. Under my direction, LISA assisted a total of 9429 clients to apply statistics to advance their research, including collaborating on 2719 research projects, providing statistical advice for 2962 visitors to LISA Walk-in Consulting, and teaching 3748 attendees via 196 short courses how to apply statistics in their research.

TEACHING EXPERIENCE

Associate Professor

2016 – present

University of Colorado Boulder, Department of Applied Mathematics

Boulder, CO

I developed and teach (once) STAT 2600, "Introduction to Data Science," for undergraduate statistics and applied mathematics students to learn how to import, tidy, explore, visualize, summarize, and model data as a member of a data science team and then communicate the results of these analyses to answer relevant questions and make decisions in R using reproducible workflows.

I developed and taught (once) APPM 4505/5505, "Advanced Collaboration," for undergraduate and graduate applied mathematics students to learn advanced data science collaboration skills essential for their success as interdisciplinary collaborators.

I developed and teach (five times) APPM 4500/5500, "Statistical Collaboration," to teach undergraduate and graduate applied mathematics students professional skills essential for their success as interdisciplinary collaborators. Based on the pedagogical structure of *Team-based Learning*, students learn to communicate and collaborate based on course readings, in-class exercises, homework, and projects. Students work on 3-4 LISA projects each semester.

I taught (once) APPM 8000, "Applied Mathematics Colloquium." I invited weekly speakers and then elicited feedback from the enrolled graduate students about the departmental colloquia.

Associate Research Professor

2015 – 2016

Virginia Tech, Department of Statistics

Blacksburg, VA

I taught (twice) STA 5024, "Communication in Statistical Collaborations," which I developed to teach graduate statistics students non-technical skills essential for their success as collaborative statisticians. Based on the pedagogical structure of *Team-based Learning*, students learn to communicate and collaborate based on course readings, in-class exercises, homework, and projects.

Assistant Research Professor

2008 – 2014

Virginia Tech, Department of Statistics

Blacksburg, VA

I taught (six times) STA 4024, STA 4984, STA 5024, and STA 5984. These are various versions of the course "Communication in Statistical Collaborations," which I developed to teach

undergraduate and graduate statistics students essential non-technical skills. I developed the courses to use the pedagogical methods of *Team-based Learning* to “flip” the classroom so students will communicate and collaborate with each other during in-class exercises.

Head Teaching Assistant

2007 – 2008

Duke University, Department of Statistical Science

Durham, NC

As Head TA I managed 12 TAs for “Introductory Statistics.” I was the organizer and TA for “Statistical Science First Year Experience,” and a TA for “Generalized Linear Models” and “Probability/Measure Theory.”

Teaching Assistant

2004 – 2005

Duke University, Institute of Statistics and Decision Sciences

Durham, NC

I was a teaching assistant for “Generalized Linear Models,” “Probability/Stat Models,” “Statistics for Engineers,” and “Introductory Statistics.”

Summer Instructor

2003 and 2004

Duke University, Institute of Statistics and Decision Sciences

Durham, NC

As instructor for “Introductory Statistics” twice, I was solely responsible for all lectures, laboratories, homeworks, quizzes, and exams.
