PROFESSIONAL APPOINTMENTS

- University of Colorado Boulder
Full Professor, Mechanical Engineering (08/2019 – present)
- McGill University (Montreal, QC)
Adjunct Professor, Mechanical Engineering (08/2019 – present)
Full Professor, Mechanical Engineering (08/2017 – 08/2019)
Associate Professor, Mechanical Engineering (06/2012 – 08/2017)
Assistant Professor, Mechanical Engineering (09/2006 – 06/2012)
Associate Member, Biomedical Engineering (03/2007 – 08/2019)
Associate Member, Bioengineering (10/2013 – 08/2019)
- Northwestern University (Evanston, IL)
Postdoctoral Researcher, Department of Mechanical Engineering. (01/2006 - 09/2006)
- Northwestern University (Evanston, IL)
Graduate Research Assistant, Department of Mechanical Engineering. (09/2000 - 12/2005)
- DataPointLabs (Ithaca, NY)
Development Engineer, consultant in polymer testing (12/1998 - 09/2000)
- University of Rochester (Rochester, NY)
Graduate Research Assistant (09/1997 – 09/1998)

EDUCATION

- Northwestern University (Evanston, IL)
Postdoctoral Researcher, Department of Mechanical Engineering. (01/2006 - 09/2006)
- Northwestern University (Evanston, IL)
Ph.D. Department of Mechanical Engineering. (09/2000 - 06/2006)
Thesis: *The Mechanical Performance of Nacre from Seashells – Superior Toughness through Microstructural Design.*
- University of Rochester (Rochester, NY)
Master in Mechanical Engineering (09/1997 – 09/1998)
Thesis: *The poroelastic behavior of growth plate cartilage.*
- Ecole Nationale Supérieure d'Electricité et de Mécanique (Nancy, France) (1995 –1998)
Bachelor of Mechanical Engineering. Area of specialization: *Solid Mechanics*

DISTINCTIONS AND AWARDS

- Chwang-Seto Faculty Scholar, McGill University (2018-2019). *Recognizes and fosters the research of outstanding young professors.*
- Visiting Professor, Institut d'Alembert, Jussieu, France (July 2017)
- Department of National Defence /NSERC Discovery Grant Supplement (2017-2020)
- 2015 Acta Biomaterialia Outstanding Reviewer (Elsevier). Recognition for continuous contributions as reviewer for Acta Biomaterialia, and for an outstanding review in 2015.
- Discovery Accelerator Supplement (2012-2015) awarded by the Natural Sciences and Engineering Research Council of Canada.
- Top ten scientific discovery in Quebec (2014) awarded by the magazine *Quebec Science*.
- Top-ten cited article in the *Journal of the Mechanics and Physics of Solids* over previous five years "Toughness Amplification in Natural Composites" (2014)
- Best Paper Award at the Society for Experimental Mechanical Annual Conference, Biological Systems and Materials Division (67 papers): "Multiscale characterization of a high-performance armor: fish scales" (2011)
- One of seven articles selected as highlight for 2010 in the journal *Bioinspiration and Biomimetics* (2011)
- Top-ten cited article in the *Journal of the Mechanics and Physics of Solids* over previous five years "On the mechanics of mother-of-pearl: A key feature in the material hierarchical structure" (2011)
- Best Paper by a Young Researcher awarded at the 12th International Conference on Fracture, out of 700+papers (2009)
- Hetényi Award for best research paper of the year published in *Experimental Mechanics* (2005)
- Smith Terminal Year Fellowship, Department of Mechanical Engineering, Northwestern University (2005)
- Walter P. Murphy Fellowship, Northwestern University (2000)

RESEARCH OVERVIEW

I lead the Laboratory for Advanced Materials and Bioinspiration and an independent research program on natural and bio-inspired materials. My laboratory focuses on the study of the structure and mechanics of natural materials, with the objective to mimic them in novel high-performance engineering materials. Representative projects:

- Mechanics of deformation and fracture in biological materials: Structure-mechanics-performance-function relationships in high-performance natural materials such as bone, teeth, structural proteins, seashells, fish scales and fish fins. Combination of multiscale experiments and modeling.
- Design, fabrication and testing of novel biomimetic materials: New bio-inspired materials and structures for high toughness materials and morphing capabilities. Applications in bioengineering, aerospace, construction, electronics.
- Mechanics of biological and bio-inspired interfaces: Cohesive behavior of proteins involved in blood clotting (fibrin) and in bone toughening (osteopontin). Biomimetic interfaces: polyelectrolytes, chitosan, architected interfaces.

- Mechanics of engineering granular materials: New ways to exploit granular structures: vibration-driven assembly of strong granular crystals, bio-inspired entanglement mechanisms
- Novel Experimental techniques: Subset splitting digital image correlation for measuring strains near cracks and shear bands, rigid double cantilever beam for the direct determination of cohesive law, high-resolution in-situ microscopy loading setup for tensile tests on individual collagen fibrils.

PROFESSIONAL MEMBERSHIP

- American Society of Mechanical Engineers (ASME), USA: *Member* (2006 - Present)
- Minerals, Metals & Materials Society (TMS), USA: *Member* (2012 - Present)
- American Physical Society (APS), USA: *Member* (2022 - Present)

PUBLICATIONS

- *h*-index =46, Citations=8,900 total, >5,200 since 2018 (Google Scholar)
- The names of F. Barthelat's students and postdocs are underlined
- *indicates F. Barthelat was principal investigator.

Invited Conference Presentations and Invited Seminars

- [I66] “Engineered Granular Crystals as Platform for New Materials, New Mechanics and New Functionalities” 6th “Multifunctional Materials for Defense” Workshop” Disruptive Multifunctional Systems for Demanding Environments: New Thrusts into Space” Arlington, VA 12/5/2022
- [I65] “From mollusk shells to dense architected materials to granular crystals: How building blocks and weak interfaces create high mechanical performance” MMEC Seminar, Massachusetts Institute of Technology, 11/15/2022
- [I64] “High-strength Engineered Granular Crystals” ASME International Mechanical Engineering Congress & Exposition, Columbus OH, 10/31/2022
- [I63] “From mollusk shells to dense architected materials to granular crystals: How building blocks and weak interfaces create high mechanical performance” Theoretical and Applied Mechanics Seminar, Northwestern University, 04/21/2022
- [I62] “From mollusk shells to dense architected materials to granular crystals: How building blocks and weak interfaces create high mechanical performance” Department of Mechanical Engineering Seminar, University of Pennsylvania 04/05/2022
- [I61] ““Engineered granular crystals as platform for new materials, new mechanics and new functionalities” ASC 36th Annual Technical virtual Conference September 19 - 23, 2021
- [I60] “Three examples of segmented structures in nature and how they inspire better flexible armor, tougher glass and new morphing materials” Dept. of Aerospace Engineering, University of Colorado Boulder, December 11 2019
- [I59] “Expanding materials performance using bioinspiration and micro-architecture” Mechanical Engineering Dept., University of Texas at San Antonio, November 15, 2019
- [I58] “Ultra-tough and impact resistant glasses with bioinspired architectures” Prager Medal Symposium, Society of Engineering Science 56th Annual Technical Meeting, Washington University in St. Louis October 13-15, 2019
- [I57] “Expanding material property space with bioinspiration and micro-architecture” workshop on “Tailor-Made Multiscale Materials Systems” Hamburg Collaborative Research Center SFB 986, June 19-21, 2019, Hamburg (Germany)
- [I56] “Segmentation and architecture in natural materials: discrete element models for bioinspiration” TMS 148th Annual meeting & exhibition, March 10-14, 2019, San Antonio TX (USA)

- [155] “Optimum geometries in biological and bio-inspired sutured interfaces” TMS 148th Annual meeting & exhibition, March 10-14, 2019, San Antonio TX (USA)
- [154] “Expanding material property space with bioinspiration and micro-architecture” Civil Engineering Department, Cornell University, November 8th, 2018 Ithaca NY (USA)
- [153] “Expanding material property space with bioinspiration and micro-architecture” Solid Mechanics Laboratory - LMS - Ecole Polytechnique, Palaiseau (France) October 5, 2018
- [152] “Expanding material property space with bioinspiration and micro-architecture” 18th US National Congress of Theoretical and Applied Mechanics, Chicago June 7th, 2018
- [151] “Expanding materials performance using bioinspiration and micro-architecture” 3rd Montreal Biomaterials Research Day, Canadian Biomaterials Society, Montreal May 1st, 2018
- [150] “Expanding materials performance using bioinspiration and micro-architecture” Graduate Seminar Series, Mechanical Engineering University of Colorado at Boulder March 23rd, 2018
- [149] “Dense Architected Materials in Engineering and in Nature” TMS 147th Annual meeting & exhibition, 12 March 2018, Phoenix, AZ (USA)
- [148] “Expanding Material Property Space Using Bioinspiration and Micro-architecture” ME-EM Graduate Seminar Speaker Series, Michigan Technological University February 15th 2018
- [147] “Exploring material property space using bioinspiration and micro-architecture” Materials Research Outreach Symposium January 31 & February 1, 2018, University of California Santa Barbara
- [146] “Structure and mechanics of natural scales: inspiration for novel flexible protective systems” ASME IMECE Tampa, November 9th 2017
- [145] “Expanding material property space using bioinspiration and architecture” Graduate Seminar Series, Mechanical Engineering Purdue University September 14th, 2017
- [144] “Expanding material property space using bioinspiration and architecture” Séminaire de mécanique des solides, Institut d’Alembert (Paris) 11 Juillet 2017
- [143] “Toughness amplifications in biological and bio-inspired materials: a synergy of architectures and weak interfaces” 14th International Conference on Fracture (ICF14), 18-23 June 2017 Rhodes (Greece)
- [142] “Interfaces drive the mechanics of hard biological materials: discrete element models and bioinspired prototypes”. TMS 146th Annual meeting & exhibition, 26 February 2017, San Diego, CA (USA)
- [141] “The structure and mechanics of key interfaces within biological and bio-inspired materials” Society of Engineering Science 53rd Technical Meeting, 2-5 Oct. 2016 Baltimore, MD (USA)
- [140] Three invited lectures on fracture mechanics for a course on “Mechanics and Physics of Fracture: Multi-scale Modeling of the Failure Behaviour of Solids” (organizer: L. Ponson) at the International Centre for Mechanical Sciences (CISM), 26-30 Sept. 2016, Udine (Italy)
- [139] “Structure and mechanics of natural scales: inspiration for novel flexible protective systems” 11th International Congress of Vertebrate Morphology (ICVM11), 3 July 2016, Washington DC (USA)
- [138] “Micro-architectures and interfaces in biological and synthetic materials”. 47th Central Regional Meeting of the American Chemical Society, 18 May 2016, Covington, KY (USA)

Patents

- [P5] F. Barthelat, S. Cavelier, A.K.D. Toroghi and M.D. McKee: "Mineralized tissue adhesive/filler composition comprising crosslinked osteopontin". US Patent App. 16/792,423.

- [P4] F. Barthelat and M. Tanzer: “Biocompatible, biodegradable and toughened bone graft substitute”. Patent application in process (McGill Report of Invention #15047).
- [P3] F. Barthelat, M. Mirkhalaf and A.K. Dastjerdi: “Bio-inspired engraving to generate toughness and resistance to impact in otherwise brittle materials” United States Provisional Patent Application US 61/946,279 (2014)
- [P2] H.D. Espinosa and F. Barthelat: “Building composite structure having material capable of deformation strain used in aeronautics involves layering first ceramic tablets alternating with second ceramic tablets in first layer, and then in second layer”. U.S patents US2012067519-A1; US8176705-B2;
- [P1] H.D. Espinosa and F. Barthelat: “Synthetic composite material, useful e.g. in aeronautics, defensive material, orthopedics and micro-electro-mechanical system, comprises interlocking ceramic tablets, where the ceramic tablets further comprise e.g. core and overlap area”. U.S patent US8067078-B1

ACTIVITIES IN PROFESSIONAL SOCIETIES

- International Union of Theoretical and Applied Mechanics: Co-organizer (with T. Siegmund, Purdue) of a three day conference on the Mechanics of Architected Materials held in September 2018 in Chicago (IL).
- 6th International Conference on Mechanics of Biomaterials and Tissues: Scientific Committee (2015)
- Society of Engineering Science (SES): Co-organizer for a Symposium on *Architected Materials* (2015)
- The Minerals, Metals & Materials Society (TMS): Co-organizer for the *Biological Materials Science Symposium*, TMS Annual Meeting (2015)
- Society for Experimental Mechanics (SEM): Elected Vice-Chair of the Biological Systems and Materials Technical Division. Co-organized three symposia on Biological Materials and Systems (2012, 2013, 2014), organized and chaired 20+ sessions at SEM Annual Conference (2007-2014).
- American Society of Mechanical Engineers: Topic Organizer for IMECE meetings (2008, 2010)
- Society of Engineering Science (SES): Co-organizer for a Symposium on *Biological Materials* (2012)
- 13th International Conference on Fracture (ICF13): Co-organizer of the session “*Biomaterials and Tissues*” and of a mini-symposium on “*Multiscale Modeling of Biological Systems*” (2013)

ACTIVITIES IN SCIENTIFIC JOURNALS

- *Scientific Reports* (Nature Publishing Group): Editorial Board (Invited)
- *Journal of the Mechanical Behavior of Biomedical Materials* (Elsevier): Editorial Board (Invited)
- *Mechanics of Materials* (Elsevier): Editorial Board (Invited)
- *Bioinspiration and Biomimetics* (IOPscience): Editorial Board (Invited)

- *Theoretical and Applied Mechanics Letters* (American Institute of Physics): Associate Editor (Invited)
- *Journal of the Mechanical Behavior of Biomedical Materials* (Elsevier): Guest editor for three special issues “Merging Materials and Structures” (2012), “Mechanics of collagen” (2015), “Biological Articulated Structures and Dermal Armors” (2016)

Reviewer (2-3 manuscripts/month): *Science, Nature, Nature Materials, Nature Communications, PNAS, Journal of the Mechanics and Physics of Solids, Acta Biomaterialia, Advanced Materials, Advanced Functional Materials, Journal of the Royal Society Interface, Biomaterials, PLOS ONE, Soft Matter, Journal of Materials Research, Journal of Materials Science, Journal of Biomedical Materials Research: Part A, Journal of the Mechanical Behavior of Biomedical Materials, Bioinspiration and Biomimetics, Journal of Bionic Engineering, Experimental Mechanics, Experimental techniques, Optics Express, Optics and Laser in Engineering, Journal of Composite Materials, Composites Science and Technology, Strain, Journal of Tribology, Tribology International, Tribology Letters, Modeling and Simulation in Materials Science and Engineering, Biophysical Chemistry, Materials Characterization, Journal of Reinforced Plastic and Composites*

OUTREACH

- Redpath Museum, McGill University: Designed and assembled the Exhibition: “Bioinspiration and Biomimetics: How animals and plants inspire new engineering materials and devices” (Running December 2016- December 2017)
- Interview with journals, magazines and other news outlets: *La Presse* (Jan. 2015), *Nature* (Nov 2014), *Science et Avenir* (Apr. 2014), *Wired* (Mar. 2014), *Canadian Geographic* (Mar. 2014), *Materials360online* (Feb. 2014), *Scientific American Online* (Feb. 2014), *Les Cahiers techniques du bâtiment* (Mar. 2014), *Los Angeles Times* (Feb. 2014), *L’Usine Nouvelle* (Feb. 2014), *QMI Agency* (Feb. 2014), *Canadian Chemical News* (Feb. 2014), *Science News* (Jan. 2014), *Agence France-Presse* (Jan. 2014).
- Interviews with radios: *Radio Canada* (Feb. 2014), *Radio Canada International* (Feb. 2014), *Deutschlandfunk* (Jan. 2014), *La Grande Equation* “*Les matériaux du vivant qui nous font rêver*” (Nov. 2013).
- Science documentaries and multimedia: *Code Chastenay*, “Le verre dans tous ses éclats”, Tele Quebec (Oct 2014), *Galileo* (German TV, Feb. 2014), *Projet Biosphère* (Biosphère de Montréal, exhibit starting in 2015), “Xploration: Nature Knows Best” (FOX TV stations, 2016)
- Public Seminars, wide audience: *McGill Association of Mechanical Engineers* (Dec. 2014), *Dawson College* (Sep. 2012), *John Abbott College* (Jan. 2010).

TEACHING

- *Mechanics of Snow* (MCEN 4228-5228): A new technical elective taught for the first time in Winter 2022.
- *Solids Mechanics I* (MCEN 5023): Graduate level solid mechanics
- *Mechanics of Solids* (MCEN 2063): Undergraduate level solid mechanics
- *Advanced Mechanics of Materials* (MECH 632, formerly *Theory of Elasticity*): F. Barthelat entirely renewed the content of this course in 2015.

- *Mechanics of Biological Materials* (MECH 547): Course created by F. Barthelat: structure and mechanics of proteins and polysaccharides, deformation and fracture of biological materials (skin, bone, tendons, blood vessels seashells, spider silk...). State of the art experimental and computational methods, novel biomimetic materials.
- *Mechanics of Deformable Solids* (MECH 321, taught three times)
- *Design of Machine Elements Design* (MECH 393, taught three times)
- *Theory of Elasticity* (MECH 632, taught twice)
- *Mechanics 1: Statics* (MECH 210, taught six times)
