Education

- | | | |
|-------|-----------|---|
| Ph.D. | 2011–2017 | Duke University, Pratt School of Engineering
Department of Biomedical Engineering
Thesis: Ultrasound Beamforming Methods for Large Coherent Apertures
Advisor: Gregg Trahey |
| B.S.E | 2007–2011 | Duke University, Pratt School of Engineering
Department of Biomedical Engineering
Department of Electrical and Computer Engineering
<i>Summa Cum Laude</i> |

Research Experience

Assistant Professor 2020–Present

University of Colorado Boulder, Department of Mechanical Engineering, Boulder, CO

The Bottenus Lab is focused on developing system-level solutions to problems in diagnostic ultrasound imaging, using complementary transducer sampling, acoustic signal processing, and image interpretation methods to more robustly provide doctors with useful information across varied patient populations and applications.

Research Scientist 2017–2019

Duke University, Department of Biomedical Engineering, Durham, NC

Diagnostic ultrasound imaging research for improving image quality through advances in signal and array processing. Clinical translation and evaluation of beamforming methods.

Chief Science Officer 2018–2019

MicroElastic Ultrasound Systems, Durham, NC

Leading algorithm development and pre-clinical research for a new ultrasonic elasticity device. Participating in development and prototyping of the low-cost, portable device based on radiation force excitation.

Pre-doctoral Fellow 2011–2017

Duke University, Department of Biomedical Engineering, Durham, NC

Studied diagnostic ultrasound imaging. Developed and published research on synthetic aperture imaging, spatial coherence, displacement estimation, and image quality. Advised by Gregg Trahey.

Student Intern/Co-op

2013–2014

Siemens Healthcare, Mountain View, CA

Performed commercial ultrasound scanner image optimization and software development. Researched synthetic aperture and spatial coherence imaging methods.

Awards and Honors

2020	IEEE UFFC Star Ambassador Lectureship Award
2017	Duke BME Award for Outstanding Doctoral Dissertation
2016	IEEE International Ultrasonics Symposium Student Travel Support
2015	SPIE Medical Imaging Robert F. Wagner Best Student Paper Award Finalist
2015	SPIE Medical Imaging Cum Laude Poster Award
2013	NSF Graduate Research Fellowship Program - Honorable Mention
2011–2014	Duke Medical Imaging Training Program Pre-doctoral Fellowship

Grant Activity

Active funding

Funding source: Colorado Office of Economic Development & International Trade

Role: Principal Investigator

Project title: Decoding multipulse ultrasound imaging data (DO 2022-2448)

Funding period: May 2022 – April 2024

Description: We propose to apply delay-based array encoding to increase acquisition speed and signal quality in cardiac exams. These improvements will enable higher quality real-time sequences for difficult-to-image patients.

Funding source: NIH National Institute of Biomedical Imaging and Bioengineering

Role: Principal Investigator

Project title: Optically tracked freehand swept synthetic aperture ultrasound (R03-EB032090)

Funding period: August 2021-May 2023

Description: We propose to build an optically-tracked system to enable coherent combination of ultrasound data from multiple transducer positions, allowing a sonographer to extend the effective aperture size and improve resolution beyond conventional limits for difficult-to-image patients.

Completed funding

Funding source: NIH National Institute of Biomedical Imaging and Bioengineering

Role: Principal Investigator (subaward) (PI: Trahey)

Project title: A Patient-Adaptive, High MI Abdominal Scanner (R01-EB026574)

Funding period: July 2021 – August 2022

Description: Develop accelerated voltage sweep sequence for adaptive imaging, analyze spatial and temporal coherence relationships, lead submission of a review on the use of spatial coherence in ultrasound imaging.

Funding source: Duke-Coulter Translational Partnership

Role: Research Scientist, 50% time (PI: Trahey)

Project title: Intrapulse Spatial Compounding

Funding period: Sep 2017 – Aug 2018

Description: Clinical translation of beamforming methods from sole-author paper, “Recovery of the complete data set from focused transmit beams”, for applications in cardiac imaging

Funding source: Duke-Coulter Translational Partnership, seed funding

Role: Research Scientist, 64.3% time (PI: Trahey)

Project title: Intrapulse Spatial Compounding

Funding period: Feb 2017 – Aug 2017

Description: Development of beamforming methods from sole-author paper, “Recovery of the complete data set from focused transmit beams”

“Most exciting new image processing technology” poster award

Bottenus, N.; Hyun, D.; Dahl, J.; Trahey, G.; Byram, B.; “Application of synthetic aperture focusing to short-lag spatial coherence”. *2012 NIBIB Training Grantees Meeting*, June 2012

Teaching Experience

Instructor

University of Colorado Boulder

Semester	Number	Level	Title
2023 Spring	ECEN 3301	Undergraduate	Biomedical Signals and Systems
2022 Spring	MCEN 2023	Undergraduate	Statics and Structures
2021 Fall	MCEN 4127/5127	Graduate	Biomedical Ultrasound
2021 Spring	MCEN 2023	Undergraduate	Statics and Structures
2020 Fall	MCEN 4127/5127	Graduate	Biomedical Ultrasound

Duke University

Semester	Number	Level	Title
2018 Fall	MP 734	Graduate	Non-ionizing Medical Imaging (co-instructor)

2017 Fall MP 734

Graduate Non-ionizing Medical Imaging (co-instructor)

Guest Lectures

Semester	Number	Lecture Title
2022 Spring	Duke BME 844	Synthetic Aperture Ultrasound Imaging
2021 Spring	MCEN 3030	Signal Processing
2021 Spring	BMEN 1000	Seeing finer, further, faster
2021 Spring	MCEN 4228/5228	Mechanics of Ultrasound
2020 Spring	MCEN 4228/5228	Mechanics of Ultrasound
2018 Spring	BME 844	Synthetic Aperture Ultrasound Imaging
2017 Fall	BME 354	Introduction to Microcontrollers

Class projects

Semester	Number	Description
2020 Fall	Duke EGR101L	Bio-optical sensor enhancements to marine animal tags

Other

2020–2021 Assisting in development of BME 3030: Bioinstrumentation

Professional Service

Conference organizing co-chair:

2022–2023 SPIE Medical Imaging (Ultrasonic Imaging and Tomography)
2022 Artimino Medical Ultrasound Technology meeting

Conference session chair:

2022 Artimino Medical Ultrasound Technology meeting
2021–present SPIE Medical Imaging (Ultrasonic Imaging and Tomography)
2019–present IEEE International Ultrasonics Symposium
2017–present Ultrasonic Imaging and Tissue Characterization Symposium, Session chair

Professional committees

2022–present Member of AAPM Task Group 387: Consensus Recommendations on reliable development and use of Virtual Imaging Trials

Grant reviewer for:

- NIH ITD (early career reviewer)
- CU Boulder RIO Seed Grant
- Inserm (Plan Cancer)

Journal reviewer for:

- Acta Biomaterialia
- IEEE Transactions on Ultrasonics, Ferroelectrics and Frequency Control
- IEEE Transactions on Medical Imaging
- IEEE Transactions on Biomedical Imaging
- Journal of the Acoustical Society of America
- Journal of Medical Imaging
- Nature Communications
- Science Advances
- Ultrasonic Imaging
- Ultrasonics
- Ultrasound in Medicine & Biology

Outreach

2018	Duke TIP Scholar Weekend teaching assistant - Biomedical Engineering
2016	Jordan High School Science Fair judge

Professional Development

2022, May 11–12	LEAP Introductory Leadership Workshop
2021, December 7, 9	Scientific Communication Advances Research Excellence Workshop
2019, June 17–21	Duke Machine Learning Summer School
2019, May 20–23	Boulder Summer School on Ultrasound Contrast Agents

Professional Memberships

2014 – Present	IEEE (Ultrasonics, Ferroelectrics and Frequency Control)
2021 – Present	SPIE
2017 – 2018	ASA
2017 – 2018	AIUM
