@McAdam_lab

SUMMARY OF ACCOMPLISHMENTS

1. 110 publications, including > 40 in high-impact journals such as *Science*, *Nature Communications*, *eLife*, *PNAS* and *Current Biology* and the top journals in evolutionary biology (*Evolution*, *The American Naturalist*, *Evolution Letters*, *Journal of Evolutionary Biology*, *Proceedings B*) and ecology (*Ecology Letters*, *Ecology*, *Journal of Animal Ecology*).
2. Nine papers cited 100+ times. h-index of 35.
3. Over \$1.8M in grant funding awarded since 2005, including an NSERC Discovery Accelerator and Ontario MRI Early Researcher Award.
4. Handling Editor for the journal *Evolution*.

EDUCATION AND DEGREES

Ph.D.	University of Alberta, Department of Biological Sciences	2003
M.Sc.	University of Western Ontario, Department of Zoology	1998
B.Sc.	McGill University, Department of Biology	1995

EMPLOYMENT HISTORY

Associate Professor, Department of Ecology and Evolutionary Biology, University of Colorado	2020 - present
Associate Director, Mountain Research Station	2020 - present
Associate Professor, Department of Integrative Biology, University of Guelph	2011 – 2019
Assistant Professor, Department of Integrative Biology, University of Guelph	2008 – 2011
Assistant Professor, Department of Fisheries and Wildlife, Department of Zoology, Michigan State University	2005 – 2008
Visiting Assistant Professor, Department of Fisheries and Wildlife, Department of Zoology, Michigan State University	2004 – 2005
Natural Sciences and Engineering Research Council (NSERC) of Canada Postdoctoral Fellow, University of California, Santa Cruz.	2003 – 2004

PUBLICATIONS

Articles in Review or Under Revision

1. Studd, E. K., G. Gellner, M. J. L. Peers, A. K. Menzies, Y. N. Majchrzak, R. E. Derbyshire, R. Boonstra, B. Dantzer, A. J. Kenney, C. J. Krebs, J. E. Lane, A. G. McAdam, D. L. Murray, S. Boutin, K. S. McCann, and M. M. Humphries. Seasonal activity patterns drive boreal ecosystem dynamics. Submitted to *Science*, December 8, 2020.
2. Studd, E. K., M. J. L. Peers, A. K. Menzies, R. Derbyshire, Y. N. Majchrzak, J. Seguin, D. L. Murray, B. Dantzer, J. E. Lane, **A. G. McAdam**, M. M. Humphries, and S. Boutin. Species-specific responses to wind balance trade-offs between thermal and perceptual constraints in mammals of the boreal forest. Submitted to *Journal of Animal Ecology*, December 8, 2020.
3. Menzies, A. K. E. K. Studd, Y. N. Majchrzak, M. J. L. Peers, R. E. Derbyshire, J. L. Seguin, B. Dantzer, J. E. Lane, **A. G. McAdam**, D. L. Murray, S. Boutin and M. M. Humphries. Correlations between biologged traits and daily energy expenditure vary among species and across timescales.
4. Westrick, S. E., F. van Kesteren, S. Boutin, J. E. Lane, **A. G. McAdam**, and B. Dantzer. Maternal glucocorticoids do not influence HPA axis activity or behavior of juvenile wild North American red squirrels. Submitted to *Journal of Experimental Biology* September 2, 2020 (MS ID#: JEXBIO/2020/236620).
5. Denomme-Brown, S. T., K. Cottenie, R. J. Brooks, J. B. Falls, E. A. Falls, and **A. G. McAdam**. Examining Interspecific density-dependent dispersal in forest small mammals. Accepted with revisions *Journal of Mammalogy*, September 2, 2020 (JMAMM-2020-237).
6. Hare, A. J., A. E. M. Newman, B. Dantzer, J. E. Lane, S. Boutin, D. W. Coltman, and **A. G. McAdam**. New experiments do not support context-dependent kin discrimination through North American red squirrel vocalizations. Submitted to *Animal Behaviour*, August 10, 2020. Revisions requested December 9.
7. Larivée, M., Q. E. Fletcher, **A. G. McAdam**, S. Boutin, and M. M. Humphries. Resting metabolic rate is elevated and linked to parturition date in food-supplemented free-living North American red squirrels. Submitted to *Journal of Experimental Biology* August 30, 2019 (JEXBIO/2019/213520)
8. Haines, J. A., **A. G. McAdam**, D. W. Coltman, J. C. Gorrell, A. Hämäläinen, J. E. Lane, B. Dantzer, M. M. Humphries, and S. Boutin. *under revision*. Age at first reproduction influences the onset but not rate of reproductive senescence in male red squirrels. *Journal of Animal Ecology*.

Peer Reviewed Articles and Book Chapters

RESEARCH GRANTS	AMOUNT	DATE
<i>NSERC Discovery Grant. A. G. McAdam.</i> Maternal and social effects on adaptation. (RGPIN-2015-04707)	\$245,000	2015 – 2020
<i>NSERC Discovery Accelerator Supplement (RGPAS 478027-2015)</i>	\$120,000	
<i>NSERC Northern Research Supplement (RGPNS-2015-377988)</i>	\$87,500	
<i>NSERC Discovery Grant. A. G. McAdam.</i> The Ecology of Adaptations in Wild Animals. (RGPIN 371579-2009)	\$174,000	2009 - 2015
<i>NSERC Northern Research Supplement (RGPNS-377988-2009)</i>	\$75,120	

Ontario Ministry of Research and Innovation, Early Researcher Award. A. G. McAdam . Contemporary adaptation in wild animals. (ER08-05-119)	\$150,000	2009 - 2014
Canadian Association for Humane Trapping. A. G. McAdam . Effects of mealworm bait supplements on small mammal capture rates.	\$23,128	2012
Canadian Association for Humane Trapping. A. G. McAdam . Reducing shrew mortality rates associated with small mammal live-trapping: a meta-analysis and experimental field study.	\$42,145	2011
Canada Foundation for Innovation/Ontario Ministry of Innovation - Leaders Opportunity Fund. A. G. McAdam . Field data acquisition, integration and communication infrastructure for studying adaptation in action.	\$138,425	2011
Great Lakes Fishery Commission. A. G. McAdam & S. D. Peacor. Evolution of trophic linkages in an invaded food web.	\$121,647	2007 - 2010
Michigan State University Intramural Research Program Grant. A. G. McAdam . The coevolution of handedness in red squirrels and spruce cones.	\$37,413	2007 - 2008
National Science Foundation. A. G. McAdam . Testing Ecological Mechanisms of Adaptation in Red Squirrels. DEB-0515849.	\$299,929	2005 – 2008
Research Experience for Undergraduates supplements:		
DEB-0724743	\$6,000	2007
DEB-0620870	\$6,000	2006
National Science Foundation – Long Term Research in Environmental Biology. B. Sinervo & A. G. McAdam . Relatedness Asymmetries, Antagonistic Natural Selection and Nonmendelian Inheritance in a Natural Population of Lizards. DEB-0515973.	\$299,990	2006 - 2010
Several small research grants between 1999 and 2002 from granting agencies such as: <i>Circumpolar/Boreal Alberta Research, Northern Scientific Training</i>	\$12,190	1999 - 2002

*Program, Arctic Institute of North America, and
American Society of Mammalogists.*

SCHOLARSHIPS AND AWARDS	AWARDING AGENCY	DATE
Early Researcher Award	Ontario Ministry of Research and Innovation	2009
NSERC Postdoctoral Fellowship	NSERC	2003 – 2004
NSERC Doctoral Prize - excellence in student research in the natural sciences.	University of Alberta nominee	
Fellowship in Mammalogy	American Society of Mammalogists	2002 – 2003
Dissertation Fellowship	University of Alberta	2002 – 2003
Andrew Stewart Memorial Graduate Prize - excellence in doctoral research	University of Alberta	2002
Izaak Walton Killam Memorial Scholarship	The Killam Trusts	2000 – 2002
Walter H. Johns Graduate Fellowship	University of Alberta	1998 – 2000
NSERC Postgraduate Scholarship	NSERC	1998 – 2000
Faculty of Science Graduate Scholarship	University of Alberta	1998
Detwiler Award - best thesis and defence in Zoology	University of Western Ontario	1998
Scarlet Key – for outstanding leadership	McGill University	1995

TEACHING EXPERIENCE

Courses Taught

Biological Statistics (EBIO*4410/5410). The overall goal of this course is to create an interactive environment that will promote statistical thinking and introduce students to the use of statistical models for investigating biological data and making decisions in the presence of uncertainty. Statistics is a foundational tool for much of biology; we use statistics to test our hypotheses and learn about the world. Knowledge of statistics is therefore necessary for students who wish to pursue a career in the sciences. It is also enormously useful for people in non-scientific careers, particularly in thinking about how to critically evaluate evidence as citizens. (Fall 2020: 27 students)

Evolution (BIOL*2400). This course provides a broad overview of evolutionary biology. It examines the concepts and mechanisms that explain evolutionary change and the evolution of biological diversity at different levels of biological organization (gene to ecosystem) and across space and time. It also introduces historical forms of scientific inquiry, unique to biology. The course is designed to be of interest to students with general interests in science and in research in all areas of biology. (Winter 2015: 202 students; Winter 2016: 163 students; Fall 2016: 389 students; Fall 2017: 435)

Ecology (BIOL*2060) This course introduces students to the basic concepts, theories and evidence about ecological processes that determine the distribution and abundance of organisms. We include a mix of theory and field and laboratory techniques presented in lecture and discussed in tutorials. We also take time during lectures to apply principles to topics related to conservation, resource use, and human impacts on the biosphere. (Winter 2017: 233; Winter 2018: 224; Fall 2018: 300)

Biostatistics for Integrative Biology (STAT*2230). This course introduces students to the design, completion and interpretation of research projects, including identifying categories of research questions, types of data, data gathering methods, efficient graphic and numeric methods to summarize data, standard statistical analyses involving parameter estimation and hypothesis tests and interpreting results in the context of research goals. Statistical concepts underlying practical aspects of biological research will be emphasized. Computer-intensive laboratory sessions will focus on practical data organization, visualization, statistical analysis using software, and interpretation and communication of statistical results. (Winter 2016: 168 students; Winter 2017: 172; Winter 2018: 173; Winter 2019: 165)

Advances in Ecology and Behaviour (IBIO*6000). This is a general course code for a graduate course in Integrative Biology, but I have taught this course as a graduate statistics course. The objective of this course was to provide students with a practical introduction to ecological data analysis using R. The course was based on a series of teaching modules that covered a variety of topics relevant to graduate statistics (general linear models, model selection, generalized linear models, mixed-effect models). (Fall 2012: 16 students; Fall 2015: 14 students; Winter 2019: 22 students)

Advances in Ecology and Behaviour (IBIO*6000). This is a general course code for a graduate course in Integrative Biology. In fall 2019 I led a discussion-based course on the role of Bayesian updating in behaviour, ecology and evolution. (Fall 2019: 5 registered students; 6 students auditing)

Evolutionary Ecology (BIOL*4120). This undergraduate course in evolutionary ecology examines the ways in which organisms have responded to the selective pressures imposed by their environment. We address both theoretical and empirical issues in evolutionary ecology, with an emphasis on the process of scientific inquiry. (Winter 2009: 64 students; Fall 2009: 46 students; Winter 2011: 76 students; Winter 2012: 77; Winter 2013: 85 students)

Lab Studies in Mammalogy (BIOL*4950). This course provides a practical experience in the study of Mammalogy. Using University collections of prepared and preserved specimens and field observations where possible, students will develop and apply skills in identification and sampling, explore relations between species diversity and habitat, and investigate through guided study, the extent of anatomical, skeletal, reproductive and morphological variation and its functional and evolutionary causes. (Winter 2012: 91; Winter 2013: 85 students).

Alpine Ecology Field Course. This course was taught between August 21 and September 5, 2009 with Jack Millar (University of Western Ontario) in Kananaskis Alberta. This course surveys the flora and fauna of subalpine and alpine environments. Activities included visits to different alpine areas during the first week, to learn the flora and fauna of alpine terrestrial and aquatic environments. Comparisons over elevational gradients were emphasized. Students conducted an independent field project during the second week of the course (Summer 2009: 16 students).

Evolution (ZOL 445; Michigan State University). This undergraduate course in evolutionary biology forms the foundation of many majors in biological sciences at Michigan State University. The course is fundamentally about patterns of descent with modification, which has generated the biological diversity that we see in the world today, as well as the fundamental process responsible for these patterns. (Fall 2007: 90 students)

Quantitative Methods in Ecology and Evolution (ZOL 851; Michigan State University). This graduate course covered the interpretation and analysis of ecological and evolutionary data using the statistical software package R. Topics included the philosophy of statistics, general linear models, generalized linear models and mixed effect models (Fall 2005: 27; Fall 2006: 24; Fall 2007: 35 students)

Anthro-Evo: Humans as a Contemporary Evolutionary Force (FW893; Michigan State University). This graduate seminar offered in the spring of 2007 surveyed the literature focused on human impacts on evolutionary change in the wild. As a product of the course,

we hope to produce an online meta-data and bibliographic database of published research on human-induced evolutionary change. (Winter 2007: 18 students)

SUPERVISORY AND MENTORING EXPERIENCE

Post-doctoral Researchers

Dr. Quinn Webber (2020 – present)

Dr. David Delaney (2020 – present)

Dr. Sarah Guindre-Parker (2017 – 2019) NSERC PDF. *Currently an Assistant Professor at Kennesaw State University.*

Dr. David Fisher (2016 – 2018) *Currently a Research Fellow, University of Aberdeen.*

Dr. Gustavo Betini (2014 - 2015) *Currently a Ph.D. student in the School of Public Health, University of Waterloo.*

Dr. David Wilson (2014) *Currently an Associate Professor at Memorial University.*

Dr. Amy Newman (2009 – 2012) NSERC PDF. *Currently an Associate Professor, University of Guelph.*

Graduate Students Supervised

Katherine Kariatsumari Ph.D. (2020 to present). Dissertation topic TBD.

Alex Hare Ph.D. (2018 to present). Interactions between stress physiology and social information in the North American red squirrel.

Shelby Bohn Ph.D. (2017 to present). Optimal Food Hoarding and Decision Making by Syrian Hamsters (*Mesocricetus auratus*) in Fluctuating Environments.

Simon Denommé-Brown – Ph.D. (2014 to present). Synchrony in a terrestrial, vertebrate metacommunity.

Maggie Bain M.Sc. (2020). Investigating the acoustic niche hypothesis using territorial vocalizations of red squirrels (*Tamiasciurus hudsonicus*). *Currently an MA student in Geography at the University of Guelph.*

Julia Kilgour – Ph.D. (2019). The Role of Group Composition and Resource Availability on Selection for Aggression. *Currently a postdoctoral researcher at Purdue University.*

Erin Siracusa – Ph.D. (2018). Effects of the social environment on the behaviour and fitness of a territorial squirrel. *Currently a postdoctoral researcher at the University of Exeter.*

Jack Hendrix (Robertson) M.Sc. (2018). Individual variation in the dear enemy phenomenon via territorial vocalizations in red squirrels. *Currently a PhD student, Memorial University.*

Giuseppe Fiorino – M.Sc. (2016). Local differentiation in the defensive morphology of an invasive zooplankton species is not genetically based. Department of Integrative

- Biology, University of Guelph. *Currently a wildlife technician, Canadian Wildlife Service*
- Van La – Ph.D. (2015). Empirical tests of predictive models to advance waterbird monitoring in wetlands within forested landscapes. Department of Integrative Biology, University of Guelph. *Currently a sessional lecturer, University of Guelph.*
- Morgan Trotter – M.Sc. (2015). The effects of acute noise on shrew mortality. Animal Behaviour and Welfare Program, University of Guelph. *Currently the Standard Operating Procedure Coordinator, Animal Health Unit, University of Calgary.*
- Kayla Deasley – M.Sc. (2014). Red squirrels cause balancing selection on the length of white spruce cones. Department of Integrative Biology, University of Guelph. *Currently a research technician, University of Alberta.*
- Gillian Merritt – M.Sc. (2014). Effects of population density on stress and maternal care in a wild rodent (*Peromyscus maniculatus*). Department of Integrative Biology, University of Guelph. *Currently an insurance analyst.*
- Frances Stewart – M.Sc. (2012) Plasticity of Maternal Care and Seasonal Manipulation of Masculinity in *Peromyscus maniculatus*. Department of Integrative Biology, University of Guelph. *Currently an Adjunct Professor, Wilfred Laurier University.*
- Andrea Jaeger Miehl - Ph.D. (2012) Preventing predation: Evolution and adaptive plasticity in morphological defence of an invasive species. Department of Fisheries and Wildlife, Michigan State University. *Currently a communications associate, US Geological Survey.*
- Eryn McFarlane – M.Sc. (2012) Mechanisms maintaining additive genetic variance in fitness in red squirrels. Department of Integrative Biology, University of Guelph. *Currently a Postdoctoral Researcher, University of Edinburgh.*
- Ryan Taylor - Ph.D. (2012) Quantitative genetics, selection, mate choice and red squirrel behavior in a fluctuating environment. Department of Zoology, Michigan State University. *Founder and owner of End2End Genomics.*
- Ben Dantzer – Ph.D. (2012) Adaptive Endocrine and Behavioral Responses of Free-living Red Squirrels to Environmental Variation. Department of Zoology, Michigan State University. *Currently an Associate Professor, University of Michigan.*
- Randy Do – M.Sc. (2011) The effects of bait and water provisioning on by-catch shrew mortality rates associated with small mammal live-trapping. Animal Behaviour and Welfare Program, University of Guelph. *Currently a veterinarian.*
- Julia Shonfield – M.Sc. (2010) Territorial defence behaviour and a test of the mechanism of kin recognition in red squirrels. Department of Integrative Biology, University of Guelph. *Currently a Terrestrial Ecologist, LGL environmental consulting.*
- Lauri Torgerson – M.Sc. (2010) Personality in Michigan's *Peromyscus*. Department of Zoology, Michigan State University. *Currently a biology instructor, Macomb Community College.*

Elizabeth L. Ball - M.Sc. (2008) Preferences and harvest intentions of hunters in Michigan and their effects on white-tailed deer harvest outcomes. Department of Fisheries and Wildlife, Michigan State University.

Adam R. Goble - M.Sc. (2008) Signature signals in the territorial vocalizations of red squirrels (*Tamiasciurus hudsonicus*) and their use in kin recognition. Department of Zoology, Michigan State University. *Currently a high school biology teacher in West Virginia.*

Undergraduate Research Projects

Katie Kariatsumari (2019) Effects of a long-term food supplementation experiment on population dynamics in an age-structured, wild population of North American red squirrels. University of Guelph.

Nana Fukushima (2017) The presence of North American red squirrel territory owners deters intrusions by unfamiliar neighbours. University of Guelph.

Eve Cooper (2016) The role of personality in determining territory acquisition strategy in North American red squirrels (*Tamiasciurus hudsonicus*). University of Guelph. *Currently a PhD student at Australian National University.*

Jack Hendrix (Robertson) (2015) Selection on growth rate and parturition date of juvenile red squirrels (*Tamiasciurus hudsonicus*) occurs prior to, but not during, competition for territories. University of Guelph. *Currently a PhD student, Memorial University.*

Mya Van Woudenberg (2015) The causes and consequences of maternal care in red squirrels (*Tamiasciurus hudsonicus*). University of Guelph.

Dylan Pond (2012) Density-dependent habitat selection reduces the variability of *Peromyscus maniculatus* populations in preferred habitats in Algonquin Park. University of Guelph. *Currently an MSc student, University of Manitoba.*

Ariel Nelson (Porty) (2012) Red squirrel (*Tamiasciurus hudsonicus*) individuality encoded in territorial acoustic information. University of Guelph. *Completed an MSc at Laurentian University. Currently a biodiversity research assistant, City of Sudbury.*

Julia Maniecki (2010) Red squirrel (*Tamiasciurus hudsonicus*) cone preference and the implications for white spruce (*Picea glauca*) fitness. University of Guelph.

Eryn McFarlane (2009) The heritability of multiple male mating in red squirrels (*Tamiasciurus hudsonicus*). University of Guelph. *Completed a PhD at Uppsala University. Currently a Postdoctoral Researcher at University of Edinburgh*

Lindsey Valliant (2009) Trade-offs between predator defense and resource acquisition in an invasive zooplankton, *Bythotrephes longimanus*. University of Guelph. *Completed an MSc, Western University.*

Amanda Cheeseman (2008) Selective Predation of White Spruce cones by Red Squirrels. Michigan State University. *Currently a PhD student, SUNY College of Environmental Science and Forestry.*

Jennifer Pellegrini (2007) An Analysis of Concerns Regarding White-tailed Deer Hunting Issues by Michigan Firearm Hunters. Michigan State University.

Rachel Bricklin (2006) Animal model approaches to estimating heritabilities in wild deer mice. Michigan State University. *Completed a PhD, Fordham University.*

Jacqueline Campos (2004) Phenotypic and genomic matching in side-blotched lizards (*Uta stansburiana*). University of California, Santa Cruz.

INVITED PRESENTATIONS

Invited conference presentations

American Genetics Association, President's Symposium. Virtual. Indirect Genetic Effects. November 2020.

American Genetics Association, President's Symposium. Toronto, ON. Maternal effects in wild mammals. March 2018.

Wildlife70: A symposium on long-term research. Peterborough, Ontario. Measuring changes in natural selection and evolution using long-term studies. May 2017.

European Meeting of PhD Students in Evolutionary Biology (EMPSEB 22). Gotland, Sweden. Adaptation in a changeable world: lessons from red squirrels and white spruce. September 2016.

Canadian Society for Ecology and Evolution. Saskatoon, SK. Understanding Individuals to Conserve Populations: Lessons learned from evolutionary biology and inter-individual variance in fitness. May 2015.

INTECOL. Symposium: Ecological Consequences of Evolutionary Change. London, UK. Fluctuating selection caused by masting leads to the maladaptation of a seed predator. August 2013.

Workshop of the Animal Behaviour Group - Phenotypic plasticity and flexibility: When and why are early acquired traits reversible? Bielefeld, Germany. Adaptive life history plasticity within and across generations in a fluctuating environment. May 2012.

Ninth International Mammalogical Congress. Sapporo, Japan. Life history adjustments of North American red squirrels to food abundance. August 2005.

83rd Annual Meeting of the American Society of Mammalogists. Lubbock, Texas. Maternal effects and the response to selection in red squirrels. June 2003.

Gordon Research Conference in Quantitative Genetics and Genomics. Ventura, California. Maternal effects and the potential for evolution in a natural population of animals. February 2001.

Invited external seminars

Social interactions can affect evolution despite physical distancing: Lessons from a long-term study of territorial red squirrels. Colorado State University, September 2020.

Social interactions can affect evolution despite social distancing: Lessons from a long-term study of territorial red squirrels. @EvoEcoSeminars April 2020 [2,300 views as of September 2020].

Evolution in a Social Context: Lessons from a long-term study of red squirrels. University of Rochester. November 2019.

Evolution in a Social Context: Lessons from a long-term study of red squirrels. University of Toronto. October 2019.

Evolution in a social context: the importance of indirect genetic effects in red squirrels. University of Windsor. November 2017.

- Maternal effect evolution in wild rodents. Department of Biology, Queens University. November 2015.
- Maternal effect evolution in wild rodents. Département de Biologie, Université de Sherbrooke. April 2015.
- Maternal effect evolution in wild rodents. Department of Biology, Wilfred Laurier University. March 2015.
- Maternal effect evolution in wild rodents. University of Aberdeen. November 2014.
- Maternal effects in wild rodents. Institute of Evolutionary Biology, University of Edinburgh. October 2014.
- Maternal effect evolution in wild rodents. Department of Biology, University of North Carolina Greensboro. February 2014.
- Maternal effect evolution in wild rodents. Department of Biology, University of Virginia. October 2013.
- Spruce masting induces a cost of adaptation in red squirrels. Département de Biologie, Université de Sherbrooke. February 2011.
- Spruce masting causes feedbacks between ecology and evolution in red squirrels. Ecology and Evolutionary Biology and Behaviour series, McMaster University. October 2010.
- Masting and eco-evolutionary feedbacks in red squirrels. Department of Ecology and Evolution. University of Toronto. January 2010.
- Evolutionary interactions between red squirrels and white spruce. Department of Biology. University of Western Ontario, January 2008.
- Ecology, Evolution and Energetics of Red Squirrels. Department of Biological Sciences. Purdue University, April 2006.
- The Ecology of Adaptation in Red Squirrels. Laurentian University, Department of Biology, October 2004.
- Genetic and maternal effects on juvenile growth in red squirrels. McGill University, Department of Natural Resource Sciences Seminar Series, November 1999.
- Internal or other invited talks**
- Evolutionary interactions between white spruce and red squirrels. Hanover Forest Science Seminar Series. Michigan State University, April 2008.
- Ecology, Evolution and Energetics of Red Squirrels. Kellogg Biological Station, Michigan State University. April 2006.
- Red Squirrels: Using a long-term study to investigate short-term evolution. A presentation to the Fisheries and Wildlife Club, Michigan State University, March 2006.
- Managing Anthropogenic Evolution: lessons from evolutionary stasis in non-game species. Department of Fisheries and Wildlife, Michigan State University, April 2005.
- Fluctuating selection and the evolution of non-Mendelian inheritance. Behavioral Biology Group, Michigan State University, November 2004.
- The Ecology of Adaptation in Red Squirrels. Ecology, Evolutionary Biology and Behavior seminar series, Michigan State University, October 2004.

- Maternal Effects and the Response to Natural Selection in Red Squirrels. University of California, Santa Cruz, Ecology and Evolutionary Biology Seminar Series, March 2004.
- The Nature of Nurture: Evolution by maternal effects in a natural population of red squirrels. University of Alberta, Biological Sciences Departmental Seminar, Ecology Series, April 2002.
- Dietary protein constraint on the maturation of female deer mice. University of Alberta, Biological Sciences Departmental Seminar, Ecology Series, October 1999.

CONFERENCE PRESENTATIONS

- McAdam, A. G.**, S. Boutin, B. Dantzer, and J. E. Lane. Seed masting causes fluctuations in optimum litter size and lag load in red squirrels. *American Society of Mammalogists*, Washington D.C., June 2019.
- McAdam, A. G.**, S. Boutin, B. Dantzer, and J. E. Lane. Seed masting causes fluctuations in optimum litter size and lag load in red squirrels. *Society for the Study of Evolution*, Providence, R.I., June 2019.
- Studd, E. K., A. K. Menzies, E. R. Siracusa, R. Derbyshire, D. L. Murray, J. E. Lane, B. Dantzer, **A. G. McAdam**, S. Boutin, and M. M. Humphries. Seasonality of behaviour and species interactions in a boreal forest food web. *Canadian Society of Ecology and Evolution*, Fredricton, NB, August 2019.
- Bain, M., D. R. Wilson, S. Boutin, M. M. Humphries, B. Dantzer, J. E. Lane, and **A. G. McAdam**. Investigating effects of the social environment on variation in territorial vocalizations of red squirrels (*Tamiasciurus hudsonicus*). *Ontario Ecology, Ethology, and Evolution Colloquium*, London, ON, May 2018.
- Bain, M., D. R. Wilson, S. Boutin, M. M. Humphries, B. Dantzer, J. E. Lane, and **A. G. McAdam**. Investigating effects of the social environment on variation in territorial vocalizations of red squirrels (*Tamiasciurus hudsonicus*). *Canadian Society for Ecology and Evolution*, Guelph, ON, July 2018.
- Denomme-Brown, S.T., Cottenie, K. and **A. G. McAdam**. Variation in space and time: examining conspecific and heterospecific density-dependent dispersal in woodland rodents. *American Society of Mammalogists*, Manhattan, KS, June 2018.
- Denomme-Brown, S.T., Cottenie, K. and **A. G. McAdam**. Community level consequences of density-dependent dispersal. *Canadian Society for Ecology and Evolution*, Guelph, ON, July 2018.
- Fisher, D. N., S. Boutin, B. Dantzer, M. M. Humphries, J. E. Lane, D. W. Coltman, and **A. G. McAdam**. Do extended phenotypes allow dead squirrels to effect living ones? *Canadian Society for Ecology and Evolution*, Guelph, On, July 2018
- Fisher, D. N., S. Boutin, B. Dantzer, M. M. Humphries, J. E. Lane, D. W. Coltman, and **A. G. McAdam**. Social interactions from beyond the grave: Do extended phenotypes allow dead squirrels to influence live ones? *Animal Behaviour Society*, Milwaukee, WI, August, 2018
- Robertson, J. G., S. Boutin, M. M. Humphries, B. Dantzer, J. E. Lane, and **A. G.**

- McAdam.** Individual variation in the dear enemy phenomenon in red squirrels. *Ontario Ecology, Ethology, and Evolution Colloquium*, London, ON, May 2018.
- Robertson, J. G., S. Boutin, M. M. Humphries, B. Dantzer, J. E. Lane, and **A. G. McAdam.** Individual variation in the dear enemy phenomenon in red squirrels. *Canadian Society for Ecology and Evolution*, Guelph, ON, July 2018.
- Robertson, J. G., E. Siracusa, M. K. Bain, M. Sehrsweeney, S. Boutin, M. M. Humphries, D. W. Coltman, B. Dantzer, J. E. Lane, D. Wilson, and **A. G. McAdam.** Importance of social information in vocalizations of a territorial rodent, *Tamiasciurus hudsonicus*. *II Joint Congress on Evolutionary Biology*, Montpellier, France, August 2018.
- Siracusa E.R., S. Boutin, M.M. Humphries, B. Dantzer, J. Lane, D.W. Coltman, and **A.G. McAdam.** Does the social environment matter to solitary animals? Fitness benefits of familiarity in red squirrels. *American Society of Mammalogists*. Manhattan, KS, June 2018.

COMMITTEE SERVICE

Department of Ecology and Evolutionary Biology Graduate Committee (2020 to present)
Integrative Biology Chair Search Committee (2018)
Founder and Chair, Mental Health, Diversity and Equity Committee (2017 - 2019),
Department of Integrative Biology, University of Guelph

Wellness at Work Champion (2017 - 2018), Department of Integrative Biology
Champion (liaison) in the university-wide program, University of Guelph
Graduate Studies and Awards Committee (2015 - 2018), Department of Integrative
Biology, University of Guelph
Graduate Curriculum Committee (2017 - 2018), Department of Integrative Biology,
University of Guelph
Chair's Advisory Committee (2014 - 2017), Department of Integrative Biology, University
of Guelph
BIOS Curriculum Committee (2009-2010, 2015 - 2017), College of Biological Sciences,
University of Guelph
Graduate Program Committee (2015 - 2016), College of Biological Sciences, University
of Guelph
Safety Committee (Winter 2015), Department of Integrative Biology, University of
Guelph
University of Guelph Co-ordinator for the Ontario Universities Program in Field Biology
(2012)
Chair, Evolution Curriculum Subcommittee (2010 - 2011), Department of Integrative
Biology, University of Guelph
Curriculum Committee (2010 – 2012), Department of Integrative Biology, University of
Guelph
Seminar Committee (2009-2010), Department of Integrative Biology, University of
Guelph
Chair, Graduate Committee (2008), Department of Zoology, Michigan State University
Graduate Committee (2005-2008), Department of Zoology, Michigan State University
Population Genetics Search Committee (2005), Department of Zoology, Michigan State
University

WORKING GROUPS

Canadian Institute of Ecology and Evolution, Quebec Centre for Biodiversity Science
working group on “Adaptation and maladaptation in response to environmental
change.” (December 2015).

MEETING ORGANIZATION

Local Organizing Committee. Canadian Society for Ecology and Evolution annual
meeting, Guelph, Ontario. July 2018. (700 registrants)
Co-organizer. Peter Yodzis Colloquium in Fundamental Ecology. Theme: Integrating
The Ecology and Evolution of Social Interactions. July 2018. (200 registrants)

EDITORIAL WORK AND PEER REVIEW

Handling Editor, *Evolution* (2020 to present)

Associate Editor, *Evolution* (2015 to 2017)

Editorial Board member, *Journal of Evolutionary Biology* (2004 – 2007; 2011 – 2015)

Evolutionary and Population Ecology Panel, *National Science Foundation*

Manuscripts

Publons reviewer id: publons.com/a/1197034/

Manuscripts reviewed for: *Acta Theriologica*, *American Midland Naturalist*, *American Naturalist*, *Axios Review*, *Behavioral Ecology*, *Behavioural Ecology and Sociobiology*, *Biology Letters*, *BMC Ecology*, *Ecography*, *Ecology*, *Ecology Letters*, *Écoscience*, *Ethology*, *Evolution*, *Evolution Letters*, *Evolutionary Ecology*, *Forest Ecology and Management*, *Integrative and Comparative Biology*, *Journal of Animal Ecology*, *Journal of Evolutionary Biology*, *Journal of Heredity*, *Journal of Mammalogy*, *Journal of Zoology*, *Mammalia*, *Methods in Ecology & Evolution*, *Molecular Ecology*, *Northeastern Naturalist*, *Oecologia*, *Oikos*, *PlosOne*, *Phil. Trans. Roy. Soc. L.*, *Proceedings B*, *Reproduction, Fertility and Development*, *Science Reports*.

Grants: *Canada Foundation for Innovation*, *National Geographic Society (USA)*, *National Science Foundation (USA)*, *Natural Sciences and Engineering Research Council (Canada)*, *Natural Environment Research Council (UK)*, *Netherlands Organisation for Scientific Research*, *Swiss National Science Foundation*.

EXTERNAL EVALUATIONS

External assessment of tenure applications: 2

External examination of PhD Candidates:

Colin Garroway (2010) *The Social and Genetic Structure of Flying Squirrel Populations*. Trent University.

Ross Breckels (2013) *The Plastic and Evolutionary Responses of Fish to Anthropogenic Stressors*. University of Western Ontario.

OTHER EXTERNAL SERVICE

Scientific advice to the Royal Canadian Mint

SCIENCE OUTREACH

Flying Seed Project. I initiated the *Flying Seed Project* for grade 11 biology students based around an inquiry-based lesson plan and citizen science model of data collection to test the hypothesis that mowing frequency imposes natural selection on dandelion (*Taraxacum officinale*) growth forms. Together with colleagues at

the University of Guelph (S. Jacobs, R. Van Acker) and the Upper Grand District School Board (S. Bender) we developed a lesson plan (see Jacobs et al. 2015), which the national STEM outreach organization *Let's Talk Science* has adopted and now implements. Students send us data on mowing frequency and dandelion phenotypes as well as seed from their schoolyards. We are currently growing dandelions in the *Phytotron* at the University of Guelph in a common-garden experiment to test whether phenotypic differences among schoolyards are genetically based.

PRESS COVERAGE

Red squirrel biology and natural history

- “What Trees Talk About” – documentary on interactions between red squirrels and spruce trees that aired on *CBC television's “The Nature of Things”*, November 2017.
- Red squirrel segment aired on Daily Planet on the *Discovery Channel*, 2008.
- “Mother knows best” by Les Line, *National Wildlife Magazine*, June/July 2005.
- “The secret life of red squirrels” *Alaska Science Forum*, March 2003

Adaptive maternal hormone effects on red squirrel growth.

- Interviewed on CBC Radio's *Quirks and Quarks*, April 2013.
- “Babies of stressed squirrels grow faster” *Nature: Research Highlights*, April 2013.

Contemporary Evolution

- “Evolution: blink and you'll miss it” *New Scientist*, July 2005.
- “Marmots thriving amid climate change – for now” *LA Times*, July 2010.

Anticipation of food resources

- “Squirrel smarts: In war between spruce, critter, bet on bushy tail” *Lansing State Journal*, January 2007.
- “Squirrels accurately predict bumper harvests” *NewScientist.com*, December 2006.

Maternal effects

- Research reported in *Science (Science Shots)*, *Edmonton Journal*, *Science Daily*, and *Innovations Report*.

Plastic and genetic responses of red squirrels to climate change

- “The New Climate Almanac 2007” *Globe and Mail*, February 2007.
- “Discover's guide to the top 100 science stories of 2003” *Discover magazine*, Jan. 2004
- “Red squirrels evolving with global warming” *New Scientist*, Feb. 2003
- I was also interviewed for articles or radio broadcasts by *The Scientist*, *LA Times*, CBC radio (Yukon), KVMR radio, *YES Mag*, *Frontiers in Ecology and the Environment*, and *Alaska Science Forum*. This work was also reported by CBC television (Edmonton), *The Guardian*, *Daily Telegraph*, *National Post* and *Edmonton Journal*.

Cooperation in side-blotched lizards

- “True-pal lizards may show odd gene” *Science News*, May 27, 2006.

Antipredatory benefits of intermittent locomotion

- “In nature, animals that stop and start with the race” *Science*, 288:83-5.
